# Report of the Minister of Education

1948

To the Honourable Ray Lawson, O.B.E., LL.D., D.Cn.L.,  
Lieutenant-Governor of the Province of Ontario.

Your Honour,

I beg leave to present to your Honour the Report of the Department of Education for the year 1948. This volume contains, in Part I, summaries of the work of the several divisions and branches which are responsible for the organization and supervision of the educational system, and, in Part II, a collection of general and comparative statistics showing the present state of the system in all its various aspects.

There have been a number of trends in educational matters which have been noticeable in the past few years. One of these, common to almost every aspect of our civilization, is the increasing cost of materials and services. Through legislative grants an effort has been made to help local authorities to maintain educational standards in the face of rising costs. Each year since 1945, when legislative grants for school purposes became payable on the new basis, there has been an average annual increase of approximately \$3,000,000 in the amount expended, and in 1948 these payments reach approximately \$35,000,000. About two-thirds of this sum is allotted to elementary schools.

The school population has shown a normal increment commensurate with the general growth of population. This increase, combined in some cases with a shifting of part of the school population toward new suburban areas, makes necessary the building of a number of new schools, despite high constructional costs. Sixty-eight new elementary schools and seventy-eight additions to existing buildings have been completed in 1948, and forty-eight new buildings and twenty-nine additions are under construction. A similar renovation and extension of secondary school facilities has been taking place.

Provision was made in an amendment to the Public Schools Act in 1947 for the establishment of school sections and authorities in areas where no local tax could be imposed. Schools have now been established in permanent Army and Air Force stations, in other federal projects and in sanatoria, under boards appointed by the Minister, and with the Department paying fifty per cent of operating costs.

The trend in public opinion in favour of the enlargement of school areas, which has been noted in recent Reports, continues to develop, with consequent reduction of the number of local educational authorities in the province. At the end of 1948 there are 499 township areas operating elementary schools efficiently and economically which formerly were the responsibility of the school trustee boards of 3,244 school sections. Concurrently, the organization of high school districts has led to the creation or enlargement of secondary schools with adequate facilities and varied courses to serve the pupils in the areas affected. Nearly ninety high school districts have been set up in Southern Ontario, representing approximately seventy-five per cent of the area of this part of the province.

This development in both elementary and secondary fields could not have reached its present state without the provision of an economical and satisfactory system of trans-

portation for pupils. Serious doubts were expressed at first as to the feasibility, under our climatic conditions, of such a system, but experience has shown that school buses can maintain, with proper precautions, a safe and reliable service throughout the school year. Both elementary and secondary boards are taking advantage of provincial grants to organize transportation systems.

The supply of teachers for Ontario schools is still a matter of concern to the Department of Education. Despite the improvement in salaries which has taken place in recent years, and the efforts to alleviate the situation through special summer sessions at the Normal Schools, there is still a shortage of teachers for the elementary grades.

The provision of technical education between the levels provided in the vocational schools and in the universities is now an accepted responsibility of the Department of Education. Four technical institutes are open to students. Two of these, the Provincial Institute of Mining at Haileybury and the Provincial Institute of Textiles at Hamilton, provide courses related to specific industries. The Lakehead Technical Institute at Port Arthur provides training for mining and forest industries in its own constituency, and is also giving experimentally some Arts courses which may qualify it to rank as a Junior College. The fourth, the Ryerson Institute of Technology, Toronto, began as a Rehabilitation and Training Centre for ex-service personnel, and with much of its equipment and staff derived from this source it is functioning as a polytechnical school with a wide range of courses and a large enrolment in both day and evening classes.

Respectfully submitted,

DANA PORTER

Minister of Education.

Toronto, December 1, 1949.

# Elementary Education

## Report 1

### LEGISLATIVE GRANTS

The summary below shows the total amount of legislative grants paid to elementary school boards during the past five calendar years:—

1944.....	\$ 6,591,550.00
1945.....	\$17,864,226.00
1946.....	\$19,417,224.00
1947.....	\$19,374,749.00
1948.....	\$22,263,152.00

In 1948 the calculation of legislative grants for elementary schools was again based on population in urban municipalities and assessment per classroom in rural areas. The grants paid in urban municipalities ranged from 27% to 56.4% of the approved cost of operation for the calendar year 1947, and from 46% to 89.1% of the approved cost of operation of the preceding calendar year in rural areas.

In addition to the general legislative grants, work in special subjects such as Agriculture, Auxiliary Education, Industrial Arts and Crafts, Home Economics, and Kindergartens is encouraged by special grants.

The increased legislative grants have assisted local educational authorities in providing better accommodations and improved educational opportunities without greatly increased local tax levies.

### LARGER UNITS

A township school area includes a group of former rural school sections, regardless of whether they are in the same township or in adjoining townships, and may include also one or more towns or villages located in or adjacent to the rural portion of the area. Such areas are established by by-laws of the councils of the municipalities concerned. The by-laws must receive the approval of the Minister of Education before they go into effect. Before 1948, 484 township school areas had been formed. In 1948, 15 township school areas were established and additions were made to 25 existing areas. The establishment of these 499 areas involved the dissolution of 3,224 school sections.

The list of township school areas formed in 1948 follows:—

Township	No. of School Sections	County or District	Inspector
Black River No. 3.....	2	Cochrane	J. H. Kennedy
Calvert North.....	3	Cochrane	L. C. Sutherland

#### TEMPORARY CLOSINGS

A number of one-room schools are closed each year because of low enrolment. Provision is made for the children concerned to attend nearby schools where they have the opportunity of associating with more pupils of their own age groups. In 1948 all such closings were brought about by the voluntary action of the local boards.

The list of schools closed in 1948 follows:—

Inspectorate	Inspector	School
Carleton . . . . .	J. C. Wilker . . . . .	S. S. No. 1 Gower N. (T.S.A.)

## TRANSPORTATION OF PUPILS

In areas where larger high school districts have been formed, the new high school boards have assumed responsibility for the transportation of secondary school pupils and the public and separate school boards have discontinued such transportation. In those parts of the province where larger high school districts have not been established, public or separate school boards may provide transportation for secondary school pupils, and many of these boards have done so. During 1948, Departmental approval for legislative grant purposes was given to 423 contracts made by public and separate school boards, and transportation was provided under these contracts for 7,312 secondary school pupils.

The provision of transportation by such boards has materially improved the opportunity of a large number of pupils to secure secondary school education.

## SUPPLY OF TEACHERS

For the school year beginning September, 1948, the number of qualified teachers was insufficient to meet the demand. To alleviate this shortage to some extent, Normal School Summer Sessions were held at Toronto and North Bay. The number of students who successfully completed the first year course in 1948 was 221. These were granted Deferred Interim Second Class certificates. In the second year course, 257 graduated in 1948 and they were granted Interim Second Class certificates.

During the school year beginning September, 1948, Letters of Permission were issued for boards of trustees to engage 457 persons who did not possess complete professional qualifications for elementary schools in the province but who had attended, at some time, teacher-training schools. The number of these teachers who were employed by boards of trustees is indicated in the following summary:—

Holders of expired Ontario Third Class certificates. . .	149
Persons who failed at Ontario Normal Schools. . . . .	96
Certificates from other provinces. . . . .	210
Holders of High School Assistants' certificates. . . . .	2
<hr/>	
Total. . . . .	457

During the school year beginning September, 1948, it was necessary to issue 632 Letters of Permission for boards of trustees to engage persons without teacher-training experience. The summary below indicates the academic standing of these persons:—

University graduates. . . . .	32
Some university work. . . . .	26
Persons of Upper School standing. . . . .	221
Persons of part Upper School standing. . . . .	62
Persons of Middle School standing. . . . .	225
Persons of part Middle School standing. . . . .	36
Persons of Lower School standing. . . . .	30
<hr/>	
Total. . . . .	632

**CORRESPONDENCE COURSES**

The Correspondence Courses conducted by the Department of Education were begun in 1926 with enrolment of 50 pupils. During the school year 1947-48 the enrolment, which included Grades I to X, was 2,614. Of this number 2,229 were enrolled in the English courses and 385 in the bilingual courses. Of the 33 High School Entrance candidates, 32 were successful.

- Those eligible for admission to the Correspondence Courses are:—
- (a) those who cannot attend a school because of distance or road conditions;
  - (b) those who are unable to attend owing to illness or physical disability;
  - (c) patients in sanatoria and preventoria or in reform institutions where there are no resident teachers to supervise and correct the work;
  - (d) the children of former residents who are temporarily domiciled outside the province, provided they have no other opportunity to receive instruction in their own language; and
  - (e) adults who have not access to night school facilities.

The Correspondence Courses, including books and supplies, are given free to children and also to adults who are not working for wages. Adults who are working for wages must provide their own text-books and supplies. Enrolments are subject to the approval of the public or separate school inspectors who are in a position to judge each application on its merits.

That the Correspondence Courses are meeting a real need in the lives of hundreds of pupils throughout the province is evidenced by the many letters of appreciation which are received.

**RAILWAY SCHOOL CARS**

In addition to Correspondence Courses, the problem of providing education for children in sparsely settled areas is met by Railway School Cars, seven in

number, on the lines of the three railway companies serving Northern Ontario. Each car operates over a circuit comprising a number of stops on railway sidings at small stations. A circuit averages about 140 miles. Each school car has a gross enrolment of from 30 to 50 pupils on its circuit. A car stops at each station four or five times during a school year. Each station area is thus provided with school during 40 to 55 days, classes being sometimes conducted on Saturdays and holidays as well as on regular school days. A day or so is usually lost by the school car in moving from station to station on the railway. All seven teachers in charge of school cars hold Ontario certificates, and in some cases the wife of the school car teacher is also certificated.

## **SCHOOL HEALTH SERVICE**

Nursing and medical inspection and supervision in the schools of Ontario are provided mostly as part of an over-all community programme, although in a few areas school board provision for these services, inaugurated prior to 1924, is continued. Municipalities having some type of school health service number 511. In 1947 the number was 490.

The prevailing type of organization is the Health Unit, provided for in an amendment to The Public Health Act of 1943. In 1948 there were in operation 24 Health Units serving a population of over 1,000,000 and covering 336 municipalities. A county council has power, by legislation of 1940, to "provide for employment by and at the expense of the county of public health nurses" for school health services. There are five counties which so provide, covering 85 municipalities. There are 54 municipalities which provide their own public health supervision, the municipal Board of Health employing nurses and medical officers, who serve the schools as well. There are 14 municipalities in which the school boards had school medical and nursing services prior to 1924 which are allowed by law to continue. In 22 municipalities general health services are sponsored jointly by school boards and local Boards of Health and carried out by private agencies. A total of 649 nurses give school health service of some type; in 1947 the number was 593.

The only grants now payable for school health services, either by the Department of Health or the Department of Education, are those for Health Units, graded in proportion to their health budget and the population served. Private schools are not included in public health service.

## **NEW CONSTRUCTION**

The Interim Report of the Committee on Planning, Construction and Equipment of Schools in Ontario continues to be a valuable guide in modern school construction.

During the year 1948, 68 new elementary schools and 78 additions to existing schools were completed at a cost of approximately \$10,800,000.00. In addition to the buildings completed, 48 new buildings and 29 additions to existing buildings were under construction at the end of the year.

During the four years since January 1, 1945, 215 new elementary schools, 197 additions to existing schools, and 17 temporary buildings have been completed at a total cost of approximately \$21,000,000.00. These new buildings have provided accommodation for 40,530 additional pupils.

## **SCHOOL SECTIONS IN AREAS WITHOUT ASSESSMENT**

Before 1947 there was no specific legislation regarding the education of children residing on Crown Lands or on lands not assessed for school purposes. During the recent war the Dominion Government secured a number of areas in

STRATHROY'S NEW PUBLIC SCHOOL

parts of the province for Military Camps, Air Fields, Industrial Projects, and Housing Projects. On many of these tax-exempt lands there are now children of school age in considerable numbers. An amendment to The Public Schools Act (section 62a) made in 1947, and further amended in 1948, gave authority for the establishment of school sections in such areas and in other areas where no local school tax could be imposed.

Schools have been established under authority of this amendment, and are now in operation at Barriefield, Camp Borden, Petawawa, Picton, and in Air Force Stations at Trenton and Clinton; at the Deep River Town Site, and at Ajax; in housing projects at Malton, Scarborough, Long Branch, Brantford, Uplands Air Port, and other places. Schools have also been established in sanatoria at Gravenhurst, London, Hamilton, Ottawa, and Weston under similar arrangements. These schools are operated by school boards appointed by the Minister. The Department of Education pays 50% of the cost of operating such schools, excluding capital expenditures.

## **THE PROVINCIAL INSPECTORAL STAFF, 1948**

### **I. In Memoriam:**

MR. CHARLES A. LAPP, B.A., B.Paed., passed away suddenly while attending a teachers' meeting in East York early in September. Mr. Lapp was born at Brighton, where he attended elementary and secondary schools. He attended the Peterborough Normal School and taught for a short time at Braeside. For twenty-three years he held positions as principal of Creighton, Elgin and Devonshire Schools, in the City of Ottawa. He was a graduate in Arts of Queen's University and held the degree of Bachelor of Pedagogy from Toronto University. In 1938 he was appointed Public School Inspector of Simcoe South, with headquarters at Bradford. He was transferred to York No. 1 in 1941 and to York No. 5 in 1943 (East York Township). Mr. Lapp was a man of outstanding ability, whose educational work was influenced by a high standard of excellence and a fine humanity. He was a clear, exact thinker. He knew what should be done and he did his best to impart both the vision and the method to teachers with whom he worked. He was a quiet man, a kind man, just in his praise and warm in his appreciations. In his passing the province has lost an educationist who was alert, progressive, and a worthy representative of the Department of Education.

### **II. Retirements:**

MR. NORMAN CAMPBELL, M.A., Inspector of Public Schools for Frontenac South, retired in August, 1948. Mr. Campbell was a native of Grey County, where he received his public and secondary education. He attended the Model School at Hanover in 1914 and taught for a short time in rural schools in Grey County before attending the Toronto Normal School, from which he graduated in 1917. After completing the Normal School Course he enlisted in the first Great War and proceeded overseas. When he returned to Canada, he taught in the Portsmouth Public School. He was a graduate of Queen's University, receiving the degree of Master of Arts in 1924. He attended the Ontario College of Education and graduated in June, 1925. Mr. Campbell taught for short periods in the Monteith Academy, in the Hamilton Technical School, and in Glebe Collegiate Institute, Ottawa. He was appointed Inspector of Public Schools for Renfrew North in 1928, with headquarters at Pembroke, and served in this inspectorate for seventeen years, being transferred to the inspectorate of Frontenac South in 1945. Mr. Campbell had a deep interest in rural education and pursued with enduring vigor his efforts to improve the quality of the education provided for the rural

KINDERGARTEN, STRATHROY PUBLIC SCHOOL

children in the communities in which he served. His retirement, because of ill health, was deeply regretted by all members of the Department.

DR. ARTHUR WALLACE ROSS DOAN, M.A., for many years an Inspector of Public Schools in the City of Toronto, retired on June 30th, 1948. Dr. Doan was born on a farm near Queensville, York County, where he obtained his elementary education. His first professional training was received at the County Model School, Newmarket. Later he attended the Ontario Normal College, Hamilton. In 1909 he graduated from Queen's University. In 1921 he obtained the degree of Master of Arts, and two years later that of Bachelor of Pedagogy from Toronto University. From the same institution he obtained the degree of Doctor of Pedagogy in 1933. Dr. Doan did his first teaching in S.S. No. 10 East Gwillimbury. In Toronto he served as Assistant Master in Church Street School and Park School. On promotion to a principalship, he was in charge at Sackville Street School for four years. After a year as Acting Principal of Ryerson School he was Principal of Queen Victoria School for nine years. Moving on to Charles G. Fraser School, he made a special study for four and one-half years of the educational problems of a down-town school. In 1933 Dr. Doan became a Public School Inspector, and in that capacity continued to render outstanding service in the schools of Toronto. On his retirement Dr. Doan returned to his native York County. On a small acreage on Yonge Street near Richmond Hill he spends his time gardening and taking an active interest in educational affairs of the surrounding countryside.

### III. Appointments:

The following appointments were made to the provincial staff of inspectors during the year 1947:—

1. Department of Education: W. R. Stewart, B.A., Secondary School Inspector in the Department of Education, appointed Acting Director of English Instruction, December 1.
2. City of Peterborough: K. S. Wightman, B.A., B.Paed., Public School Inspector, appointed Superintendent of Schools, September 1.
3. City of Toronto: (1) Elmer Sager, B.A., B.Paed., Principal, Park Public School, Toronto, appointed Public School Inspector, February 9th.  
(2) T. H. W. Martin, B.A., D.Paed., Principal, Brock Avenue Public School, Toronto, appointed Public School Inspector, September 7.  
(3) H. L. Martyn, B.A., B.Paed., Principal, Church Street Public School, Toronto, appointed Public School Inspector, September 7.
4. Elgin: K. H. D. Hall, B.A., Toronto Public School staff, appointed Assistant Public School Inspector, September 1.
5. Essex No. 1: F. A. Leitch, B.A., Principal, Maplehurst Public School, Aldershot, appointed Assistant Public School Inspector, August 1.
6. Glengarry No. 1: D. J. Hynes, B.A., B.Paed., Toronto Public School staff, appointed Public School Inspector, January 1.
7. Hastings North: D. W. Simpson, B.A., Principal, McHugh Public School, Brampton, appointed Public School Inspector, September 1.
8. Huron South: G. G. Gardiner, B.A., Assistant Public School Inspector in Elgin, appointed Public School Inspector, September 1.
9. Peel: C. E. Pofts, B.A., Toronto Public School staff, appointed Assistant Public School Inspector, September 1.

10. Prescott and Russell No. 1: G. S. McIntyre, B.A., Assistant, Meaford High School, appointed Public School Inspector, September 1.
11. Welland (in part); Lincoln (in part): R. J. Carter, B.A., Windsor Public School staff, appointed Assistant Public School Inspector, September 1.
12. York No. 7: Miss Bertha Dick, B.A., B.Paed., Toronto Public School staff, appointed Assistant Public School Inspector, February 1.
13. District Div. 2: Norman Muir, B.A., B.Paed., Ridgetown High School appointed Public School Inspector, September 1.
14. District Div. 11(1): J. C. McClelland, B.A., Assistant Public School Inspector in Peel, appointed Public School Inspector, September 1.

#### **IV. Transfers:**

The following transfers were made in the provincial staff of inspectors during the year 1948:—

1. J. E. Horton, B.A., from Simcoe South to Frontenac South No. 1, September 1.
2. R. G. Kendall, B.A., (Assistant) from Welland (in part); Lincoln (in part), to Department of Education (Auxiliary Classes Branch), September 1.
3. D. A. Lapp, M.A., from District Division 2 to Simcoe South, September 1.
4. H. H. Loucks, B.A., from Hastings North to Renfrew South, September 1.
5. J. R. McCarthy, B.A., B.Paed., (Inspector without designated area) from Frontenac South No. 1 to York No. 7, September 1.
6. Howard Robertson, B.A., B.Paed., from Glengarry No. 1 to Waterloo No. 1, January 1.

#### **V. Normal Schools:**

1. R. H. Brayford, B.A., B.Paed., Public School Inspector for Renfrew South, to Hamilton Normal School, September 1.
2. G. H. Dobrindt, B.A., Public School Inspector for Waterloo No. 1, to London Normal School, January 1.
3. J. R. M. Peat, B.A., B.Paed., Public School Inspector for District Division 11(1), to Toronto Normal School, September 1.
4. W. C. VanderBurgh, B.A., Public School Inspector for Prescott and Russell No. 1, to Stratford Normal School, September 1.

#### **VI. Leave of Absence:**

1. F. W. Minkler, B.A., D.Paed., Public School Inspector for York No. 7, granted leave of absence for one year for work with The Royal Commission on Education.
2. R. O. Staples, B.A., D.Paed., Public School Inspector for Huron South, granted leave of absence for one year in order to study abroad. October 1.

### **CONCLUSION**

The Inspectors of Public and Separate Schools are deserving of praise for their faithful service during the year. Their keen interest in the welfare of the girls and boys, and their splendid co-operation with the office of the Superintendent are greatly appreciated. Although the inspectors are aware that their most worthwhile contribution to education is through the supervision of the day-by-day work in the classroom, administrative duties take much of their time and energy. Such duties include the administration of legislative grants, new school construction, transportation, and the formation of larger units of administration for both ele-

mentary and secondary education. However, in the approval of plans for new school buildings considerable responsibility has been assumed by Technical Advisers attached to this Department, and in some areas where inspectors have been carrying a particularly heavy load, Assistant Inspectors have been appointed.

The policy of interchange between Normal School Masters and School Inspectors has been continued, and in each of the centres where a Normal School is located joint conferences were held. By these means a more co-ordinated effort has been achieved between those who train teachers and those who supervise teachers-in-service.

It is gratifying to know that the annual award under the Greer Memorial Fund, organized by the Ontario Educational Association in memory of my predecessor in this office, has provided recognition for worthy educational research during the past three years of its existence.

To my colleagues in the Elementary Education Branch I wish to express sincere appreciation for their loyalty, understanding, and complete co-operation at all times.

C. F. CANNON

Superintendent of Elementary Education.

Toronto, March 31st, 1949.

# Secondary Education

## Report 2

I have the honour to submit herewith the reports of the High School Inspectors, the Director of Vocational Education, and the Director of Provincial Technical Institutes, for the school year 1947-48.

A. G. HOOPER,  
Superintendent of Secondary Education.

Toronto, September 15, 1949.

### 1. COLLEGIATE INSTITUTES, HIGH SCHOOLS, AND CONTINUATION SCHOOLS

It is increasingly evident that the value of secondary education is widely recognized by the people of Ontario. A growing demand for better schools, improved courses of study, and more competent instruction has been expressed in several ways. Not the least of these has been the organization of larger high school districts throughout the province to provide improved educational facilities, especially for rural pupils. In keeping with this trend, the growing supply of qualified teachers has contributed greatly to the general improvement of standards of instruction.

#### ENROLMENT

That secondary education is becoming available to a greater number of pupils may be seen in the increased enrolment during recent years in academic secondary schools. The following table indicates the number of pupils enrolled and the number of teachers employed in these schools for the past four years.

School Year	1944-45	1945-46	1946-47	1947-48
Enrolment.....	82,863	89,521	94,343	93,967
Teachers.....	3,362	3,609	3,689	4,080

It is significant that the pupil-teacher ratio has been reduced materially from 25.6 in 1946-47 to 22.9 in 1947-48.

#### TEACHERS

As an indication of the trend in the professional qualification of teachers, the following table reveals the number who have been granted permission to teach in academic secondary schools during the same period:

	1944-45	1945-46	1946-47	1947-48
—with Ontario Professional Training.....	99	109	109	90
—with Professional Training from other Provinces.....	5	8	37	22
—with no Professional Training.....	6	13	14	19
Totals.....	110	130	160	131

A further encouraging evidence in this respect can be found in the increased enrolment at the Ontario College of Education. In September, 1948, this reached 356 in the High School Assistants' Course, as compared with 256 for the previous year. This increase may be ascribed in part to the resumption of their scholastic

education by students enlisted in the armed services during the war years, since 157 such veterans enrolled in 1948 as compared with 80 in 1947. Another factor has been the incentive provided by the introduction of more attractive salary schedules in many schools.

## **COURSES**

Only slight alterations were made in the courses of study for academic secondary schools during the school year 1947-48. These included certain changes in the course of studies for boys' Physical Education and Citizenship Corps Training. The latter phase of the work in Physical Education now replaces the former Cadet Training course. Some portions of the grade thirteen History course were assigned for extensive study only and were therefore not included in the examination requirements for the Honour Graduation Diploma. The publication of new texts for grade thirteen Latin provided fresh and valuable subject matter for examination purposes and also served to improve the general quality of the course. As a supplement to the text-notebooks commonly used in the Occupations course, lesson aids were published in January, 1947, for the direction of teachers of Guidance. The grade twelve course in Occupations was also definitely recommended, though not actually required. In July, 1947, the courses of study in Biology were reprinted with more detailed direction regarding the depth of treatment to be expected. In other subjects the courses of study were unchanged.

## **HIGH SCHOOL DISTRICTS**

Organization of larger high school districts throughout the province was further extended during the years 1947 and 1948. In 1947 three new urban districts were established and in 1948 three more were added. In addition, in rural or semi-rural areas several larger high school districts were formed, consisting of townships or of more than one municipality. Thirty of these were commenced in 1947 and twenty-six in 1948. This programme has directly or indirectly resulted in the closing of several of the smaller schools in rural districts. In 1947 eleven Continuation Schools and two High Schools were closed. By September, 1948, six additional Continuation Schools and two more High Schools were closed. A further development in organization now appears imminent in the proposed formation of Boards of Education for districts including more than one municipality. Legislation to permit this was passed in the 1948 session of the Ontario Legislature.

The High School Inspectors have made it a practice to attend the inaugural meetings of newly-appointed High School District boards in order to offer their co-operation and advice. Invariably they have been favourably impressed with the calibre of these boards and have welcomed the opportunities thus afforded to become better acquainted with the board members. They also deeply appreciate the generous assistance of Elementary School Inspectors in arranging and attending meetings and otherwise contributing their services as secretaries of consultative committees set up by the County Councils.

That the people of Ontario have welcomed this opportunity to extend educational services is attested by the rapid growth of the movement. By September, 1948, nearly ninety High School Districts had been set up in Southern Ontario, representing approximately seventy-five percent of that part of the province.

## **BUILDING PROGRAMME**

The growth of population and the expansion of facilities for secondary school education have naturally resulted in an extensive construction programme. This was delayed during and immediately after the war years on account of re-

strictions on building and prohibitive costs of construction. However, in 1947 two new schools, five additions and alterations, and ten temporary structures were built. In the first six months of 1948, one new school building, five additions and alterations, and two temporary structures were erected; while thirteen new schools, thirteen additions, and three temporary buildings were under construction. The complete school buildings erected during this period are located in Bancroft, Lafontaine, and Stella. The rapid expansion of the construction programme is further revealed by the fact that approvals were granted for ten complete buildings and twenty-eight additions during this same period.

## SUPERVISION

Supervision of education in secondary schools has benefited greatly in the past few years from the opportunities of close co-operation with other groups of educators. Dr. A. C. Lewis, Dean of the Ontario College of Education, and members of his staff have arranged joint conferences with secondary school inspectors at which model lessons have been taught and a valuable interchange of ideas has taken place. This practice was continued during the school year of 1947-48 with beneficial results. High School Inspectors have also endeavored to meet groups of teachers during their regular inspections in order to supplement the personal assistance which they could offer to individual teachers. They have also welcomed opportunities to conduct joint inspections of composite schools in company with Vocational School Inspectors.

## SCHOLARSHIPS

For the academic year 1947-48 a substantial increase was noted in the number of awards granted under the Dominion-Provincial Student-Aid programme. At a cost of nearly \$200,000, 967 awards were granted, as compared with 751 in the previous year. The Department of Education is anxious that full advantage of this scheme be taken by pupils who are eligible for such awards.

The inspectors wish to pay special tribute to principals and teachers in all types of academic secondary schools for their loyalty to the best traditions of education coupled with an earnest desire to promote improvement in our educational system through sound co-operative effort. The years lying immediately ahead will offer even greater opportunities for service in the field of secondary education in Ontario.

C. W. BOOTH

for the High School Inspectors.

Toronto, July 5, 1949.

## 2. VOCATIONAL SCHOOLS

The statement of statistics covering vocational schools for the last three years shows that the net cost to the municipalities rose, in round figures, from \$3,600,000 in 1945 to \$3,900,000 in 1946 and to the unprecedented total of \$4,900,000 in 1947. Legislative grants, which equalled approximately 50% of the cost of vocational education in 1945, have risen from \$3,000,000 to \$3,400,000 for the three years under review, and have materially assisted the municipalities in meeting the demands for higher salaries for teachers and administrative personnel and the increased cost of buildings and equipment.

In last year's report, reference was made to the contributions of the Dominion Government under The Vocational Training Co-ordination Act, 1942, to the pro-

gramme of vocational education in Ontario. Comparative expenditures for the last three years are as follows:

	Province	Dominion
1946.....	\$3,111,106	589,000
1947.....	3,197,657	589,000
1948.....	3,430,275	589,000

## ATTENDANCE

The most recent figures for day school enrolment show little change, but the evening class attendance increased by more than 12% over that of the previous year. The table below gives comparative statistics. There is an indication of growing enthusiasm on the part of the adult citizens of the Province for the diversity of the programme offered. The scope of evening classes continues to increase. Of particular note are the opportunities provided for the study of our language and customs by the many new Canadians arriving in this Province. Their response to the efforts made by the teaching staff has been most gratifying.

	1945-46	1946-47	1947-48†
No. of Schools—Day .....	43	41	43
No. of Schools—Evening .....	41	46	46
No. of Pupils—Day .....	30,252	32,131	32,116
No. of Pupils—Evening .....	37,807	42,892	48,351
No. of Teachers—Day .....	1,470	1,569	1,635
No. of Teachers—Evening .....	1,174	1,348	1,541
Legislative Grants (Applicable to Fiscal Year) .....	\$3,111,106	\$3,197,657	\$3,430,275

†Including Senior Auxiliary Schools.

## BUILDINGS AND EQUIPMENT

Additional vocational accommodation is in the process of construction at St. Catharines, Kitchener and Ottawa. The St. Catharines addition will be ready for occupancy in September, 1948.

Machine tools for the shops are becoming more readily obtainable and many boards have commenced to replace the tools which were heavily worn by the war emergency classes.

## CHANGES IN STAFF

Miss Elsie McKim has retired after having served as inspector of Home Economics for a period of years. Miss McKim has made very valuable contributions to Home Economics education throughout Ontario in both teacher-training and inspection.

Miss Olive Brownlee, M.A., has been appointed to the Home Economics inspectoral staff. Miss Brownlee brings to the service of Ontario schools the benefits of her experience as a teacher of Home Economics in elementary and secondary schools as well as specialized training in the field of guidance.

## COURSES

### 1 Agriculture

Two vocational schools, Belleville and Chatham, are making a sincere effort to develop courses in agriculture suited to the needs of their particular areas. Each school now has courses organized in Grades IX and X. At Chatham there is a separate classroom for the study of agricultural topics and a basement room fitted for activities pertaining to the study of Farm Mechanics. In each school the basic shop practice is given in the specialized shops of the Industrial depart-

ments. During the summer vacation the teachers maintain close contact with the students on the farm and reports are submitted at the beginning of the fall term.

The evening class programmes at both schools have been arranged in close co-operation with the Agricultural Representative and the Junior Federation of Agriculture.

## 2 Commercial

The enrolment in commercial classes has increased, despite the heavy demand for office workers. In this increased enrolment the following trends appear to be significant:

1. More boys are enrolled in commercial classes than during the past few years, a trend which may be partly due to the fact that other commercial work may be substituted for shorthand.
2. With few exceptions, those schools offering the commercial course provide the full four-year course and issue the Secondary School Graduation Diploma.
3. Greater numbers of pupils are completing Grade XII in order to qualify for the provincial diploma, which shows that they realize that business will not continue to employ partially-trained office personnel.
4. General course pupils, in greater numbers, are electing the commercial option where it is offered, but, unfortunately, many schools wishing to inaugurate this option are unable to do so, owing to the scarcity of qualified commercial teachers.
5. An increasing number of smaller schools, which formerly attempted to give the commercial course, are now offering the commercial option and the one-year Special course.

During the past year, equipment such as typewriters, business machines and filing cabinets has become more freely available and schools have been able to add to their equipment and replace worn-out machines. However, some types of business machines are still in short supply because of exchange control regulations.

Approximately one hundred commercial teachers improved their qualifications and teaching methods through attendance at the regular summer school operated by the Department. For the first time, teachers completing their courses for the Commercial Specialist Certificate were required to submit evidence of at least four months' satisfactory office experience.

The introduction of three Grade XIII Departmental examinations in commercial subjects attracted candidates from several large centres.

Lastly, tribute must be paid to the increasing interest being shown in commercial education by business men. The lead in this direction in many large centres has been taken by the education committee of the local chapter of the National Office Management Association in conjunction with the local commercial teachers. They have assisted in framing the Grade XIII commercial courses, in conducting surveys, and in organizing co-operative training programmes for senior commercial pupils. The liaison between the National Office Management Association and the Department has been a happy and profitable one.

## 3 Home Economics

Schools in which Home Economics is taught

Schools	Number	Number of Teachers
Vocational Schools. . . . .	34	104
Other Secondary Schools. . . . .	118	129
Elementary Schools, Grades VII-VIII. . . . .	164	171

#### **4 Industrial**

In the original organization of industrial departments in vocational schools it was recognized that the science and mathematics taught should bear a close relationship to the practical shopwork instruction of the various courses. Over the years special text and reference books have been used to advantage. The early formation of separate "Round Table Conferences" for mathematics and science, under the Technical Section of the Ontario Educational Association, has played a very important part in this respect. Since the formation of the Technical Research Council, the bond between teachers of shopwork and teachers of mathematics and science has been further improved, and the character of the industrial courses has been enriched accordingly.

Students enrolled in industrial classes are increasingly taking advantage of opportunities provided them in elective options, such as instrumental music, art and typewriting. The time for these studies is usually taken from periods allotted to shop work.

Work opportunities continue to be plentiful, especially for graduates. Although, up to the present, those dropping out of school to take employment before graduation have had no difficulties, there are indications that in the future employers will be more rigorous in the selection of employees.

During the year a number of schools have been making a study of "drop-outs." Although the reasons for leaving school prior to graduation are varied, many school authorities agree that two-year terminal courses should be introduced which would offer more satisfactory programmes of study for students leaving at sixteen years of age. In the field of shopwork many new patterns of vocational training might be introduced which would provide more suitable instruction for a large percentage of students.

The shortage of qualified teachers during the war necessitated the issuing of many temporary certificates to skilled tradesmen who were willing to help in the emergency. Many of these have now obtained their professional qualifications through the Vocational Training Department of the Ontario College of Education and are gradually filling the backlog of demand for vocational teachers.

#### **5 Industrial Arts and Crafts**

During the school year 1947-1948 there were sixteen new centres opened in Industrial Arts and Crafts with no centres closing. The number teaching on permits is negligible so that the schools are now considered to be manned by properly certificated teachers. The cost of carrying on this subject has risen considerably during the past year on account of the increased cost of materials.

#### **6 Art**

This report deals at some length with the story of the present status of Art in Ontario vocational schools. For several years a complete record has not been maintained.

Vocational Art "departments" are organized in four vocational schools in the City of Toronto, two in Hamilton, one in London, two in Ottawa, and one in Windsor. At the present time these vocational art departments are staffed by 40 teachers who serve the vocational interests of approximately 700 pupils. The largest single unit is located in the Central Technical School, Toronto.

While most schools serve a number of pupils who are non-residents of the districts in which the schools are located, it is significant that the enrolment in the Central Technical School, Toronto, includes students from almost every Province in the Dominion and also from Great Britain and other European countries, Jamaica, South America, Mexico, and the United States. The standard of work may, therefore, be judged, at least in part, by this comprehensive enrolment.

The programme in Commercial Art consists primarily of a sound basic training, a quality common to all courses offered in vocational schools. This training includes not only the essential principles of Art which are required in all fields of employment, but also the fundamental principles of drawing, painting, and design, the development of appreciation of line, form and colour, and the encouragement of imaginative creativeness derived from experiences in self-expression and experimentation.

Students taking these courses find employment in advertising and commercial art, where original and creative talent is indispensable. Employers give preference to students with this training, and many graduates find employment in the United States. Employment is usually obtained in such occupations as magazine cover designing, magazine and newspaper advertising, layout and illustration, poster work, direct mail advertising, catalogue and fashion illustration, package designing, interior decoration, theatrical property design, mural painting, and in the wood, metal and weaving crafts.

Many students who have taken Art courses contribute greatly to the cultural development of the community through their interest and activity in the sphere of Fine Art; students and teachers are regular contributors to the various art exhibitions which are held from time to time. The Central Technical School, Toronto, offers instruction in pottery and metal work for students who are enrolled in the occupational therapy classes of the University of Toronto. As in the case of other departments of vocational schools, the Art departments also offer a wide variety of instruction in evening classes, and these classes are well attended.

All Art schools are prepared to render special services to students by providing part-time courses, if required, and to Art firms or associations by supplying expert information and advice on matters of research. At the conclusion of the war many ex-service students who had D.V.A. credits for educational training were admitted to vocational courses in Art.

## **RESEARCH PROGRAMME**

### **1 Home Economics**

The Home Economics teachers of the Province have been organized into nine regional groups for purposes of research. They meet during the year in an attempt to solve problems in Home Economics education. One study just completed and entitled, "The Place of Family Life in Home Economics Education," has been made available to all teachers interested.

### **2 Industrial**

The Technical Research Council has intensified its efforts in certain directions during the past year. Owing to the reduced grants available, however, regional sub-committees of this Council have been less active.

One of the principal functions of this Council is to prepare illustrative material for pupils' use which is too difficult for the local schools to produce. Two hundred and ninety thousand such sheets were purchased this year by the vocational schools of the Province.

Sixty new books were reviewed and added to those on the Technical Book Shelf located in the Legislative Library. Teachers may borrow these on application to the Librarian.

A new sub-committee on Audio-Visual Aids was established to assess any films, charts, and illustrative material available through industrial firms which would be of value to vocational teachers, and a very complete report was presented.

The Publicity Committee is widening its scope to make business, industry, and professional bodies aware of the aims and objectives of the schools, and to solicit the active support of these groups in shaping the educational programmes of the schools across the Province.

Two Refresher courses for Shopwork teachers were sponsored by this Council. Thirty men spent a week at a Balsam Lake Camp discussing modern methods of instruction, especially as applied to shopwork. A second group of woodwork teachers met at Kitchener and spent a week on plant visits and group discussion. The success of these courses resulted in requests for their repetition for other teachers next year.

## TEACHER TRAINING IN SERVICE

### A. Summer Courses

During the summer of 1948 Teacher-training courses were offered in the various vocational areas of Agriculture, Commercial Practice, Home Economics, Industrial Arts and Crafts, and as well for those aspiring to the principalship of Vocational and Composite Secondary Schools.

Summary			
Course	Part	Location	No. enrolled
Agriculture	Intermediate I	Agricultural College, Guelph, Ont.	14
	Intermediate II		20
	Specialist		29
	Inspectors		4
	Farm Mechanics (Aug. 6-19)		37
	Total	104	
Commercial	Regular course	Northern Vocational School, Toronto	88
	Refresher for Department Heads		27
	Business Machines:-		6
	Certificate Courses		
	Interim Elementary		13
	Interim Intermediate		22
	Interim Specialist		13
	Total	169	
Home Economics	Introductory	Northern Vocational School, Toronto	56
	Elementary C—Part II		35
	Refresher Courses:— (a) Pattern-making	Northern Vocational School, Toronto	15
	(b) Dressmaking		
	Elementary B—Part II	Ontario College of Education	13
	Total	119	
Industrial Arts and Crafts	Type B—Part I	Central Technical School Toronto	30
	Part II		17
	Type A—Part I	6	
	Part II	4	
	Part III	6	
	Specialist—Part I	13	
	Part II	37	
	Part III	17	
	Total	130	
Industrial	Int. Ord. Vocational	Ontario College of Education, Toronto	5
	Specialist Vocational		13
	Vocational Principals		19
	Total	37	
Grand Total			559

## **B. Other In-Service Courses**

In order to assist teachers in outlying districts, the Elementary, Type B, summer course in Industrial Arts and Crafts has been offered in Saturday classes during the school year. The location and enrolments of these courses are as follows: Timmins, 80; Port Arthur and Fort William, 60. This plan appears to be accepted enthusiastically by both the teachers and the Inspectors of the areas concerned.

## **TEACHER TRAINING, 1917-1946**

A summary is given below of the teacher-training programme which was developed to meet the needs of the expanding system of Vocational Education from 1917 to 1946. This record is presented in two main divisions, (1) the initial plan and progress of teacher training prior to the organization of the Ontario Training College for Technical Teachers, Hamilton, and (2) the contribution of this College to the development of Vocational Education in Ontario.

### **Evening Class Courses**

In the period from 1917 to 1919 inclusive, evening class instruction was available to teachers-in-service in Toronto, London, and Hamilton, at the respective Technical Schools.

The subjects of study included Principles of Education, Courses of Study, Lesson Plans and Practice Teaching. In all, 77 teachers received some training and education related to their needs.

The next stage in the development was reached when summer courses were introduced in 1921 and continued to and including 1924. These were conducted in the Central Technical School, Toronto. During this period, 470 teachers, including 286 women, were enrolled in courses with subject content based on the studies introduced in the former evening school courses. One innovation was the introduction in 1923 of a summer course for teachers of salesmanship.

### **Year Courses**

The Ontario Training College for Technical Teachers was opened in Hamilton in 1924, and the first group of 42 members was admitted in a junior and a senior class in the spring of 1925. The subjects of study included School Law, Science of Education, Observation, Practice Teaching, English, School Management, Vocational Guidance, and Special Methods. During the summer of 1925, it appears that 101 teachers were enrolled in classes preparing for examinations leading to certification.

Autumn, spring, and summer groups were admitted up until 1935 when for the first time in the history of vocational teacher training in Ontario what were known as Year Courses were established.

During the interval 1925-1935 the total number of teachers receiving training was 3,321. This number included those who were preparing themselves for positions as teachers of manual training and household science, as well as those preparing for the practical trades and related subjects in vocational schools. These subjects included sewing and dressmaking for women candidates. Of particular interest is the fact that the first course in Vocational Guidance in Ontario was organized at this College, beginning with Part I in the summer, 1930, and Part II in 1931. In the first Part, 25 teachers were enrolled and 18 continued with Part II.

An evidence of further adaptation of the facilities of the College to meet current needs was the introduction, beginning in 1932, of such related courses as drafting for machinists and machine shop practice for teachers of vocational mathematics.

The Vocational Guidance course was repeated in 1933 and 1934 with 13 and 22 candidates enrolled in Parts I and II respectively. In 1933 the first course leading to a Vocational School Principal's certificate was offered. This course was outlined in three parts consisting of two summer courses and an extramural assignment. The applicant for this course was required to submit a High School Principal's certificate and five years' successful teaching experience before being admitted to the course.

A Vocational Specialist's course was also introduced in 1934, which required at least two summer sessions and the completion of an extramural thesis. This certificate qualified shopwork instructors, men and women, to head departments in the larger schools.

From 1935 to 1948 the courses and enrolments are listed below in chart form. It should be noted that the Ontario Training College for Technical Teachers, organized in Hamilton, Ontario, was amalgamated with the Ontario College of Education, University of Toronto, in the fall of 1946. Under the new set-up it became known as the "Vocational Teacher-Training Department of the Ontario College of Education" with the organization and accommodation temporarily located in the Central Technical School, Toronto, the and administration centred in the Ontario College of Education.

## APPRENTICESHIP

Vocational schools have developed basic programmes of study which are modified, where necessary, from school to school to meet the needs of local industries. Where such industries have developed private apprenticeship systems, as is the case in most of the larger centres of population, many of them have established co-operative working arrangements with the vocational school authorities. These arrangements are designed to be of advantage both to the industry and to the apprentice.

A pamphlet entitled, "Apprenticeship in Canada, 1949," based on a survey made by the Federal Government, reveals that of twelve firms or companies reported as having private apprenticeship systems nine are designed with vocational education facilities in mind. Provision is made whereby preference in admission to apprenticeship is given to vocational pupils, time credit is given to apprentices for previous instruction at a vocational school, the use of the vocational school is obtained for part-time co-operative training courses, and the school authorities are consulted in the selection of suitable apprentices. The following firms are using vocational educational facilities in connection with their apprenticeship systems:

McKinnon Industries . . . . .	St. Catharines
Toronto Transportation Commission . . . . .	Toronto
Canadian Westinghouse . . . . .	Hamilton
Dominion Rubber Co. . . . .	Kitchener
Canadian General Electric . . . . .	Peterborough
International Harvester Co. . . . .	Hamilton
Canadian Kodak Co. . . . .	Toronto
General Motors of Canada . . . . .	Oshawa
Massey-Harris Co. . . . .	Toronto

In every city having a vocational school the solution of educational problems is sought on a co-operative basis and education has been developed which serves both industry and the student. Co-operation along these lines ensures a far more efficient system of production of goods and services.

## **CONCLUSION**

A study of the statistics relating to vocational education will reveal that in cities where vocational schools have been established, approximately 46% of the secondary school population is enrolled in these schools. In view of the relatively short space of time that this type of education has been in existence in Ontario, such an achievement affords ample evidence of the popularity of the courses and indicates a truly remarkable growth in a new field of educational endeavour.

L. S. BEATTIE

Director of Vocational Education.

A. M. MOON

Assistant Director of Vocational Education.

Toronto April 28, 1949.

## **3. PROVINCIAL TECHNICAL INSTITUTES**

### **PROVINCIAL INSTITUTE OF MINING, HAILEYBURY**

At the beginning of 1948, the enrolment at the Provincial Institute of Mining, Haileybury, consisted of 88 students. In May, a class of 43, many of whom were veterans, graduated. In September, the Institute re-opened with an enrolment of 28 students in the First Year and 28 students in the Second Year.

The demands for Mining Technicians continued and all graduates obtained positions—the majority in the Survey Offices of the Mines, Geological Departments, Assay Laboratories and Milling Plants.

### **THE PROVINCIAL INSTITUTE OF TEXTILES, HAMILTON**

In September, 1948, The Provincial Institute of Textiles reopened with an enrolment of 26 students—11 in the First Year, 14 in the Second Year and 1 Special student. In October, the Evening School reopened with an enrolment of 232 representing 43 textile firms located in Acton, Brantford, Dunnville, Galt, Hamilton, Hespeler, London, Milton, Paris, Preston, St. Catharines, Simcoe, Toronto and Welland.

To assist the Institute, the Textile Industry has contributed a sum of \$102,000.00, of which \$65,000.00 has now been spent on new equipment. In addition, a number of firms have donated items of new and used equipment, classroom supplies and scholarships or bursaries. The machinery manufacturers have extended discounts to the value of \$18,000.00.

The courses at the Institute cover the various phases of knitting, weaving, the cotton system, the woollen and worsted systems and textile dyeing and finishing.

### **LAKEHEAD TECHNICAL INSTITUTE, PORT ARTHUR**

The Lakehead Technical Institute commenced the First Year of the Technical Mining Course in January, 1948. In September of the same year, the course was extended to include the Second Year. In addition, the First Year of Technical Forestry, Arts and Applied Science on the First Year University level were offered. The co-operation of the Universities of the Provinces of Ontario and Manitoba was enlisted to accept students into the Second Year of equivalent courses. These requests were granted on a trial basis.

It is the intention of the Institute to continue under the present arrangements so long as the demand is supported by adequate enrolment and to offer technical or general courses as may be required and deemed advisable. In September, 1948, 50 students were enrolled in the various courses.

### **THE RYERSON INSTITUTE OF TECHNOLOGY, TORONTO**

The Ryerson Institute of Technology, formerly the Training and Re-establishment Institute, Toronto, was officially opened on September 22, 1948, as a Polytechnical type of institution offering tuition on the Junior College level. Its curriculum includes courses in Architectural Draughting, Business, Costume Design, Electronics, Food Technology, Furniture Arts, Graphic Arts, Mechanical and Industrial Technology, Jewellery Arts, Photography and Chemistry Technology. Its equipment, obtained through the co-operation of the Dominion Government during the rehabilitation period, is valued at more than \$1,500,000.00.

The initial day school enrolment consisted of 245 students, and 812 were registered in the Evening Classes.

In addition to offering courses of its own, the Ryerson Institute provided space for the training of apprenticeship classes operated under the auspices of the Apprenticeship Branch, Department of Labour. The Institute also provided, at the request of the Department of National Defence, facilities for the training of a number of groups of Army personnel. It also co-operated with the University of Toronto in giving instructions in certain crafts to students registered in Occupational Therapy Courses and in Food Technology to students registered in the Institutional Management Course.

H. H. KERR,

Director of Provincial Technical Institutes.

Toronto, September 8, 1949.

x67 technical teachers were training at the Ontario College for Technical Teachers during 1946-47; after June, 1947, technical teachers were trained at the Ontario College of Education.

### TEACHER SUPPLY

To meet the problem of shortage of teachers for elementary schools, the following steps have been taken:

- (1) In 1940 and thereafter applicants were regularly admitted to Normal School on eight of the required nine Upper School papers. 1742 have so entered during the past eight years.
- (2) In 1943 applicants were admitted on seven, and in 1944 on five Grade XIII papers on condition that if successful they would be granted Deferred First Class certificates until the additional Grade XIII papers had been completed. 1227 have so entered during the past six years.
- (3) In 1944 a First Year Normal School Summer Session of six weeks was established to which were admitted applicants holding at least full Middle School standing. 620 attended the London and Toronto centres of whom 572 were granted Deferred Second Class certificates valid for one year. 466 of these attended a Second Year Normal School Summer Session in 1945, of whom 449 were granted Interim Second Class certificates.
- (4) Beginning in 1947, emergency Normal School Summer Sessions have been held at Toronto and North Bay, for training candidates holding Middle School standing, and having at least five months' teaching experience on Letters of

Permission. The course requires two summer sessions, each of six weeks, and the candidates must teach for at least six months successfully in the school year intervening. Successful candidates receive a Deferred Interim Second Class certificate at the end of the first summer, and an Interim Second Class certificate at the end of the second summer. Attendance and results have been as follows:

	1947		1948			
	Attended First year	Granted Def. Int. II	Attended First Year	Granted Def. Int. II	Attended Second Year	Granted Int. II Class cert.
Toronto.....	217	200	178	162	186	176
North Bay.....	107	98	64	59	87	81

- (5) In September, 1949, applicants holding standing in five Grade XIII papers including one English paper will be regularly admitted to Normal School, and successful candidates will receive an Interim First Class certificate.
- (6) At the present time (February 2) 974 Letters of Permission have been issued to teachers for the school year 1948-49. Of these teachers 418 have had some professional training in the provincial educational systems of Canada. Last year on February 5th, 1082 Letters of Permission had been issued.
- The supply of teachers for secondary schools is practically meeting the demand, except in the fields of home economics and girls' physical and health education.

### MEDICAL EXAMINATION

All applicants to Training Schools are required to take a medical examination before they are finally accepted. In 1937, seventeen applicants were rejected; in 1938, twenty-seven; in 1939, twenty-six; in 1940, thirteen; in 1941, seventeen; in 1942, eight; in 1943, nine; in 1944, fifteen; in 1945, twelve; in 1946, eight; in 1947, eight; in 1948, eight. Applicants suffering from physical handicap of a less serious nature are permitted to enter on signing a Consent form waiving claim for disability pension under the Teachers' and Inspectors' Superannuation Act. In 1930-40, two teachers-in-training signed waivers; in 1940-41, seven; in 1941-42, thirty-eight; in 1942-23, forty-six; in 1943-44, forty; in 1944-45, sixty; in 1945-46, forty-three; in 1946-47, twenty-one; in 1947-48, twenty-five; in 1948-49, sixteen.

Cost of Medical Inspection	
Amount paid physicians for medical examinations—2004×\$4.00.....	\$8,016.00
Amount paid hospitals and radiologists for X-ray films.....	637.80
Amount paid consultants obtained by the Medical Board.....	1,222.50
Amount paid nurses re medical examinations.....	366.09
Refund of fees to students excluded by the Medical Board.....	12.00
	<hr/>
	\$10,254.39
Less fees paid by students.....	3,488.00
	<hr/>
	\$6,766.39

(Late registration fees were collected from some students. Other students who paid their fees in September required further examinations; no extra fees were charged. Students with military service were not required to pay a fee.)

The total cost of medical inspection was divided between:

Ontario Government.....	\$3,383.20
Teachers' and Inspectors' Superannuation Commission.....	3,383.19
	<hr/>
	\$6,766.39

## STAFF CHANGES

Dr. C. E. Mark, Principal of the London Normal School, retired on July 19, 1948. Born near Little Britain, Ontario, Dr. Mark received his early education in a rural school of Victoria County, and in Lindsay Collegiate Institute. An honour graduate in philosophy of Victoria College, University of Toronto, he later qualified for the degree of Doctor of Pedagogy at the same University. Taking his professional training at Lindsay Model School and the Faculty of Education, Toronto, he taught in both urban and rural schools before his appointment to the staff of the Ottawa Normal Model School, where he served as assistant and later as principal. Dr. Mark's interest and skill in the education of teachers soon brought about his transfer to the Normal School staff, first in Ottawa and then in Toronto. He was appointed principal of the London Normal School in 1931. During his seventeen years of service in that post, some three thousand student-teachers received the benefit of his scholarly teaching and wise direction.

In March, 1948, H. E. Elborn, M.A., B.Paed., Principal of the Toronto Normal School, was appointed Inspector of Professional Training Schools in the Department of Education. R. A. Johnston, B.A., B.Paed., was at the same time appointed Principal of the Toronto Normal School. Mr. Johnston is a graduate of the University of Western Ontario, in Arts, and of the University of Toronto in Pedagogy. His professional experience includes teaching in elementary, secondary, and normal Schools. He joined the staff of the Toronto Normal School in 1932, served as Inspector of Public Schools in York 6 on interchange in 1940-41, and acted for some months as Principal of the Ottawa Normal School.

F. C. Biehl, B.A., B.Paed., Master, Stratford Normal School, was appointed Principal of the London Normal School, effective September 1, 1948. Mr. Biehl joined the public service in September, 1939, coming to Stratford Normal School from the principalship of the Gibson Public School, Hamilton. From September, 1943, to August, 1944, he acted as Public School Inspector on interchange with G. H. Dobrindt of Waterloo No. 1. Mr. Biehl has served as Principal of the Primary Methods Summer course at Hamilton for several years.

J. R. M. Peat, B.A. B.Paed., formerly Inspector of Public Schools in District Division XI, Part I, became master on the staff of the Toronto Normal School on September 1, 1948. A graduate of the Ottawa Normal School, Mr. Peat taught in the public schools of Ottawa and Toronto, prior to service in the Canadian Army from 1942 to 1946. He was appointed Inspector of Public Schools, with headquarters at Timmins, in 1946.

R. H. Brayford, B.A., B.Paed., was appointed Master at the Hamilton Normal School, effective September 1, 1948. Holding a degree in Arts from the University of Western Ontario, and in Pedagogy from the University of Toronto, Mr. Brayford has had experience as a teacher in elementary and continuation schools. He entered the Public Service as Assistant Public School Inspector in Norfolk County, and assumed duties as Inspector of Public Schools in Renfrew South on September 1, 1947.

W. C. VanderBurgh, B.A., was appointed Master at the Stratford Normal School, effective September 1, 1948. Himself a graduate of Stratford Normal School, Mr. VanderBurgh qualified for an Arts degree at Queen's University, and has taught in both urban and rural schools. He served in the Canadian Army from 1942 to 1945, with rank of Captain. He was appointed Inspector of Public Schools for Prescott and Russell (No. 1) in September, 1946.

Miss Norma J. Timlin, B.A., was appointed Assistant Librarian in the Toronto Normal School effective September 1, 1948. Miss Timlin is an honour graduate of Queen's University in French and German, and took her professional training in

both teaching and librarianship at the Ontario College of Education. She taught on the staff of the Fergus High School for two years.

J. V. McIntyre ,B.A., B.Paed., Master at the Hamilton Normal School, was transferred on September 1, 1948, to the staff of the Toronto Normal School.

F. S. Rivers, B.A., B.Paed., Inspector of Professional Training Schools, was appointed Superintendent of Professional Training, in November, 1948, upon the retirement of Dr. H. E. Amoss.

Dr. H. E. Amoss

#### **DR. H. E. AMOSS**

Dr. Harry E. Amoss retired from the post of Superintendent of Professional Training in November, 1948, after twenty-nine years of service with the Department of Education. A graduate in Arts of Queen's University, and holding the degree of Doctor of Pedagogy from the University of Toronto, Dr. Amoss includes in his experience, service as teacher of elementary and secondary schools, principal of high schools at Port Rowan and Grimsby, master at the Hamilton Normal School, Inspector of Auxiliary Classes, Acting Superintendent of the Ontario School for the Deaf, and—from 1939 to 1948—Superintendent of Professional Training. During the First Great War he served with the Army overseas, and was wounded at Cambrai. He helped to organize and was a teacher at the Vimy Ridge University.

The author of text-books on the teaching of arithmetic and social studies, Dr. Amoss is co-author of a manual on the education of handicapped children. A performance test which he originated has proved highly useful in evaluating the learning ability of deaf children. Dr. Amoss has also published two volumes of poetry. As Director of the Professional Training branch, he played a large part

in a revision of the normal school course of study, in introducing a plan for continuous teaching in rural and urban schools, in arranging for the interchange of normal school staff members and inspectors of elementary schools, and in the organization of the Primary School Specialist course. As administrator, teacher, and author, Dr. Amoss has served education well. His former associates in the Department of Education join with his many other friends in wishing him happy leisure in the years ahead.

F. S. RIVERS

Superintendent of Professional Training.

Toronto, February 2, 1949.

# Schools Attended by French-Speaking Pupils

## Report 4

### TEACHERS IN TRAINING

In 1947-48 there were 155 teachers-in-training at the University of Ottawa Normal School, 20 of whom were enrolled in the First Class course and 135 in the Second Class course. As a result of the term and final examinations 18 students were awarded First Class certificates, and 128 obtained Second Class certificates.

### QUALIFICATIONS

The following table shows the number and percentage of Ontario French-speaking elementary school teachers holding First or Second Class certificates in November, 1948, and the progress made in this regard since 1929:—

	1929	1937	1938	1946	1947	1948
Total number of French-speaking teachers in Elementary Schools.....	1,087	1,281	1,316	1,615	1,653	1,678
Number of above teachers holding I or II Class certificates.....	273	1,018	1,135	1,377	1,412	1,456
Percentage of French-speaking teachers holding I or II Class certificates.....	25.11	79.46	86.24	85.29	85.42	86.77

The present enrolment of teachers-in-training in the University of Ottawa Normal School is still insufficient to meet the needs of elementary schools attended by French-speaking pupils. During the school year just closed, owing to the shortage of qualified applicants, some 150 teachers without Normal School training had to be engaged by school boards. There is reason to believe, however, in view of the ever larger number of students reaching the higher grades of the secondary schools and the increasing teachers' salaries, that this unfortunate situation will be corrected gradually within the next few years.

### SECONDARY SCHOOL CLASSES

In the following table are shown the enrolment totals of French-speaking students taking advanced French courses in the secondary schools of the provincial system for the period 1938-1948:

Year	Grade					Total
	IX	X	XI	XII	XIII	
938.....	327	182	155	143	32	839
939.....	392	235	203	130	67	1,027
940.....	440	310	172	132	48	1,102
941.....	584	336	178	119	32	1,249
942.....	531	336	189	101	30	1,187
943.....	516	312	205	114	22	1,169
944.....	644	384	215	142	33	1,418
945.....	712	429	272	150	39	1,602
946.....	744	402	285	184	30	1,645
947.....	696	437	275	170	25	1,603
948.....	890	422	314	198	24	1,848

It will be noted that the enrolment of French-speaking students in the public secondary schools of the Province has more than doubled in the period of eleven years.

The following table shows the number of French-speaking students enrolled in December, 1948, in the advanced French courses of Collegiate Institutes, High, Continuation, and Vocational Schools under the supervision of the Department of Education:—

SCHOOL	GRADE					
	IX	X	XI	XII	XIII	Total
Alexandria High. . . . .	52	39	24	10	4	129
Cornwall Collegiate and Vocational. . . . .	133	38	9	9	2	191
Embrun High. . . . .	46	23	24	12		105
Espanola Continuation. . . . .	9	4				13
Hawkesbury High (for Fr.-sp. pupils). . . . .	61	48	34	23		166
Hearst High. . . . .	10	5	3	3		21
Iroquois Falls High. . . . .	19	5	8	3	3	38
Kapuskasing High. . . . .	22	19	14	4		59
Kirkland Lake Collegiate and Vocational. . . . .	20	5	9	5		39
Lafontaine Continuation. . . . .	23	9	10	12		54
Mattawa High. . . . .	9	6	4	5		24
North Bay Collegiate and Vocational. . . . .	37					37
North Essex (Belle River) High. . . . .	32	9	11	6		58
Ottawa Lisgar Collegiate Institute. . . . .	7	5				12
Ottawa Technical. . . . .	76	38	40	23		177
Paincourt Continuation. . . . .	20	7	7	8		42
Penetanguishene High. . . . .	31	17	11	7		66
Plantagenet High. . . . .	26	24	17	9	3	79
Rockland High. . . . .	22	13	4	5		44
Smooth Rock Falls Continuation. . . . .	9	12	8	7		36
Sturgeon Falls High. . . . .	41	21	19	9		90
Sudbury High Mining and Technical. . . . .	70	41	44	24	5	184
Tilbury High. . . . .	18					18
Timmins High and Vocational. . . . .	84	24	10	13	6	137
Vankleek Hill Collegiate. . . . .	13	10	4	1	1	29
Totals. . . . .	890	422	314	198	24	1,848

Note:—The absence of students in the higher grades of some of the above schools is due to the fact that the advanced French courses were recently established in these schools.

The newly-established North Essex High School at Belle River was opened in September, 1948, with an advanced French enrolment of 58 students.

It should be added, in order to give a complete picture of the secondary school enrolment, that, besides the 1,848 students reported in the above table, there were 1,604 French-speaking pupils enrolled in the Grade IX and Grade X classes of elementary schools and 1,430 French-speaking students attending private secondary schools in Ontario. These schools are inspected by the Department of Education and may recommend their students who are candidates for the Grade XII certificates or the Secondary School Graduation Diploma.

## ELEMENTARY SCHOOLS

Tables in part II present a compilation of the French-speaking School inspectors' Annual Age-Grade Reports for the school year 1947-1948.

### GRADE-ENROLMENT OF PUPILS

The following comparative table, for the years 1938, 1946, 1947 and 1948, shows the marked progress which has been achieved, during the period under review, in the grade-enrolment distribution of French-speaking pupils in all elementary schools:—

# Separate and Public Schools

Grade	1938		1946		1947		1948	
	Number	Per cent	Number	Per cent	Number	Per cent	Number	Per cent
Kindergarten								
Primary					77	.16	129	.26
I.	11,216	23.66	7,882	16.46	7,613	15.89	7,884	16.27
II.	6,992	14.75	6,489	13.56	6,543	13.65	6,480	13.37
III.	4,974	10.49	6,341	13.25	6,481	13.52	6,406	13.22
IV.	5,548	11.71	6,003	12.54	6,087	12.70	6,101	12.59
V.	5,828	12.30	5,878	12.29	5,778	12.06	5,948	12.27

## ANNUAL CONTEST

### Elementary School Section

The finals of the eleventh annual provincial contest among the Grade VIII French-speaking pupils of Ontario were held in Ottawa on March 31st and April 1st, 1948.

Following modifications adopted in 1946, the candidates were divided into two categories: those from schools of one or two classrooms and those from schools of three or more classrooms.

After winning preliminary tests in their own schools and inspectorates, twenty-eight contestants—thirteen from the smaller schools and fifteen from schools of three classes or more—took part in this final competition. The four provincial winners, two from each category, who were awarded secondary school scholarships by L'Association canadienne-française d'Education d'Ontario, were as follows:

Schools of one or two classrooms:

- 1st boy: Roger Landriault, 14, R.C.S.S. 9, Alfred, Alfred;
- 1st girl: Jeanne d'Arc Champagne, 12, R.C.S.S. 3, MacPherson, Lavigne.

Schools of three or more classrooms:

- 1st boy: Nil Guillemette, 13, Jacques Cartier School, Timmins;
- 1st girl: Yvette Pleau, 13, Nolin School, Sudbury.

The grand award, a trophy donated by L'Association de l'Enseignement francais de l'Ontario to the contestant obtaining the highest marks in the Elementary School Section, went to Nil Guillemette, Jacques Cartier School, Timmins.

Secondary School Section

The sixth province-wide contest among the Grade XII and Grade XIII French-speaking students was held during the year. Preliminary contests were held in four regional centres and were followed by a final competition in Ottawa at the same time as the elementary school contest, on March 31st and April 1st, 1948. The two provincial winners, who were also awarded valuable scholarships by L'Association canadienne-française d'Education d'Ontario, were the following:

- Bernard Cayen, 17, Sudbury High School;
- Rachel Piché, 16, Timmins High School.

## CORRESPONDENCE COURSES

In June 1948, ended the sixth school year in which correspondence courses for French-speaking children of Ontario were given by the Department of Education. All the courses for pupils of Grade 1 to Grade VIII have been available since September, 1946.

The French-speaking enrolment during the school year 1948-49 was 342 pupils, divided as follows: Grade I, 99; Grade II, 56; Grade III, 54; Grade IV, 36; Grade V, 33; Grade VI, 27; Grade VII, 20; Grade VIII, 17.

The slight decrease in this total enrolment compared to that for 1947-48 was caused, no doubt, by the establishment in recent years of additional schools in many parts of the Province.

It is evident from the reports received that the correspondence school service is highly appreciated by the French-speaking population of Ontario.

ROBERT GAUTHIER,  
Director of French Instruction.

Toronto, July 15th, 1949.

# Agriculture Classes

## Report 5

### ELEMENTARY SCHOOLS

Reports on the teaching of Agriculture for the school year ending June 30, 1948 were received from 2,175 schools of which 371 were urban. Grants under the Regulations for instruction in Grades VII and VIII were paid to the Boards of 1,001 schools.

School gardens were reported in 590 schools. Improvement of rural school grounds was reported in 1,228 schools. During the past ten years the condition of rural school grounds has been greatly improved throughout the province.

School Fairs were held in many northern areas and in some areas in southern parts of the province. These are conducted under joint committees of teachers and trustees with the aid of the Agricultural Representative and the local Inspector.

The number of certificated teachers in schools reporting was 1,009, an increase of 36 over 1947. The Regulations now require that the teacher hold a certificate if the Board is to receive a special grant. Teachers may qualify by attendance at Summer School or because they studied Agricultural Science during four years of the High School Course.

It is worth noting that, in many schools from which reports on the teaching of Agriculture were not received, attention is actually given agricultural topics of the courses in Natural Science for Grades IV, V and VI and in Science of Grades VII and VIII.

### SECONDARY SCHOOLS

Instruction in Agriculture is given in Secondary Schools,

- (1) in the courses in Agricultural Science which are optional with General Science in Grades IX, X, XI and XII, and
- (2) in courses in Agriculture which are taken in schools which have adopted the programme under the Regulations for Departments of Agriculture. The essential feature of this programme is a two-year general course through Grades IX and X in which the boys take Agriculture and Shop Work and the girls spend an equivalent time on Home Economics. Commercial subjects are optional with the languages in Grade X. Agriculture may also be taken as an option by pupils of Grades XI and XII. In addition, provision is made for visits to homes of pupils during the summer months by the principal and agriculture teacher, for the serving of a hot dish at noon hour, and for the use of the school as a community centre. The revised programme was initiated in the summer of 1944 and the number of schools now in operation has increased from 12 to 60. Seven of these schools now have classes in Agriculture in Grades XI and XII. The attendance at the "Open Night" or "Achievement Day" held each year in these schools has been large. Parents and others are agreeably surprised at the displays in the different subjects and the activities carried on by the pupils. The garden areas include crop-rotation plots, experimental plots, vegetable plots, plant-propagation plots, fruit and perennial vegetable area, perennial border and nursery plots. The area of most gardens ranges from 2,400 to 10,000 square feet but in one school an area of 2 acres is used.

Two objectives in schools with Departments of Agriculture are being realized

- (1) The period of school attendance of the pupils is extended because of the interest aroused by the more intensive activity programme in Grades IX and X
- (2) A high standard of success in Upper School examinations is maintained in schools which operate this programme.

A survey covering the forty-two schools taking the Department of Agriculture programme during the school years 1944-5, 1945-6, 1946-7, shows that for the period 1944-5 to 1947-8, the number of pupils enrolled in Grade X on October 1st averaged above 80 per cent of those in Grade IX the previous year and that, in 73.1 per cent of the schools, the results in Upper School examinations were above the provincial average.

The following tables give information concerning the number of schools and other particulars.

### Schools taking Agricultural Science

	Total	Increase	Decrease
Collegiate Institutes.....	29	0	0
High Schools.....	103	6	0
Continuation Schools.....	47	2	3 (2 included in new Districts)
	<hr/> 179	<hr/> 8	<hr/> 3

**Departments of Agriculture** are in operation in 58 of the above schools under General Regulations and in 2 schools, Belleville and Chatham, under Vocational Regulations, making a total of 60.

Agricultural Science is taken in Grades IX and X in 45 schools and in Grades IX, X, XI, and XII in 134 schools.

Special grading grants to Boards are provided under the Regulations for Agricultural Science and Departments of Agriculture. Approved expenditures for equipment and other purposes are included under "cost of operation."

### Qualifications and Number of Teachers

Holding Specialist Certificates....	160
O.A.C. Graduates included above.....	111
Holding Intermediate Certificates.	116
Granted permission.....	<hr/> 10
Total	286

### PRACTICAL EXPERIENCE

There are now twenty-one schools with special Agricultural classrooms. Practice at schools is provided in gardening and experimental plots in 147 schools; in care of poultry during the winter and raising chicks in the spring in 53 schools; in beekeeping at 47 schools; in greenhouse practice at 2 schools. Buildings for agricultural purposes have been built at Blenheim and Palmerston. In addition, provision is made for supervising home projects of an economic nature by the teacher during the summer months. These projects include activities in calf clubs, poultry clubs, home garden clubs, swine clubs, grain clubs and similar practical farming operations, which in several areas are carried on jointly by the teacher of Agriculture and the Agricultural Representative. Over 4,000 pupils from 32 schools attended the Royal Winter Fair in November.

### TEACHER SUPPLY

The number of teachers has increased to 286 as compared with 261 last year and 6 fewer permits were issued this year. There is still a shortage of

teachers to meet the requirements of new High School District schools which will be introducing Departments of Agriculture when new buildings are completed. The need for additional teachers is being met by Ontario Agricultural College graduates and by Science teachers who attend the Summer Courses in Agriculture.

## **SUPERVISION**

The inspection of a large number of schools with Agricultural Science and of the 60 schools with Departments of Agriculture under General Regulations is divided between the undersigned and Mr. E. R. McClellan in company with another inspector. Mr. A. L. Lakie inspects Agricultural Science in the schools which he visits. Inspection of Agricultural Departments in the two Vocational Schools is the responsibility of the undersigned.

Agricultural Science was taught during the year in the Secondary Schools listed below. Under (a) are schools in which Lower School courses only are taken, and under (b) both Lower and Middle School courses. Schools in which Departments of Agriculture have been established have (D) after the name.

### **Collegiate Institutes**

(a) Brockville, Collingwood, Cornwall, Ingersoll, Oshawa, Owen Sound, Perth, Runnymede, Stratford, York Memorial. Total 10.

(b) Barrie, Belleville, Clinton (D), East York, Fort William, Goderich (D), Kitchener, Lindsay, Napanee (D), Orillia, Picton (D), Port Arthur, Renfrew (D), St. Mary's (D), Scarborough, Smith's Falls (D), Stamford (D), Strathroy (D), Woodstock. Total 19.

*\*Introduced Agricultural Science in September, 1948*

## **SUMMER COURSES**

Permits to teach Agricultural Science were granted to 10 teachers of Science for the school year 1948-49. A number of teachers completed their standing at the Summer Courses in 1948. Enrolment was—Intermediate I—14, Intermediate II—20, Inspectors—4, Specialist—29 and Farm Mechanics—37. Total—104.

The courses for the Elementary Certificate were not given.

## **NORMAL SCHOOLS**

Instruction in Agriculture is a part of the regular course at Normal Schools. The instructors are capable and a good course is given as far as the time allotment on the Normal programme will allow. Normal School students who have taken four years of Agricultural Science during the High School course are eligible for the Interim Elementary Certificate on completion of the Normal School course. Others must attend Summer Courses to secure the certificate. All Normal Schools were visited by the Inspector of Agricultural Classes during the year.

NORMAN DAVIES,

Inspector of Agricultural Classes

Toronto, July 28, 1949.

# Auxiliary Classes

## Report 6

Auxiliary Education is a term which describes day-school services to handicapped and exceptional pupils from age three to age twenty-one. Deaf children three years of age are admitted to the Nursery Class for the Deaf in King Edward School in Toronto. Sixty-four Speech Correctionists give part-time or full-time service to pupils with speech or hearing defects from the age of school entrance to the school graduation. Similar services are performed by special teachers for children who are homebound, crippled or hospitalized. Beginning at about eight years of age, classes are provided for pupils who have visual defects or who, for any reason whatsoever, are unable to take proper advantage of the regular school courses. These pupils may be backward or may be retarded in one subject only. Sight saving materials are procurable for pupils in Grades 1-10 inclusive. In the Sanatorium Classes, patients may be taking work at any school level between Grades I and XIII; or pursuing a commercial or vocational course; or taking correspondence courses at university levels. The Crippled student may secure instruction through services provided directly by the Department of Education or sponsored by the Department of Education through grants to local school boards. In the case of several homebound cripples, the Department of Education through the Auxiliary Education Branch has supervised their education by itinerant teachers and has provided habilitation training by which they have become partially or wholly self-supporting.

## DEVELOPMENT

These educational services have been supported by the Ontario Department of Education since the Auxiliary Classes Act was passed in 1914. In this thirty-five year period, Auxiliary Education has developed to the point where there are 512 special classes located in the cities and towns of Ontario; and approximately 2,000 opportunity, sight saving, speech correction and orthopaedic units are located in the smaller cities, towns, villages and rural sections. This means that approximately 500 full-time teachers and at least 1,500 part-time teachers are joined with the officials in the Auxiliary Education Branch in serving the special needs of seriously handicapped pupils.

With this increase in quantity, there has been a corresponding increase in complexity, possibly owing to the wide range of educational levels involved. During the year 1948, the following interesting and different manifestations have been noted:—

(1) New demands in Auxiliary Education:—

- (a) Requests for surveys of the educational needs of cerebral palsied children;
- (b) Requests for a school programme of education for children who have very limited learning capacities;
- (c) Requests for hearing aids for hard-of-hearing children in areas where the number is insufficient to organize a special class.

(2) New developments in Auxiliary Education:—

- (a) The successful completion of the first year of operation of Nursery Classes for the infant deaf in Toronto;

- (b) The unusual success attendant upon 13 months of teaching limited learners in the Kirkland Lake experiment;
- (c) The regularizing of the clinical services carried out by members of the Auxiliary Education Summer School Staff by the establishment of an educational clinic;
- (d) The extension of special education into the secondary schools;
- (e) The organization of a Child Guidance Clinic in the Toronto Public School System;
- (f) The employment of the first physio-therapist in an Orthopaedic Day School;
- (g) The appointment of an additional inspector of auxiliary classes.

Within the above-mentioned growth in complexity of problems and in numbers of special classes, three of fourteen different types of special services are in greatest demand. In Ontario, there are now sixty-four day school teachers who devote all or part-time to speech correction and lip reading. This is three times the number employed ten years ago. All teachers of opportunity and handicraft day classes are remedial teachers, but in the last five years, there has been an increasing demand for teachers of remedial reading. This is probably the result of the war-proven need for a higher general ability in reading. Twenty-two day school teachers are now employed in Remedial Opportunity Classes where the pupils are attached to a regular grade class for instruction, except for a period daily in remedial reading. In the smaller school systems, there is a distinct tendency towards the organization of Partial Opportunity and Remedial Classes.

Sufficient data have been set forth to show the problems of the auxiliary class inspectors, and to indicate the need for the employment of inspectors who are specialists in speech training and lip reading, or reading and other school subjects, or instruction of the crippled, homebound and hospitalized, or in methods of training backward children. A few selected topics have been chosen for presentation in some detail.

## ASSISTANCE

Owing to the extension of Auxiliary Education, Mr. R. G. Kendall, B.A., Assistant Inspector in Welland County, was promoted to the status of Public School Inspector and loaned to the Auxiliary Education Branch in September, 1948. Mr. Kendall's previous experience included teaching in the East York Public Schools, the Toronto Normal Model School, and the R.C.A.F. in which he held the rank of Wing Commander in charge of Educational Services overseas.

His wide experience in teaching, educational administration, and personnel selection has proved to be most valuable to the Auxiliary Education Branch of the Elementary Division of the Department of Education. His services will be used to meet the increasing number of requests for educational diagnostic work and to increase the number of classes inspected annually.

## SURVEYS

### URBAN SURVEYS

From data obtained in previous surveys, the annual surveys conducted by the local teaching staffs and surveys conducted in the current year by officials of the Department of Education, the following new classes were opened:

- (a) Tutorial and Remedial Opportunity Classes—(14).  
Bracebridge 1, Toronto 10, Swansea 1, York township 1, Weston 1.
- (b) Speech Correction and Lip Reading Classes—(2)  
London 1, St. Catharines 1.

- (c) Home Instruction—(1) Kingston 1.
- (d) Partial Opportunity Classes (7)  
Kitchener 6, Etobicoke 1.
- (e) Handicraft Classes—(1) Toronto 1.
- (f) Opportunity Classes—(4)  
Leaside 1, Scarborough 1, Timmins Sep. 1, Sudbury Sep. 1.
- (g) Orthopaedic—(1) Toronto 1.
- (h) Hard-of-Hearing—(1) Ottawa 1.
- (i) Sanatorium—(3)  
Muskoka 1, Freeport 1, Brantford 1.
- (j) Secondary School Handicraft—(1) Fort Frances 1.

#### CEREBRAL PALSY SURVEY OF WINDSOR AND AREA

In response to the request of the Windsor Boards of Education and Health for a survey of Cerebral Palsied (Spastic) Children, seventy-five children and adults were examined by the Auxiliary Education Inspection Staff with the assistance of Miss Marion Francis, B.A., Supervisor of Special Classes in Windsor, Miss Patricia Kelly, Reg. N., Staff Nurse of the Ontario Society For Crippled Children, and the therapists in The Red Cross Curative Workshop. Every assistance was also given by the officials of the Windsor Boards of Education and Health and the officers of the Windsor Cerebral Palsy Association.

The Director of the Health Unit, Dr. Howie, had arranged for a complete medical examination of most of the children. In many cases, hospital reports were available. Information from the parents provided an individual development history of each case. Psychological, social maturity, motor proficiency, speech and audiometric tests were administered. A record file was made for each person and after a study of the assembled information, it was recommended that

- (a) regular provision is needed for speech, occupational and physical therapy for 14 pre-school pupils and 9 pupils attending school;
- (b) some educational provision should be made for 3 school age children;
- (c) habilitation training should be attempted for 4 adolescents and adults;
- (d) 15 pupils should continue in school, but be given treatment and observation from time to time in a curative workshop.

Prior to 1942, the needs of cerebral palsied children were not as well known as those of the victims of poliomyelitis. In Ontario at this time, there was a reduction in the number of persons suffering from the most severe crippling effects of poliomyelitis and more attention was paid to the problem of educating the cerebral palsied.

An examination of the medical and school treatment of pupils in the United Kingdom and the United States shows that the cerebral palsied child responds to pre-school training begun at the earliest possible age and learns

- (a) to speak more acceptably if trained by Speech Therapists;
- (b) to walk when given adequate physio-therapy where previously he had been bed-ridden or immobile;
- (c) to use his hands if suitable occupational therapy were employed.

#### RURAL SURVEYS

At the request and with the assistance of the inspectors named in the table of Surveys of Inspectorates, the Auxiliary Education Inspection Staff examined 962 pupils. Individual and group intelligence and achievement tests were administered. Other school tests to determine educational handicaps of hearing, speech and vision at reading distance were also given. On the basis of the information derived advisements were prepared and forwarded to the schools concerned for each pupil to indicate teaching materials and methods useful in readjusting these children to school work.

### SECONDARY SCHOOLS

In 1942, the Brockville Collegiate and Vocational School initiated with departmental approval, the practice of admitting to a specially arranged course, pupils who were 15 years of age and had failed on the entrance examination.

In 1946, the Central Technical School, Toronto, admitted 66 pupils from the Academic Vocational Classes where they had been taking re-adjustment training for two years. After one year's experience with adjusted courses chosen from the Grade 9 courses of study, the plan was changed by employing a teacher trained in Auxiliary Education, and by providing for academic work at each individual pupil's achievement level. The first result of this change was to increase the percentage of pupils who stayed beyond the first half year from 22.7 per cent to 77.2 percent of the enrolment.

In 1948, the Fort Frances High School Board received permission to open a Grade 9 class for pupils who had failed on the High School Entrance examination who were 15 years of age. A teacher trained in Auxiliary Education was employed to take charge of the class. A course of study was prepared providing for the continuance of each pupil's education at his individual rate from his achievement level. Grade 10 Typing was given to the whole class. One period of Shop Training was allowed for the class as a unit. In addition, the class was broken up into groups which were attached to other Grade 9 classes for their regular shop period and for Physical and Health Education.

At the middle of the school year, out of a class of 21 pupils, only one had been struck off the roll and this was because his family moved from Fort Frances to take up residence in another town.

The group was taught as a unit for 18 periods and for 27 periods was divided into teaching groups, either in their own classroom or as groups attached to other classes. The success of the Fort Frances class, in the light of previous experience, indicates that the provisions which contribute to the success of a class for slow-learning adolescents are:—

- (1) a teacher trained in remedial methods and sensitive to the educational and social needs of adolescents;
- (2) a course of study by which learning materials by subjects at each pupil's individual achievement levels are indicated;
- (3) a time-table by which the pupils are included in other classes for instruction in Shopwork, Typing and Physical Education;
- (4) teachers of Shopwork, Typing and Physical Education who are sympathetic and aware of the special learning problems of these pupils;

- (5) learning materials freely available for work in English and Mathematics at levels from Grade 5 to Grade 9 inclusive.

## EDUCATIONAL CLINIC

In 1948 an Educational Clinic was set up for five weeks as an adjunct of the Auxiliary Education Summer Courses. Dr. A. H. Wingfield, Psychologist to the Hamilton Board of Education was given charge. He had as consultants on call, the instructors in speech correction, lip reading, sight saving, home instruction, intelligence testing and remedial reading. Twenty-nine children and their parents or guardians attended and for these the clinic supplied educational guidance to the schools concerned.

Preliminary reports of the work of this clinic show that it has been particularly valuable to the schools which do not employ speech correction or remedial reading teachers. The parents of the children examined in the clinic were particularly appreciative of the opportunity to discuss specific educational handicaps with teachers who are familiar and expert with these problems. Each of the teachers employed in the educational clinic had taken post-graduate training in one of the following colleges: Columbia, Manchester, Pennsylvania, Temple, Toronto and Wayne Universities.

Pupils were accepted for admission to the clinic from Dufferin, Grey, Huron, Ontario, Peel, Simcoe, Victoria, Wellington, Wentworth and York counties. The classification into types of handicap was as follows:

Speech Defectives.....	6
Hearing Defectives.....	4
Retarded Readers.....	8
Slow Learners.....	3
Limited Learners.....	5
Cripples.....	1
Blind—Deaf.....	1
Emotionally Maladjusted.....	1

Total.... 29

Appreciation is hereby expressed for the assistance of the inspector concerned, in selecting the children, conferring with the parents and particularly in promoting the idea that the clinic was a service and not an experiment.

## TEACHER TRAINING

The Summer Course as a means of preparing teachers for teaching academically and physically handicapped pupils has been used in Ontario since 1918. In the current year, 122 teachers enrolled in the several Auxiliary Education Summer Courses in the numbers indicated below:

### Elementary Certificates

Type I —For Teachers of Opp. and Hand. Classes.....	45
Type II —For Teachers of S.C. and L.R. Classes.....	8
Type III—For Teachers of Rem. Teaching Classes.....	15

### Intermediate Certificates

Type I —For Teachers of Opp. and Hand. Classes.....	23
Type II —For Teachers of S.C. and L.R. Classes.....	11
Type III—For Teachers of Rem. Teaching Classes.....	9
Type V—For Teachers of Hospital and Home Instruction Classes.	3

**Refresher Course in Crafts.....** 8

Total.....122

In-service training of special class teachers is carried on by teachers' organizations which hold monthly meetings in Central Ontario, Hamilton, London, Ottawa, Sault Ste. Marie, Toronto, the Yorks, and Windsor. The Sanatorium teachers although widely separated also have an organization which meets annually. The Special Class Teacher's Section of the O.E.A. meets in the Easter holiday and is the provincial organization which the local organizations support for the consideration of affairs affecting each of the local groups. This provincial group finances and publishes the only Canadian Magazine devoted to Special Education, The Special Class Teacher.

Various groups of Special Class Teachers are affiliated with the International Council for Exceptional Children by the organization of chapters in Hamilton, London, Ottawa, Sault Ste. Marie, Toronto and Windsor. In some places, the membership and officers of the I.C.E.C. and the local organization are the same teachers. Interest in the I.C.E.C. appears to be growing. This is shown by the increase in the numbers of subscribers to the Journal of Exceptional Children which prints articles contributed by leaders in the special education field, principally from the United States, the United Kingdom, the Union of South Africa, Canada and Mexico.

The annual convention of the I.C.E.C. at Des Moines, Iowa, showed attendance of twenty-five trustees, teachers, supervisors and inspectors from three Canadian provinces.

C. E. STOTHERS

Inspector of Auxiliary Classes

Toronto August 15, 1949.

Statistical data relative to this report may be found in Part II.

# School Attendance

## Report 7

For the school year 1947-48 the total enrolment in all schools of the provincial system, exclusive of night school classes, was 690,612. This represents a net increase of 12,510. The elementary schools showed an increase of 14,259, but the secondary school enrolment is less than it was in 1946-47. It is not always possible to assign a definite cause to fluctuations in the school population, but it may be that this decrease is a reflection of economic conditions fourteen to eighteen years ago. The relatively greater decrease in the enrolment in continuation schools may definitely be attributed to the closing of many of these smaller schools and the transfer of pupils to the larger and better equipped schools of the new high school districts. The decrease shown in Table 2 in the number of public schools may be similarly explained by the formation of Township Areas and the transportation of pupils to larger centres.

Table No. 1—Enrolment

	1945-46	1946-47	1947-48	Increase or Decrease
Public Schools . . . . .	436,709	441,393	453,116	11,723 I.

		100.00	100.00	100.00	100.00
Total days lost.....	7,357,269	8,940,898	8,150,784	8,037,372	7,357,269
The above losses are classified:					
Lawful.....		6,640,668	5,397,077	6,285,692	5,986,022
Unlawful.....		2,300,230	2,753,707	1,751,680	1,371,247
Percentage Attendance.....		91.0	92.0	92.1	93.3

Table No. 9—Summary of Attendance Officers' Reports

	1944	1945	1946	1947
School children's employment certificates issued . . . . .	1,157	648	490	345
Home permits issued . . . . .	1,874	1,661	1,432	1,510
Employment certificates issued . . . . .	11,911	7,180	5,905	6,232
Cases brought before magistrates . . . . .	1,085	965	528	478

The above summary is based on calendar years. The number of certificates issued is not an indication that this number of pupils left school permanently, since many of the certificates were for short periods only. School Children's Certificates, issued in exceptional circumstances to children under 14 years of age, cover not more than six weeks in a term. Home Permits similarly are for short periods, and the holders subsequently return to school. The number of Employment Certificates is greater than the number of pupils involved, since a certificate is required for each change of employment.

Table No. 10—Secondary Schools

Schools	Number of Schools	Number of Teachers	Enrolment		Percentage Attendance	
			1946-47	1947-48	1946-47	1947-48
High Schools and Collegiate Institutes . . . . .	239	3,665	85,593	87,733	94.0	95.0
Continuation Schools . . . . .	137	415	8,750	6,234	93.0	95.0
Vocational and Special In- dustrial Schools—Day . . . . .	43	1,635	33,489	32,116	94.0	94.0
Night . . . . .	43	1,541	42,892	48,351		
Totals . . . . .		7,256	170,724	174,434		

A percentage attendance of 93.3% for all elementary schools and of 94.8% for secondary schools must be regarded as very satisfactory.

R. D. KEEFE

Director of School Attendance

Toronto, January 15, 1949.

# Departmental Examinations

## Report 8

The Departmental Examinations Branch has as its main function the supervising of the various Departmental examinations, the recording of standing, and the issuing of certificates. In addition, the Branch engages in many activities which tend to facilitate the instructional work of the schools.

### DEPARTMENTAL EXAMINATIONS

The untiring efforts of the regular and casual staff and the excellent co-operation of the Examiners-in-Chief and Associate Examiners resulted in the release of the Grade XIII Departmental certificates just one day later than the 1947 record date of August 8th. This date appears to be satisfactory since sufficient time is available for submission of applications for admission to universities and Normal Schools, although acceptance of appeals up to October 1st results in delays in individual cases.

Statistics showing the results of the High School Entrance, the Grade XIII, and the Normal School examinations as well as the number of Intermediate Certificates, Secondary School Graduation Diplomas, and Secondary School Honour Graduation Diplomas issued, will be found in another part of this Report.

### STUDIES OF PROBLEMS

The decrease in the amount of work occasioned by war conditions made possible the investigation of several problems relating to the examinations. A study of the marks lost because of spelling errors in Grade XIII English Composition and English Literature papers resulted in the lowering of the maximum penalty from 10 to 5 marks in each of these papers for 1949. Statistics showing the amount by which each teacher had over-estimated or under-estimated the proficiency of his class were prepared for the first time and sent to principals for comparison with provincial "over and unders."

From time to time the question has arisen whether steps should be taken to debar from the Grade XIII Departmental examinations those students whose work during the year has been decidedly unsatisfactory. It was felt that such candidates added unnecessarily to the time and expense of marking papers and also tended to lower unduly the percentage of passes. The performance of candidates on papers with a teacher's recommended mark of below 30 was examined. Only 2.8% of the 84,610 papers written in 1948 were in this category. Of the 2,445 papers concerned, 390 papers, or 15.9% were passed. These findings indicate that the situation is probably not as serious as had been supposed.

### STUDENT-AID

The Branch co-operates with the Committees-of-Award in the administration of various types of Student Aid, several of which are mentioned below.

#### (a) Dominion-Provincial Student-Aid Bursaries

Dominion-Provincial Student-Aid is a relatively new subject in the field of education in Ontario. When the first Scholarships were established in 1943, many

awards lapsed for the want of suitable applicants. However, in the past few years this situation has improved and principals are bringing to the attention of students the benefits available under the programme. Principals and students alike are also becoming better informed as to the purpose of the awards. This purpose is to assist students of adequate ability who are financially unable to continue their education. Student-Aid Scholarships and Bursaries, therefore, differ from the awards administered by the Universities by reason of the fact that financial need is the factor given the greatest weight in determining who should benefit from the awards.

The following summary shows the total number and amount of awards for each academic year since 1943, including the amount recovered from the Dominion government each year and a detailed statement for the academic year 1947-1948:

Academic Year	Class	Value of Awards*		Number Awarded	Total Amount Awarded	Recovered from Dominion Gov't.
		Resident	Non-Resident			
1943-1944	—	—	—	192	\$45,950.00	No agreement
1944-1945	—	—	—	566	\$134,448.00	\$31,974.00
1945-1946	—	—	—	632	\$137,415.00	\$30,982.50
1946-1947	—	—	—	751	\$161,670.00	\$50,000.00
1947-1948	Scholarships:					
	University	\$200.00	\$400.00	158	\$56,800.00	
	Normal School	175.00	250.00	80	19,100.00	
	Grade XIII	100.00	100.00	185	18,450.00	
	Grade XII (Voc.)	100.00	100.00	48	4,800.00	
	Bursaries:					
	University	\$200.00†	\$400.00†	430	\$90,250.00	
	Ont. Coll. of Art	150.00	300.00	3	750.00	
	Ont. Coll. of Education	150.00	300.00	17	2,850.00	
	Normal School	125.00	200.00	46	6,635.00	
	Prov. Technical Institutes	125.00	200.00	1	125.00	
				968	\$199,760.00	\$50,000.00

\*In these two columns the value of Scholarships is the actual value of the award; in the case of Bursaries, the value is the maximum amount available.

†In the case of the Ontario College of Pharmacy, the maximum values are \$150.00 and \$300.00 respectively.

## (b) Transportation Assistance for Persons Residing in the Territorial Districts

The Department of Education provides transportation assistance for persons who reside in the territorial districts and are enrolled for full-time attendance in a course at an eligible institution. The amount of the special return student coach-fare from the railway station nearest the applicant's residence to the eligible institution, less the sum of \$10, is paid to the student after an application, certified by the Registrar of the institution as to attendance, has been received by the Department of Education.

In 1948 the following numbers of students received transportation assistance:

Number residing west of Sudbury.....	289
Number residing east of Sudbury.....	409

Total.....	698
------------	-----

The institutions attended by these students were as follows:

University of Toronto.....	316
Queen's University.....	212
University of Western Ontario.....	84
McMaster University.....	8
University of Ottawa.....	25
Sacred Heart College, Sudbury.....	15
Ontario Agricultural College.....	25
Ontario Veterinary College.....	2
Ontario College of Art.....	6
Ontario College of Education.....	3
Carleton College.....	2
<hr/>	
Total.....	698

Of the 698 students assisted, 174 were in first year, 210 in second year, 183 in third year, 127 in fourth year, 2 in fifth year and 2 in sixth year work.

The total amount paid in transportation assistance for the fiscal year 1948-1949 was \$13,291.55.

### (c) Scholarships for Post-Graduate Study in France

The Department of Education Act provides for the payment out of the Consolidated Revenue Fund annually of the sum of \$6,000 to be awarded by the Minister of Education in scholarships to residents of Ontario for the purpose of enabling them to pursue courses of study in France.

The holders of these scholarships for the school year 1948-49 are the following:

Miss Catherine R. Liddy, North Toronto Collegiate Institute  
 Miss Mary W. Coughlin, F. R. Close Technical School, Hamilton  
 Miss Dorothy A. Kidd, Port Arthur Collegiate Institute  
 Miss Helen M. Gilmour, Kingsville High School.

### (d) Miscellaneous Scholarships

Over the years a number of public-spirited citizens have shown their interest in education in a very worthwhile manner by making bequests to the Ontario government for the purpose of establishing scholarships. These scholarships are administered by this Branch and are awarded on the basis of the marks obtained at the Grade XIII Departmental examinations, under terms mutually agreed upon by the donor, the Minister of Education and the Provincial Treasurer. The following is a list of the awards:

The Carter Scholarships  
 The J. R. Cooke Scholarship for the Stirling High School  
 The Sidney Acker Memorial Scholarship  
 The Dr. James T. MacBride Scholarship  
 (Principal sum not deposited with Provincial Treasurer)  
 The Jacob Goldblatt Memorial Scholarship.

### (e) The O.E.A. Elementary Teachers' Loan Fund

The O.E.A. Elementary Teachers' Loan Fund was established some years ago by the Urban Teachers' Section of the Public School Department of the Ontario Educational Association. Loans are available to graduates of Ontario Secondary Schools who wish to enter any one of seven of the eight Normal Schools. The Fund, which is on deposit with the Provincial Treasurer, is administered by this Branch under the direction of the Committee.

## SUMMER COURSES

Under the direction of the Chief Director and the Deputy Minister, Summer Course policy is determined by the Committee of Superintendents, but the actual administration of the courses is a function of this Branch.

Preparing the General Announcement and the application form, notifying staff appointees, securing accommodations, checking applications and issuing letters of admission, requisitioning of supplies, preparing report forms and issuing of certificates occupies much of the time of several clerks for five months during each year.

The enrolment in Departmental Summer Courses for 1948 was 3,051, compared with 3,164 in 1947.

## INTERCHANGE OF TEACHERS

The Registrar, who acts as Interchange Officer for Ontario teachers, is assisted in making exchange arrangements by the Secretary of the League of the Empire, London, England, and by the Secretary of the Canadian Education Association.

The following exchanges were arranged for the school year 1948-49:

	Men	Women	Total
With the British Isles			
Elementary School Teachers.....	3	13	16
Secondary School Teachers.....	1	1	2
With South Africa			
Elementary School Teachers.....	—	2	2
With Other Provinces			
Elementary School Teachers.....	—	4	4
Secondary School Teachers.....	3	1	4
		—	28

## MISCELLANEOUS DUTIES

The preparation of the Blue Book "Schools and Teachers" is a major activity of the Branch during the fall months as is the preparation of the lists from which Associate Examiners are selected in rotation for the marking of the Grade XIII examination papers.

Partial re-organization of duties within the Department has placed the supervision of the stock-room under the Registrar. Considerable progress has been made in the clearing out of obsolete material and in improving storage facilities and inventories.

The provision of additional assistance in the Branch has made it possible to gather into one vault copies of all available publications of the Department subsequent to 1846. Plans have been made to keep the files up to date.

Mimeographing of circulars and lesson helps and the sending out of all general mailings represent another service which the Branch renders to the schools.

I wish to express my appreciation of the fine co-operation which the Departmental Examinations Branch receives from the other Branches, with all of whom it has many contacts during the year.

C. A. BROWN,  
Registrar.

Toronto, September 28, 1949.

# Art

## Report 9

### TEACHERS' HANDBOOK

After preliminary experimentation a new handbook in art education has been published by the Department of Education. During the school year 1944-45 eight bulletins dealing with art and crafts in general education were prepared by the Art Branch and sent to some 1,500 schools throughout the Province. The teachers in these schools were asked to make use of the bulletins in their classrooms, and at the close of the school year to report to the Department their opinions of them. As a result many helpful suggestions for improvement of the publications were offered. After revision the eight bulletins were tested in another 1,500 schools. Again the teachers reported upon them. This procedure was repeated until teachers were almost unanimous in their approval of the revised publication.

The new handbook is based upon the bulletins. Issued under the title **ART AND CRAFTS IN THE SCHOOLS OF ONTARIO**, some 20,000 copies have been distributed to teachers in elementary and secondary schools. The book is illustrated in colour and in half-tone. The five chapters discuss trends in art education, the picture-making programme, design in picture-making, the craft programme, group activities and appraisal. The Superintendent of Elementary Education has requested that study groups of elementary school teachers be formed to discuss the handbook.

### EXPERIMENTAL SCHOOL

In co-operation with the Toronto Board of Education, the Department of Education opened in September, 1948, an experimental unit in art education at the Essex Street School, Toronto. A well-qualified staff has been investigating the problem of the normal modes of expression in art of children enrolled in Grades I to VIII of Ontario schools. During the course of the investigation the staff analysed over 12,000 examples of children's work, and carried out classroom experiments with over 400 children enrolled in the Essex Street School. More than 50 carefully graded collections of work have been compiled. It is hoped that reports and graded illustrative material will be available for distribution next September. As an outcome of the investigation previously noted, further research related to picture-making by handicapped children is planned for the forthcoming school year.

### SATURDAY CLASSES

The staff of the Art Unit at the Essex Street School is conducting a series of classes for exceptionally gifted children. These classes were held in the Ryerson Institute of Technology on Saturday mornings from October to March. The children attending were chosen by Toronto school principals and supervisors of art. The classes are experimental; reports will be issued periodically.

### SUMMER COURSE

The 1948 enrolment in the summer course in Art and Crafts was 436, and the students were given an opportunity to become familiar with a wide range of

techniques and special methods. The majority of those attending the course were teachers regularly employed in the schools of Ontario but there were also a number of people present who were interested in community activities under the sponsorship of the Community Programmes Branch of the Department of Education.

## **SUPERVISION**

The Art Branch, in co-operation with local education authorities, has organized a number of art education workshops throughout the Province. Both rural and urban teachers have participated in large numbers. The workshops have operated for periods varying from one day to five days. Lectures, discussions, and practical work in art and crafts have been included in the programme.

During the past school year the Director of Art has visited the Provincial Normal Schools and has addressed the students upon the subject of art education.

## **MOTION PICTURE FILMS**

During the past summer the Director of Art, acting as educational consultant, and in company with several staff members of the Summer Courses in Art and Crafts, prepared scripts for a series of motion picture films. Four of these films were completed under the general title of CREATIVE HANDS. The films are in colour and in sound, and deal with paper sculpture, finger painting, the making of model houses, and drawing to music. The films have been well received; a further series dealing with art education is in preparation.

## **PROVINCIAL SURVEY**

A survey, completed in 1946, of art education in the elementary and secondary schools of this Province, was published in short form in 1948 under the title ART EDUCATION IN THE PROVINCE OF ONTARIO. The book reviews the development of Art Education in Ontario and offers suggestions for further improvement. Copies have been distributed to Inspectors of Schools.

## **SCHOLARSHIPS**

The Junior League of Hamilton and Toronto offered for the third year four Art scholarships of the value of \$200.00 each to pupils enrolled in the secondary schools of the Province. The Art Branch collaborated by assuming responsibility for the administrative work and for the collection and arrangement of drawings and paintings to be judged. The standard of work showed considerable improvement over that of former years.

C. D. GAITSKELL,  
Director of Art.

Toronto, July 14, 1949.

# Audio-Visual Education

## Report 10

### SCHOOL BROADCASTS

A programme of seventy-five school broadcasts in fourteen different series was prepared for use in elementary and secondary schools in the province. These broadcasts were presented in co-operation with the Canadian Broadcasting Corporation over a group of fifteen local stations. A teachers manual outlining the programme was distributed to all Ontario teachers in September. An attempt was made to correlate visual aids with the broadcasts.

Two surveys of the effectiveness of these broadcasts were made during the year. As a result of helpful suggestions received from schools, several changes in the general form of the broadcasts were effected.

By special arrangement with the British Broadcasting Corporation a selection of twenty-six British school broadcasts was offered to Ontario schools each Thursday from October to April. Every effort was made to select broadcasts that would correlate closely with the Ontario Programme of Studies.

The Twelfth Annual American, Exhibition of Educational Radio Programmes held at Columbus, Ohio, May 1948 granted a First Award to an Ontario series on Social Studies, and an Honourable Mention Award for the Story Period for Juniors.

### FILM UTILIZATION

The number of schools registered with the Visual Education Branch for film service continued to increase. There are now approximately twelve hundred elementary and secondary schools making considerable use of educational films. In order to meet increasing school requisitions, eight hundred and thirty-seven additional prints were purchased, and seventy-one new titles were added during the year.

A revised catalogue containing descriptions of all films was published, and distributed to schools using our service. Most of the elementary school films are now correlated with definite topics in the Programme of Studies.

### TEACHER TRAINING

A summer course in Audio-Visual Aids was held at Givins School in Toronto during July and August. Demonstration lessons illustrating approved techniques for using Audio-Visual Aids were given by experienced teachers. Training and practice in the operation of equipment received considerable attention. Workshops were organized in an effort to give teachers the best opportunity of familiarizing themselves with current practice and recent research results.

### OFFICE ACCOMMODATION

The Audio-Visual Education Branch was moved from the Parliament Buildings to new quarters at 244 College Street during the year. This change has enabled the Branch to improve considerably its service to Ontario Schools.

J. W. GRIMMON,

Director, Audio-Visual Education.

Toronto, March 16, 1949.

# Guidance

## Report 11

Progress in guidance work varies widely from school to school. This uneven rate of development is to be expected even under a central organization, since guidance is something more than a course of study or a line of action to be superimposed on a school by regulation. It is, rather, a gradual co-ordination of all the resources of the school to the end that individual students may have the help they need to develop while they are at school and to make good occupational and educational plans. Progress in a school must wait upon an understanding of the need for individual help, upon the selection and training of leaders to take responsibility for it, and upon provision of time to do the work. In schools where these conditions have been realized progress has been rapid. The Occupations course in Grade IX continues to be the only service specifically required by departmental regulations, but almost every large secondary school in the province has gone far beyond that requirement. As most large schools now have one or more teachers trained in guidance work and made responsible for it, it has been found reasonable and useful to provide time for individual counselling and other special guidance services. Many schools are moving toward the objective of one teacher's time to each 500 students. In such schools the pattern of a full guidance programme is appearing—assistance toward good adjustment to school, provision of adequate occupational and educational information, a testing programme, a useful system of records, a counselling service for all students, job placement, and follow-up. Many of the smaller schools must content themselves with a less specialized service and must continue to depend upon the incidental help that teachers are able to give through their knowledge of the students and their interest in them. Here too progress is being made, particularly in schools where there is a teacher who has had special training.

### INFORMATION

It can now be said that every secondary school in the province is in a position to provide some accurate and up-to-date information about occupations and about educational opportunities. The Grade IX course in Occupations is only a first means to this end. Its aim is to foster and develop that natural interest which young people have in occupations and in training for them, to broaden their horizons, and to begin to direct their thinking toward the eventual though perhaps distant goal of a suitable choice of occupation and the training required for it. Many schools provide a more advanced course in Grade XII, when students must make definite plans either for further training or for immediate employment.

Files of information are being set up and are growing in value and in use. The Vocational Guidance Centre of the Ontario College of Education, through an arrangement with the Ontario Department of Education, distributes in each school month a budget of guidance materials to every secondary school and to the elementary school inspectors. This regular mailing service provides an invaluable means for distributing material prepared especially for the purpose. It is used also for distributing additional material from many other sources such as the universities and training schools, industry, business, and the federal and provincial government services. Among the interesting ways in which schools disseminate information are Career Days, special speakers, films, plant visits, and supervised work experience.

## **GUIDANCE CENTRE**

In addition to providing the monthly mailing service the Vocational Guidance Centre serves as a distributing centre for test materials and for the text-notebooks which are used in almost all secondary schools and in many elementary schools. The monthly publication, the School Guidance Worker, serves to keep schools in touch with current thought and practices in this field.

## **COUNSELLING**

While much information and help can be obtained through regular classes and through the files it becomes increasingly clear that many problems are individual ones and must be dealt with individually. Counselling is the distinctive and most important guidance service. All other guidance efforts rise out of this attempt to help students understand themselves and their needs and to meet them, whether it be choice of course in high school, difficulties with school work, personal problems, plans for further education, or entry into employment. Increasingly in the larger schools teachers are being selected for their suitability for this work, and trained and given time for it. In a typical school with a well-developed guidance programme students average two counselling periods each year and special help is available to any student at any time. In small schools where teachers and students are in close contact, and where teachers' time is very limited, counselling continues for the most part to be incidental, but here too training makes it more effective.

## **TESTING**

In situations where tests appear to offer useful information for counselling, and in schools where there is someone trained in their use, some group testing is being done. However, an attempt is made to ensure that all concerned realize that decisions or judgments must not be made on test results alone, and that tests are only one of many means of understanding something about a student.

## **RECORDS**

If a student is to be counselled intelligently it is important that relevant information about him be available. Attention is being given to a continuous record, not only of examination marks but also of the student's abilities, interests, experiences and plans. Many schools are finding this information so useful to principals and teachers as well as to guidance counsellors that it justifies the time and effort spent in recording it. Many schools are seeking to avoid duplication and to co-ordinate all school records to lessen the cost in time and effort and to increase the usefulness to all concerned. A few centres are already keeping a continuous record from the time the child enters elementary school until he leaves secondary school and finds reasonably settled employment. Some universities have already asked secondary schools for pertinent information regarding students who have applied for admission.

## **PLACEMENT**

Many schools, particularly technical and commercial schools, already have a well-established job placement service, and some of these find employment for almost all their graduates and for many who leave school before completing their courses. In most academic schools this has been the last guidance service to be developed. In the past most follow-up studies have been spasmodic, but it is encouraging to find many schools now establishing the machinery for this further service.

## **ELEMENTARY SCHOOLS**

During 1948 interest in guidance work in the elementary schools has increased. The close relationship between the grade teacher and the student is recognized as a natural means of individual help. Certain other special needs are recognized.

Although no formal guidance work is required by departmental regulation some elementary schools are going beyond this incidental work and are providing some or all of the following services: diagnosis of study difficulties and provision of remedial work, counselling toward adjustment of personal difficulties throughout the grades, choice of secondary school, employment of school-leavers, and courses in the senior grades for discussion of guidance topics. To assist with this type of work a circular "Guidance in the Elementary School" was prepared. The circular proved so popular that, following distribution of 7,000 copies to the schools, over 3,000 additional copies have been requested by principals.

## **TRAINING**

The Department of Education again in 1948 provided summer courses leading to elementary, intermediate, and specialist certificates. There are now over 700 teachers in Ontario with some special training. There is still a concentration of these trained teachers in the larger schools. This training of teachers is considered to be a very important factor in the progress that has been made.

## **RADIO BROADCASTS**

A series of five fifteen-minute broadcasts on guidance was presented by the Canadian Broadcasting Corporation in co-operation with the Department of Education. They depicted typical problems of adjustment to High School, study difficulties, plans for choice of occupation and training for it, and the assistance that counsellors can give in such situations. There is reason to believe that students, teachers and parents who heard the broadcasts found them valuable.

## **CO-OPERATION**

A special effort in guidance has been made this year to bring about a closer co-operation between parents and teachers for the benefit of the children. Home and School Clubs have been approached and counsellors are being encouraged to use counselling time to talk with parents, and to do everything they can to understand and to assist the parents with their plans for their children. It must be made plain that the choices of the parent and the child are not to be dictated by the school, but that guidance is a service to students and to parents.

## **CONCLUSION**

Progress during 1948 has been gratifying. Although for local reasons some centres still offer a very limited service, guidance is gradually being accepted throughout Ontario as a practical way of helping young people to make good use of their years at school, to understand their own abilities, and to make intelligent plans for training beyond school or for entry into the working world. Improvement in techniques, better understanding of the place and function of guidance, and the intense interest in elementary schools are among the outstanding developments of the year.

H. R. BEATTIE,  
Director of Guidance

Toronto, April 14, 1949

# Physical and Health Education

## Report 12

Physical and Health Education has progressed from the days when it was purely physical training until it is now an integral part of the general education programme. The course of study makes provision for Physical and Health Education to be taught from Grades I to XIII. It is the work of this branch to organize and develop a programme which will meet the needs for the physical development of pupils at all grade levels.

### SUPERVISION

For supervision purposes the work of this branch is divided as follows:

1. The supervision of the boys' physical and health education programme in the secondary schools where 672 men teachers are employed part or full time to teach this subject.
2. The supervision of the girls' physical and health education programme in the secondary schools where 508 women teachers are employed part or full time.
3. The supervision of the physical and health education programme in the elementary schools.
4. The supervision of citizenship corps training which includes liaison with school cadet corps, school cadet camps, military headquarters and the Strathcona Trust Fund.
5. The supervision of the camp counsellor training programme and the Ontario Athletic Leadership Camp programme. This includes visiting the camps and recommending grants to be paid to non-profit camps.

### SUMMER COURSES

This branch has been responsible for conducting three different courses.

1. A course for elementary school teachers, Type B Certificate, was held at Harbord Collegiate with an enrolment of 60.
2. A course for secondary school women, Type A Certificate, was held at College of Education with an enrolment of 47.
3. A course for secondary school men, Type A Certificate, was held at Hart House with an enrolment of 59.

### CAMPS

#### Ontario Athletic Leadership Course:

Three hundred and twenty-seven secondary school students chosen by their principals and physical education teachers were given a two weeks' athletic leadership training course at the Department of Education Camp, Longford Mills.

The purpose of this course was to give these leaders a practical training in the instruction of basic athletic skills, the knowledge of game rules, the art of officiating, and the organization of a physical education programme. The two weeks' course provided a socializing experience in which these boys could learn to live, work, and play together as a responsible unit.

The boys were chosen for their academic, athletic and leadership qualities. A follow-up shows that they have made real contributions in their schools. Upon graduation they will be an asset to any community recreation programme.

### **Camp Counsellor Training Courses:**

The purpose of the camp counsellor training courses is to train counsellors for non-profit camping organizations throughout the province. Three courses of two weeks each were offered for girls at Belwood Lake Camp, Fergus, Ontario, and the same for boys at Bark Lake Camp, Irondale, Ontario. 172 girls attended the course at Fergus and 107 boys attended the course at Bark Lake.

Each applicant agreed to render at least two weeks' service at a non-profit camp within a year of completion of the course. The counsellors paid their own transportation and a registration fee of \$5.00 while the Department of Education provided living accommodation, instruction and facilities.

### **CAMP GRANTS**

The Department of Health shows that 469 camp licences were granted during 1948. 165 camps claimed government assistance in accordance with Department of Education regulations and were paid subsidies which amounted to a total of \$19,000. The camps receiving these subsidies accommodated 10,504 boys and 12,239 girls.

Sixty-two non-profit camps were visited. These visits provided a service through which problems were discussed and practical ideas transmitted.

### **THE FEDERATION OF SCHOOL ATHLETIC ASSOCIATIONS**

This branch in co-operation with representatives from the Headmasters' Association, district school athletic associations, and physical and health education personnel from universities, established the Federation of School Athletic Associations. The aims of this organization are:

1. to promote and organize a province-wide intermingling of school teams and individual competitors which may serve the purpose of acquainting schools in one part of the province with others, without any of the disadvantages of province-wide competition on a championship scale,
2. to encourage competition in the form of area tournaments for smaller schools,
3. to keep competition in any particular sport in line with the demands of the authorized curriculum,
4. to improve refereeing and coaching through instructional schools.

### **LIBRARY**

This branch serves the outlying schools by making available on a short loan basis the latest books and pamphlets which have a practical application to the teaching of Physical and Health Education.

### **RADIO**

A series of five broadcasts in Health were prepared for Grades IV to VI and another series of five Health broadcasts were prepared for the secondary schools, Grades X and XI.

### **FILMS**

Physical Education teachers throughout the province have taken advantage of the many physical and health education films which have been purchased by the Audio-Visual Education Branch. These films have been very useful for instructional purposes. Use of these films is limited only by the number of copies which are available.

## FIELD WORK

1. Visits to secondary schools—267
2. Visits to elementary schools—154
3. Area refresher courses for elementary teachers—5
4. Demonstrations for teachers conventions—9
5. Referee and coaching schools—4
6. Headmasters' meetings—4
7. Federation of School Athletics—3
8. Inspectors' conferences—3
9. Athletic tournaments—6
10. Citizenship and cadet corps visited—63
11. Normal school demonstrations—4
12. Summer camp sites visited—56
13. Addresses to camping groups—12
14. Interviews with school boards—15

## CONCLUSION

The growth and development of physical education in the elementary and secondary schools during the past year has been due to the combined efforts of officials of the Department of Education, members of this branch, faculty members of universities, members of school boards, school principals, teachers and pupils. Members of this branch appreciate the efforts of the many teachers who have implemented a physical education programme which provides mass activity that is both instructional and challenging to the physical requirements of the individual.

G. A. WRIGHT

Director, Physical and Health Education Branch.

Toronto, August 30, 1949.

# Music

## Report 13

### ELEMENTARY SCHOOLS

The following statistics show the percentage of classrooms in the Elementary Schools of Ontario providing a regular course in music, under the supervision of qualified music teachers. The figures are for the school year, and are based upon reports received from Inspectors:

	1947-48	1948-49
Cities.....	100 %	100 %
Counties.....	82.7	83.9
Districts.....	61.4	68.5
R.C. Separate (English).....	43	60.7
TOTAL.....	81.42	83.94

All French-Speaking Schools are under the personal direction of Joseph Beaulieu, Mus. Bac., Assistant Director of Music, and 70% of these schools have music instruction.

### SECONDARY SCHOOLS

The number of Secondary Schools offering a course in Music is as follows:

Schools	Total No. of Schools	Music Grade IX	Music Grade X	Music Grade XI	Music Grade XII	Music Grade XIII
Collegiates.....	72	65	40	24	18	5
High.....	184	138	64	28	23	3
Continuation.....	133	87	61	10	6	1
Vocational.....	15	13	8	5	4	1
Total.....	404	303	173	67	51	10
Percentage '48-'49.....		77	44	17	13	2
Percentage '47-'48.....		74	42	15	11	1

Music Organizations in Secondary Schools:

Orchestras.....	88
Bands.....	40
Bugle and Pipe Bands.....	69
Choirs.....	268
Operettas performed.....	37

### MUSIC TEACHERS

There are at present approximately 1,000 certificated teachers and supervisors of music engaged in the Ontario School System.

### SUMMER COURSES

Nine different courses in Vocal and Instrumental Music were offered from July 5 to August 6 at Jarvis Collegiate Institute, Toronto. The total enrolment was 427. The entire student body appeared as a guest chorus with the Promenade Symphony Orchestra at Varsity Arena on August 4, 1948.

## **NORMAL SCHOOLS**

In the eight Provincial Normal Schools, music is taught to all students. There is a steady improvement from year to year in the attitude and ability of the student teachers, due to the province-wide acceptance of music as a school subject.

## **MATRICULATION MUSIC**

Music is one of the optional subjects in Grades X to XIII of the Secondary Schools. Students may obtain standing by (a) submitting certain certificates from the Royal Conservatory of Music of Toronto or other accredited examining bodies, or (b) attending a school course, if one is offered. By method (a) 205 students in 95 schools obtained Grade XII standing, and 108 students in 62 schools obtained Grade XIII standing. In the school course (b) the number of pupils who wrote the Grade XIII Music examination was as follows:

1944—22	1945—33	1946—50	1947—55	1948—59
---------	---------	---------	---------	---------

## **MUSIC FESTIVALS**

Music Festivals have been encouraged as a means of motivating classroom work, establishing standards of performance, and stimulating public interest. The number of Festivals held during 1948, in which more than one school was involved, was approximately 125, and nearly every part of the Province was served.

## **SOUND FILMS**

The Department Library of films now contains 25 subjects dealing with music. The music sound films are among the most popular in the library.

## **RADIO**

During January, February and March the Department, in co-operation with the Canadian Broadcasting Corporation, presented twenty Music broadcasts in three series, i.e. "Primary School Music"—5 fifteen-minute programmes for Grades 1—3; "Junior School Music"—5 fifteen-minute programmes for Grades 4—6; "Music for Young Folk"—10 thirty-minute programmes for Grades 7—10. For all these broadcasts, the commentary was prepared and given by the Provincial Director of Music. In addition, the Music Branch prepared a special broadcast for Remembrance Day.

## **MUSIC AT THE O.E.A.**

The Music Branch co-operated with the Ontario Educational Association in presenting an evening of music at Harbord Collegiate Institute on March 31st. The programme was given by groups of pupils from many centres in Southern Ontario, and provided examples of the various types of musical activities common to the schools.

## **SCHOLARSHIPS**

The Junior Leagues of Hamilton and Toronto offered, for the third year, four music scholarships of the value of \$200 each to pupils in Grade IX and X. The Music Branch collaborated by assuming responsibility for the administrative work, and arranging auditions for the candidates.

## CONCERTS

To bring live music of high quality to Secondary School pupils in smaller communities, and to encourage young artists who are for the most part graduates of the Ontario Schools, the Department has given, during three years, 250 concerts by 86 artists. In 1947-8, 37 artists have given 91 concerts in 27 towns.

## Report 14

### ACTIVITIES

The work of this Department includes the accumulation of historical material, as well as making it available to the public and assisting enquirers to use it to the best advantage. We are pleased to note specially a very valuable accession during the past year in the form of a collection of one hundred and fifteen water-colour paintings of places in Eastern Ontario, along the Rideau and from Kingston to the head of the Bay of Quinte. These pictures were made by Capt. Thomas Burrowes, R.E., Overseer of Works on the Rideau Canal, 1826—1846, and they should be of interest to any one studying that part of the province.

As part of the work of preparing material for use by the public, over one hundred pamphlets were added to our collection. Six thousand cards were added to the index of the Land Papers, and two thousand cards to the genealogy section.

The Sir James Whitney papers have been arranged chronologically and the calendaring has been started, but this will take some time as it is a very large collection. The County Records of Leeds and Grenville, 1832-1922, have been arranged and are now available. The H. H. Robertson Papers, dealing mostly with militia matters of a local character, have been calendared and indexed. Correspondence and Reports of the Education Department for 1862 have been received and are now arranged and added to the previous records from that Department.

Searches are carried on constantly, many of them involving hours of work, and enquiries come by mail from all parts of Canada and from the United States. Besides this, we have enquiring visitors from every walk of life, from almost every county in Ontario and, especially in the summer, from many states of the Union.

While in Belgium, Canadian soldiers must have talked a great deal about their home provinces, for we have again, for the third year, been asked to send to that country some of our Reports, particularly those dealing with lands. This time we forwarded seven volumes to M. Vanercke André, Châtelineau, in Hainaut Province.

### EDUCATIONAL WORK

A new system of handling our three historical exhibits was inaugurated this year. A group of four or five schools in one section was chosen, and with the co-operation of the two main railway companies the exhibit was passed directly from school to school in each area. In this way we have the three exhibits out at the same time, one in the northern, one in the eastern and one in the southern part of the province. This method makes a more complete coverage of smaller communities which do not have all the cultural advantages of the larger centres. The system seems to be working out very satisfactorily, with a saving of time and expense.

Sometimes teachers ask for the loan of an exhibit for some special occasion, such as an Open Night, and we are always pleased to co-operate as far as we are able.

When the teachers-in-training at the Ontario College of Education were having a seminar on the value of archives to teachers of history, several visited

this Department, inspected our material, studied our method of handling it and saw for themselves how it could be used. They also borrowed two of the exhibits to help demonstrate their ideas to their fellow-students.

## ACCESSIONS

- Blake, Mr. V. S., Toronto: an excellent run of *The Echo and Protestant Episcopal Recorder*, Toronto, 1855-1861.
- Burrows, Mrs. T. F., Stayner: package of family letters, re Ferguson and Burrows families.
- Cornish, Prof. G. A., Toronto: *The Canadian Phonetic Pioneer*, Oshawa, Vol. 1, No. 1, July, 1858.
- Crouse, Mr. Charles G., Oshawa: copy of *Census of the Village of Oshawa, 1878*; also, sketch of the Town Line Church and its Neighbourhood, by Dr. T. E. Kaiser.
- Cunningham, Mr. P. H., Toronto: two Militia Certificates and a Commission for taking affidavits, 1862-1869.
- Delaporte, Miss Helen: *Roll of Honour of the Ontario Teachers who served in the Great War, 1914-1918*.
- Education Department: Correspondence and Reports for 1862; also, nineteen bound volumes of *Canada Educational Monthly*, 1879-1902.
- Gray, Mr. G. L., Toronto: *Histories of fifteen schools in Bruce County*.
- Hoskin, Miss Edith, Cobourg: *History of St. Paul's United Church, Cold Springs, 1936*.
- Hewell, Mr. W. H., Peterborough: five land grants, 1823-1851.
- Hydro-Electric Power Commissioners of Ontario: thirty bound volumes of "The Bulletin," 1914-1942.
- Jarrett, Mr. Fred, Toronto: *North Hastings Review*, Madoc, 1881; two copies of the *Belleville Weekly Intelligencer*, 1883; two copies of *London Free Press*, 1888, and one copy of *The Leader*, Toronto, April 6, 1868.
- Kerr, Mr. H. T., Chippawa: Indenture of Apprenticeship, William Steel Pickhaven and his father, Paul Pickhaven, with John Ream, County of York, England, to learn the trade of a shoemaker. July 14, 1824.
- Macdonald, Mr. G. F., Windsor: photographs of Col. Alex'r McKee and of Hon. James Baby.
- Macdonald-Taylor, Sir Henry, Londonderry, Northern Ireland: letter of John Galt from Burlington Beach to Samuel Oman, Ireland, November 20, 1827.
- McGillivray, Miss C. H., Toronto: crayon portrait of John McGillivray of the North West Co.
- Manitoba Archives: copy of Commission of Inquiry as to Receipts and Expenditures of the Treasury Department of Ontario and also the methods of book-keeping adopted. Commissioners: John Hoskin, B. Edmund Walker and Angus Kirkland. November 2, 1899.
- Marryat, Mrs. Gerald, Hastings: scrap book of articles on Hastings and Peterborough district.
- Montreal Protestant Central School Board: fourteen Teachers' Certificates awarded to the Misses Mary M. and Matilda Ostrom of Hastings County, 1864-1872.
- Morgan, Mr. H. R., Brockville: copy of self-portrait and autobiographical memoir of Andrew Norton Buell.
- Packham, Mr. Murray A., Weston: two articles, revised edition of history of Packham, Stephenson, Burkholder, et al. families and one on John Graves Simcoe and the Queen's Rangers.
- Rose, Miss Mary; Toronto: a collection of books and pamphlets, among them twelve volumes of *The Canadian Antiquarian*, de luxe edition, Ontario text books, military histories and hand books and several items on Masonry.

- Ross, Mr. A. H. D., Toronto: three portfolios of one hundred and fifteen water colour paintings of places in Eastern Ontario, made between 1826 and 1846, by Capt. Thos. Burrowes, R.E., Overseer of Works, during the construction of the Rideau Canal.
- Stoddart, Mr. G. W., Toronto: pamphlet on the Wm. Lyon Mackenzie Homestead Foundation.
- Tolan, Mrs. S. C., Niagara Falls: Niagara Falls Wesley Park Advocate, supplement to the Buffalo Christian Advocate, June 25, 1885.
- Trafalgar Township Council: Municipal records, census rolls, assessment rolls, Treasurer's accounts, Clerk's Minutes, 1823-1878.
- Trust and Loan Co. of Canada, Montreal: a collection of early deeds, grants, wills, etc., of Upper Canada.
- Walker, Miss C. Jean, Toronto: four copies of the Grand River Sachem, 1897-1912; and two copies of the Hamilton Spectator, July 15, 1846, and July 15, 1896.

Toronto, March 14, 1949.

H. McCLUNG  
Provincial Archivist

## Report 15

### PUBLIC LIBRARIES

By way of general comment I am able to report that, for the most part, the individual libraries and the service as a whole have maintained and in many cases have increased the rate of improvement and development that was spoken of last year. This does not mean that there has been any startling change in the main aspects of our public book service. Considering the nature of library organization and book-stocks, and the problems connected with promoting the use of the material involved, that is to say, the "selling" of the idea of library use to the adult population—it sells itself to children—we must be content if we can see a slow but steady improvement in organization, stock and use.

One thing is certain. Judging from information gained through my visits to libraries and through the annual reports submitted by them, I can say with conviction that this educational service has definitely emerged from the long period of stagnation and financial neglect which, with some brilliant exceptions, had wrapped library after library in a kind of physical and intellectual pall. There are still some moribund libraries in the province but their number is becoming fewer and fewer.

Since better service inevitably arouses sharper demand, it is difficult at this point to see through to the time when we can feel that the needs of the province are being adequately met. However, I would hazard the opinion that, if we can keep up our present rate of improvement for another five years, and if the public demand which we are fostering does not outrun our rate of development, we should by that time be in a position to provide the people with a reasonably effective service.

In accounting for such progress as has been made, I should say that there are three main factors at work, all very much dependent upon each other. The policy of Government in providing regulations that are in keeping with today's needs, and of offering generous assistance to "those that help themselves," has stimulated municipal and county councils to a clearer realization of the significance of public book service; and these two factors have in turn given a new hope and a new determination to librarians and members of library boards to "get cracking."

The expression is used advisedly. It is precisely what most of them have been doing. The energy, the enthusiasm, the faith-in-the-job, and the persistence of so many of our librarians and so many of our members of library boards—the front-line people—cannot but arouse the respectful admiration of all who see and understand the importance of the task that they are about.

It is of interest to note that the total expenditures of the free public libraries in 1943 was approximately \$1,500,000, whereas in 1948 the amount was approximately \$2,600,000. Of this latter total, approximately \$312,000, or 12%, was government grant. It was a fine stimulus and the local tax-payer has shown his appreciation of it in the greatly increased burden that he himself has assumed in support of his library.

There was one county library established during 1948. Wentworth came into vigorous operation in September and gives great promise of future expansion and success. Oxford is in process of reorganization and now employs a full time librarian. Nearly all the County Councils concerned appear to be impressed with

Geo. H. Locke Memorial Branch Library, Yonge St. and Lawrence Ave., Toronto.

the importance of this aspect of rural community life, and the trend everywhere is towards more generous financial support. Eight of the counties are now operating book vans to the great advantage of rural readers. While it is established as a free public, rather than a county co-operative, the York Township Library may well be mentioned here. This is the only township which is attempting to give full library coverage in a suburban area; and I am happy to be able to report that it is achieving marked success. The service is being received enthusiastically and is being steadily expanded to meet the demand which it has itself uncovered.

In June of 1948 the offices of this Branch and the Travelling Libraries were moved to the Huron Street Annex. As a result, a very much better arrangement of stock and organization has been made possible for the Travelling Libraries. We are not yet able to fully meet the demands made upon this type of box-library, but the shipments are now going out with much less delay and, which is more important, with much more careful and effective selection, based on local needs. Rural schools, principally in the north and in counties where there is no county library, received a thousand of the fourteen hundred boxes sent out during the year; and the country elementary schools alone did a circulation of 51,000 children's books from this library. The significance of this circulation lies in the fact that the books are not texts. They are in no sense "work" books, but are selected solely with a view to the natural development of the child's interest in books and of his habitual use of them as part of his daily life.

TRAVELLING LIBRARIES

ANNUAL REPORT FOR THE YEAR ENDING DECEMBER 31, 1948

Libraries Loaned (No. of boxes)		
Schools—Elementary . . . . .	1,092	
Schools—Secondary . . . . .	110	
Public Libraries . . . . .	145	
Women's Institutes . . . . .	39	
Miscellaneous . . . . .	51	
Total . . . . .	1,447	
Decrease over 1947 . . . . .	54	
Number of Books Loaned		
Schools—Elementary . . . . .	51,117	
Schools—Secondary . . . . .	4,396	
Adult—non-fiction . . . . .	4,062	
fiction . . . . .	4,707	
	8,769	8,769
Teachers professional books . . . . .	494	
Books to individuals . . . . .	22	
Total . . . . .	65,645	
Increase over 1947 . . . . .	1,400	
Accessions		
Juvenile . . . . .	4,184	
Continuation . . . . .	569	
Adult—non-fiction . . . . .	419	
fiction . . . . .	520	
Teachers . . . . .	21	
Total . . . . .	5,776	
Decrease over 1947 . . . . .	1,243	
Discards . . . . .	4,500	

As an indication of the amount of use given the Travelling Library books, it is noted that whereas 5,700 new titles were added during the year, it was necessary to withdraw no fewer than 4,500 and discard them as no longer serviceable.

ANGUS MOWAT

Toronto, September 10, 1949. Director of Public Library Service.

# Trade Schools

## Report 16

Prior to the inauguration of the Trade-Schools Regulation Act in 1938 an extensive survey was made by a representative of this Department to investigate and report on the operation of private resident and correspondence schools in the Province of Ontario. It was revealed in the report that there existed a most deplorable exploitation of the citizens of the Province, particularly of young people in search of further education. Extravagant claims were made in the advertising copy of many of the private schools and correspondence courses, and by salesmen whose efforts to secure a binding contract were frequently unscrupulous and unethical. Many of the courses offered were of little value and the promises of employment impossible of fulfilment.

Legislation to rid the Province of Ontario of schools taking unfair advantage of our citizens was passed by the Legislature in 1938 in the Trade-Schools Regulation Act. This Act with amendments stands to-day to protect the public against the nefarious practices which previously existed. Conclusive proof of the value of the Act is supplied by the fact that more than twenty schools that were operating in the province prior to 1938 have been unable to obtain a license to operate under the Act.

Registered schools are required to make application for re-registration annually. Supervision of the operation of registered schools includes the approval of all advertising copy, teacher qualifications, length and content of courses of study, graduation requirements, and fees charged for the courses. Specific regulations are provided for the guidance of school and student in effecting an amicable settlement of fees where the course is not taken to completion.

Annual approval is required of accommodation, equipment, lighting, and heating facilities. Further, in collaboration with the local fire, health, and safety departments for the area in which the school is located, approval is required of the accommodation from the standpoint of sanitation, freedom from fire hazard, and safety from accident wherever power machines are installed.

Schools offering one or more of the following courses of study are required to register under the Trade-Schools Regulation Act.

- |  |  |
|--|--|
| 1. Advertising   | 21. Landscape Gardening                                  |

| 16. Foundry Practice   | 36. Telegraphy   |
| 17. Hand Machine and Power Machine Sewing Operation                | 37. Television   |
| 18. Hotel Management and other Hotel, Cafe and Hostess Occupations | 38. Theoretical and Industrial Chemistry                 |
| 19. Industrial and Business Management                             | 39. Theoretical and Industrial Electricity               |
| 20. Journalism and Story Writing                                   | 40. Theoretical and Practical Engineering                |
|  | 41. Woodworking and Cabinet Making                       |

The enforcement of the Trade-Schools Regulation Act has, without doubt, given much-needed protection to the citizens of this Province, and ten years' supervision of the schools registered under the Act has resulted in their operating on a most ethical basis and providing practical courses of study at a fee consistent with the service rendered.

The registered schools are rendering a valuable service to the citizens of this Province, and there is evidence of full co-operation between the schools and the Department.

F. W. WARD,  
Registrar of Trade-Schools.

Toronto, June 22, 1949.

# Ontario School for the Blind

## Report 17

22.....	1	15.....	1
21.....	2	14.....	1
20.....	1	13.....	2
19.....	2	12.....	1
18.....	5	11.....	2
17.....	3	10.....	1
16.....	4	8.....	1
		Total.....	27

Of the above group, in the bracket 22 to 16 years all are gainfully employed with the exception of two boys, one seventeen years old and one sixteen. The former was returned to the Indian Reserve; the latter will need institutional care for the rest of his life. A fifteen-year-old girl withdrew for medical reasons. A fourteen-year-old girl withdrew for a year and will be returning. The thirteen- and twelve-year-olds will need institutional care. One eleven-year-old moved to British Columbia, and the other girl in this group and the ten-year-old girl had too much sight for enrolment in the School. The eight-year-old boy will be returning in a year or so.

#### New Pupils by Age Groups

STAFF CHANGES

Mr. Bruce Mealing of Orillia came to us in September, 1948, to replace Mr. Arthur Heal in Grade VII. Mr. Heal, who was with us for one year, resigned to enter the business world. Miss Nancy Holder of Drumbo replaced Mrs. Margaret Smith, an occasional teacher, in Grade IV. We retained Mrs. Smith on our staff

to do special tutoring in Braille and other subjects in the lower grades. Miss Betty Alabaster, House Mother, withdrew in the spring to take other employment, and was replaced by Miss Dorothy Auty.

## DONATIONS

The following gifts were presented to the school during the year:

From Robert Utting, who left our school in Grade X this year, \$25.00 toward a loud speaker for our gymnasium and skating rink.

From the J. S. Wilson Chapter, I.O.D.E., two talking books, valued \$25.00, and an additional \$25.00 for a Braille transcription of a music text which is not printed in Braille.

From the Sara Jeannette Duncan Chapter, I.O.D.E., a talking book machine and a Braille typewriter.

## STUDENT AWARDS

This year our list of student awards and prizes was of great length. In addition to special prizes to individual students, the following gifts were made to the school as a whole from interested organizations:

From the Rotary Club of Brantford, \$50.00, distributed as follows:

Dr. C. D. Chapin Memorial Prize, Grade VIII (tie)—Thomas Philpott	\$2.50
Katharine Wakaruk	\$2.50
Allen E. Cuthbertson Memorial Prize, Grade IX —Dolores Magel	\$5.00
Flt. Lt. Ian Dowling Memorial Prize, Grade X —Angus Vetur	\$10.00
Lt. Chas Waterous Memorial Prize, Grade XI —Reinhold Goliath	\$10.00
Thomas Makusker Memorial Prize, Grades XI and XII English—Claude Chatelain	\$10.00
Theodore R. Hamilton Memorial Prize, (year's progress in Music)—Charles McCormack	\$10.00

From Robert Utting, a student who went to sighted school this year:

Grade IX French	Walter Luoma	\$10.00
Grade X French	Doreen Winkler	\$10.00
Public School Music. . . .	(tie) Yolanda Roberto	\$2.50
	James Stoner	\$2.50

Elizabeth Rush Prizes for Braille writing: First June Fanson \$15.00; Second Virginia Philpott \$10.00.

Athletic Trophies:

	Boys	Girls
Seniors:	Verne Edquist	Grace Quartermain
Intermediates:	Robert McKay	Madeline Campbell
Juniors:	Reuben Streicher	Shirley Allport
Public Speaking Prizes (Rings):	First Ronald Edwards	Second Mario Galeazzi
J. S. Wilson Chapter, I.O.D.E., Music		Annie Gray \$25.00
Brantford Music Club—Trophy to most outstanding music student		Ronald Adams
School Prize for work in vocal music		Charles Rush \$10.00
Emory Scholarship—year's bursary for University work		Robert Storey \$400.00
Alexander Graham Bell Chapter I.O.D.E., Best History student		Angus Vetur Braille watch
Ethel Charlton Memorial Prize to graduating student		Mario Galeazzi \$45.00

Our most prized awards are the Character Cups, presented by the school to the most outstanding boy and girl. These were awarded this year to Jean Schmaus of Saskatchewan and Claude Chatelain of Ontario.

We again competed in the Stratford and Brantford Music Festivals. From Stratford, our results were as follows:

Baritone Solo under 21 years	First, with mark of 84	Charles McCormack
Oratorio solo, amateur or professional	First, with mark of 85	Joseph Caruk
Male Quartet	First, with a mark of 84	
Tenor Solo, tie for	First, with a mark of 84	Teras Cherniawsky
Madrigal Choir	First, with mark of 82	
Piano (Beethoven)	Third, with mark of 81	Henry Hogland
Girl's solo, under 18 years	Fourth, with mark of 83	Jeannine Amyotte
At the Brantford Music Festival, our students obtained the following awards:		
Madrigal Singers	First place and the Eddy Trophy.	
Two boys, Terry Cherniawsky and	Joseph Caruk, won \$25.00 scholarships in	
vocal classes.		

### EXTRA-CURRICULAR ACTIVITIES

This was a particularly busy season. We had a number of outstanding singers among our senior boys, and hardly a week went by without calls from some organization for their services, either in groups or singly. Full evening shows were presented in Paris and Jarvis. There were two Brantford shows, one sponsored by the Shriners and the other, our main show, at the Brantford Collegiate Institute, by the Zion Chapter, O.E.S.

During the year our Dramatic Department presented four one-act plays, "Londonderry Air," "Peter and the Clock," "Minikin and Manikin," and "Thirty Minutes in a Street." Forty-five students, ranging from juniors to top-class students, were given dramatic coaching. Our costumes were assembled and made by our students and staff, and the stage settings were the work of Miss Anne Kellett, who comes to us for this special work, and who is assisted by our maintenance staff.

Evening shows were often a combination of dramatic and music work. The play presented at the Brantford Collegiate in March was "Thirty Minutes in a Street." Students winning awards in the two Music Festivals were featured in the musical half of the show.

One of the most talented vocalists we have had in years is Charles Rush, a nineteen-year-old lad from the west. He has given outstanding service to the community during the past three years, being a special guest artist with such organizations as the Cockshutt Male Choir. In a presentation of Gounod's "Redemption" by massed choirs of the city he was given the role of "The Christ." This year he won a place on the York Knitting Mills radio show "Singing Stars of Tomorrow."

The various student clubs are self-supporting financially. They obtain their money through individual fees and such work projects as caning, bazaars and teas, canteens, paper salvage, and so on. Part of this money is used to carry on the social activities of the clubs, and part is used for social service and appeals for worthy causes.

### LIBRARY REPORT

Books were added to the reading library during the year. The chief source of supply is the National Institute for the Blind at London, England, and since they did not emboss any books during the war, many braille books are still out of

print. Many of our books cannot be mended any further and will have to be replaced. A number of sets of books have been bought from Louisville, Kentucky, for our text-book library. These include sets of English and foreign language texts.

## DENTAL REPORT

There were 184 pupils of the Ontario School for the Blind who presented themselves for examination from October, 1948, to June, 1949, 82 girls and 102 boys. All pupils had a prophylaxis, and the majority had a fluorine treatment for the prevention of cavities.

Eleven boys required X-ray. For the boys there were 118 fillings; one boy required special gum treatment. There were three pulps removed and filled, ten extractions, and one denture repair. The girls had 84 fillings, 12 extractions, five X-rays, six special gum treatments, one pulp removed and filled. One girl broke two central incisors, requiring two acrylic jacket crowns.

The pupils' teeth in general are in good condition.

F. J. Wentworth, Dentist

## MEDICAL REPORT

New pupils given diphtheria toxoid.....	13	
Pupils given anti-tetanus toxoid.....	3	
New pupils vaccinated.....	6	

We had an exceptionally good year as far as the health of pupils and staff is concerned. We have had no serious illness during the term. There was slight epidemic of chicken pox; all made good recovery.

The annual physical examinations were carried out and all new pupils given a complete medical examination. Frequent check-ups are made during the year. Generally speaking, all are in good physical condition.

Parents of children suffering from diseased tonsils have been advised, and it is hoped tonsillectomies will be done before the children return in the fall. New pupils who had not been immunized against diphtheria and smallpox were immunized against both. Monthly check-ups of weight and diet were carried on throughout the year.

J. A. Marquis, Physician

## OPHTHALMOLOGIST'S REPORT

Examination of pupils in attendance at the school gave rise to many encouraging observations. Not only had the general health of many improved, but their sight as well. This is due, apparently, to their restricted and conservative use

of their eyes, as well as the improved condition of their general health. For some students a change of glasses was advisable, and therapeutic measures for the care of eyes were suggested for others.

Examination of New Pupils

Eye Disease	Boys	Girls	Total
Congenital cataract.....	4	3	7
Chorioiditis and Retinitis.....	1	3	4
Optic Atrophy.....	1	3	4
Iritis, Uveitis and Sympathetic Ophthalmia.....	2	2	4

Myopia.....	3	2	5
Congenital Lesions, Aniridia, Amblyopia, Microphthalmia, etc.....	2	2	4
Total.....	14	17	31

Degree of Sight	Boys	Girls	Total
Limited sight in each eye.....	6	9	15
Limited sight in one eye, light perception in the other.....		1	1
Light perception in both eyes only.....	1	3	4
Limited sight in one eye, blind in other.....	6	2	8
Blind in both eyes.....	1	2	3
Total.....	14	17	31

From the foregoing chart we are pleased to note that practically fifty per cent of the pupils have sight in each eye. The next highest class is that with some sight in one eye, blind in the other, and this presents a somewhat higher percentage than we have found in former years. There are three pupils totally blind, a small percentage of the total group. The other subdivisions are much as in former years.

During the year we saw a considerable number of pupils with mild ocular infections or injuries which required treatment. We also met a number of parents who were visiting the school, and it was a pleasure to discuss with them their children's problems. Fortunately there were no serious accidents or epidemics during the term, and your examiner feels it was a very interesting and satisfactory one.

Norman W. Bragg, M.D., F.A.C.S.,  
Oculist

## BURSAR'S REPORT

For the year ended March 31, 1949

<b>Expenditures</b>	
Salaries.....	\$104,698.18
Travelling Expenses.....	540.10
Maintenance.....	59,194.55
	<u>\$164,432.83</u>
<b>Revenue</b>	
Farm.....	1,614.51
Perquisites.....	11,273.89
Fees from Western Provinces.....	26,250.00
Miscellaneous.....	33.00
	<u>39,171.40</u>
Net Expenditure.....	<u>\$125,261.43</u>

Note.—The above statement does not include expenditures on buildings by the Department of Public Works.

The teaching staff throughout the year have given of themselves freely, cheerfully, and effectively, both in and out of school. The maintenance staff have been co-operative and faithful in their duties.

Respectfully submitted  
H. J. VALLENTYNE,  
Superintendent.

Brantford, July 18, 1949.

# Ontario School for the Deaf

## Report 18

### ATTENDANCE

Forty-seven new pupils were admitted during the year. As only twenty-eight pupils left the school the total enrolment for 1948-49 reached an all time high of 335.

### EMPLOYMENT

Of the twenty-eight pupils who left the school all but four were sixteen years of age or over. The other four transferred to schools attended by hearing children. Mr. F. P. Cunningham, Guidance Teacher, in a report completed in April states that letters were received from nineteen of the twenty-eight pupils who left school last year. These nineteen were all working, and fourteen of them were employed in the same line of work in which they had specialized in the vocational classes here.

### CONVENTION

Eighteen members of our staff, including the Superintendent, attended a convention of the Volta Speech Association in Detroit in June. The meetings were held in the day-school for the deaf, and as the regular classes were in session many demonstrations of teaching speech and lip-reading were observed, as well as instructional methods in other subjects. These were all very helpful professionally.

### SCHOOL VISITORS

On May 18th and 19th a committee of the Ontario Royal Commission on Education visited the Ontario School for the Deaf. The committee visited classes in the three departments of the school. They inspected the vocational classes and buildings and the residences. They also observed the activities of the children in the gymnasium and at a senior school party in the evening as well as in a rehearsal of the Empire Day programme.

The annual Visiting Day was observed on June 2nd, when many visitors were received in classrooms and shops. Exhibits from academic and vocational classes were on display in the gymnasium during the afternoon and evening. During the afternoon a programme, including a Pageant of Empire and a Fashion Show, was presented in the school auditorium. The Pageant had been prepared for the benefit of the pupils on May 21st, and was repeated for our guests on Visiting Day. For the Fashion Show the senior girls appeared on the platform wearing the dresses, suits and coats that they had made in the sewing room, and with their hair styled in the school beauty shop by other girls. Afternoon tea was served by the pupils in the home economics room. In the evening a girls' and boys' athletic exhibition, including tumbling, matwork and pyramids, was presented in the gymnasium. Several dances by the girls were included in the programme. A report of the proceedings appeared in the Belleville daily newspaper, THE ONTARIO INTELLIGENCER, and its conclusion was: "The whole programme was a fine testimonial to the consistent and thorough training received by students of Ontario's School for the Deaf."

A simplified arrangement in three acts of Berta Elsmith's adaptation of the Opera HANSEL AND GRETEL by Humperdinck was presented in the school auditorium for two nights in February, under the direction of Mr. Alec Gordon. The

actors, all deaf, said their lines and acted their parts with an understanding that surprised and pleased the large audiences. A ladies' chorus from a Belleville choir, trained and directed by Miss Leona Riggs, sang several numbers from the opera, and their assistance was greatly appreciated.

### **PRIZE WINNER**

One of our pupils, Flora Clark, fourteen years of age and totally deaf from meningitis since she was seven, received a prize of \$500 and won first place in an essay contest conducted by the International Printing Ink Company of New York. She wrote on the topic "Printing and Free Government," and was in competition with some 20,000 secondary school students, hearing and deaf, in the United States and Canada. It is Flora's intention to continue her education with hearing children in secondary schools.

### **ENTERTAINMENT**

Motion pictures have been provided in the school auditorium on Saturday nights, and religious films have been shown on Sunday afternoons. Monthly parties planned and supervised by teachers for senior pupils have been very popular with the children.

The programme for both boys and girls in the school gymnasium, on the athletic field and on the skating rink, has been well-planned and the pupils have competed successfully with hearing boys and girls in games and field events.

Church groups from all churches attended by our pupils have been very generous in providing entertainment for those attending the respective churches.

### **ATKINSON BEQUEST**

A bequest of \$250 from Arthur Robert Atkinson, late of Wheatley, Ontario, has been used to purchase oil paintings by Manley MacDonald, local artist, to be hung in the halls of the school.

### **REPAIRS AND EQUIPMENT**

Extensive repairs and alterations have been made to school property by the Department of Public Works. The exteriors of the three residences, the main building, the hospital, Wood Hall and the Superintendent's residence have been painted. A new roof on the main building, including all metal work, has been laid. Plastering and painting of the interior of residences and main building are not yet completed. A new mastic tile floor was laid in the dining room and kitchen of the Junior Residence. New hardwood floors have been laid in the boys' and girls' gymnasium. To give greater rigidity a concrete base has been put under the cylinder press in the print shop.

New equipment includes one hundred folding chairs for the school auditorium and calculating machines for the business class. The latter have made possible for the first time the teaching of the use of these machines, which will help the pupils to find suitable employment after leaving school.

Increasing use is being made of group hearing aids in the teaching of speech and language. Greater use is being made of books by the pupils in school and residences. A slight reduction in size of classes in the junior school has provided more time for individual teaching and supervision.

### **STAFF CHANGES**

Numerous changes in the teaching staff in recent years has made the task of training new teachers more onerous than usual. Those resigning have married or have entered University. In September six new teachers, Misses S. M. Evans,

E. V. Gardiner, H. M. McCammon, P. O'Grady, and Messrs. J. Boyd and R. A. Sinclair joined our staff and began their three years' training as teachers of the deaf, taking this training while they are in charge of classes. Mr. C. B. McGuire, who had been bursar for twenty-one years, retired in October and was succeeded by Mr. J. Fred Wilson.

APPRECIATION

The assistance of all members of the staff is greatly appreciated. Special thanks are due to Miss C. Ford, Director of Professional Training, Mr. C. A. Holmes, Assistant to the Principal, and Mr. F. P. Cunningham, Guidance Teacher, for their help and advice at all times in training new teachers, in supervising work in school and shop, and for invaluable assistance in connection with extra-curricular activities.

MEDICAL REPORT

From April 1, 1948 to March 31, 1949 there were 320 admissions to Hospital. Beginning January 6, 1949, there were 69 cases of chicken-pox and from January 16, 1949 there were 24 cases of measles. During this period it was necessary to employ several nurses to deal properly with the large number ill from the two epidemics. During the measles epidemic we were unfortunate in losing one girl with the complication of pneumonia.

In the fall of 1948 all children over ten had chest X-ray. No active tuberculosis was found.

A fractured arm, two dislocations of the elbow, and two fingers amputated at first joints following a crushing injury received treatment during the year.

Seventy-five children were immunized for pertussis, diphtheria and scarlet fever or vaccinated against smallpox.

R. W. Tennent  
Physician

DENTAL REPORT

The following work has been completed during the school term:

Boys: Fillings—(a) amalgam 72, (b) porcelain 21; prophylaxis 64.

Extractions—(a) permanent teeth 15, (b) deciduous teeth 47.

Girls: Fillings—(a) amalgam 68, (b) porcelain 19; prophylaxis 76.

Extractions—(a) permanent teeth 11, (b) deciduous teeth 54.

G. C. Caldwell,  
Dentist

GENERAL STATISTICS  
of  
THE PROVINCIAL  
SCHOOL SYSTEM

A. M. CAMPBELL,  
*Statistician.*

## TERMINOLOGY

**Assessment**—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

**Attendance Efficiency**—The percentage relationship of the actual days attended to the perfect aggregate.

**Auxiliary Classes**—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

**Capital Charges**—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

**Compulsory School Age**—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part-time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

**Consolidated School**—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyances instead of the original one-room school.

**Correspondence Courses**—Reach those more isolated than the school car pupils. They supplement the work of the regular school when remoteness, winter weather, ill-health, or physical disability prevent regular attendance. Twenty-five hundred is an approximate year's enrolment for these courses, which reach from Grade I to X, and are sets of carefully prepared lessons based on the new Course of Studies. A Departmental staff handles this correspondence with extreme promptness, and a pupil's progress depends entirely upon his own efforts. About 75% of these pupils live in Northern Ontario, and 15% of them are of foreign parentage. These courses are entirely free.

**Cost per Pupil-Day**—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

**County Pupil**—A secondary school pupil living within the County but outside any secondary school district.

**District**—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing.

**Enrolment (Net)**—The number of pupils who have attended school during the year, excluding all duplications.

**Fifth Classes**—Grades IX and X in Elementary Schools, doing work similar to the First two grades of Secondary Schools. The majority of these classes are in rural areas.

**Free School Age**—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

**General Maintenance**—Ordinary, current expense, as opposed to capital outlays and debenture charges.

**Inspectorate**—The area under the supervision of a local Departmental representative.

**Kindergarten Primary**—A class combining the work of the kindergarten and Grade I.

**Non-Resident Pupil**—A secondary school pupil who is neither a resident nor a County pupil.

**Public School Section**—A subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

**Resident Pupil**—A secondary school pupil living within the secondary school district.

**School**—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

- (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
- (b) **R.C. Separate**—For the children of Roman Catholics.
- (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

- 1. **Collegiate Institutes.**
- 2. **High Schools.**
- 3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

1. **Technical High School.**
2. **Commercial High School.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

**III. Provincial Technical Institutes**

These offer courses designed to train technicians for positions in industry which are supplementary to, but not in the field of, professional engineering. The admission requirement is secondary school graduation, and the courses are of two or three years' duration. The institutes are owned and administered directly by the Department of Education under the Vocational Education Act, Part II, but close co-operation with industry is maintained through advisory committees, the members of which are appointed by the Minister.

**IV. Professional Training Schools**

- (a) Ontario College of Education (University of Toronto)—for the training of secondary school teachers.
- (b) Provincial Normal Schools—for the training of elementary school teachers.

**V. Special Schools:**

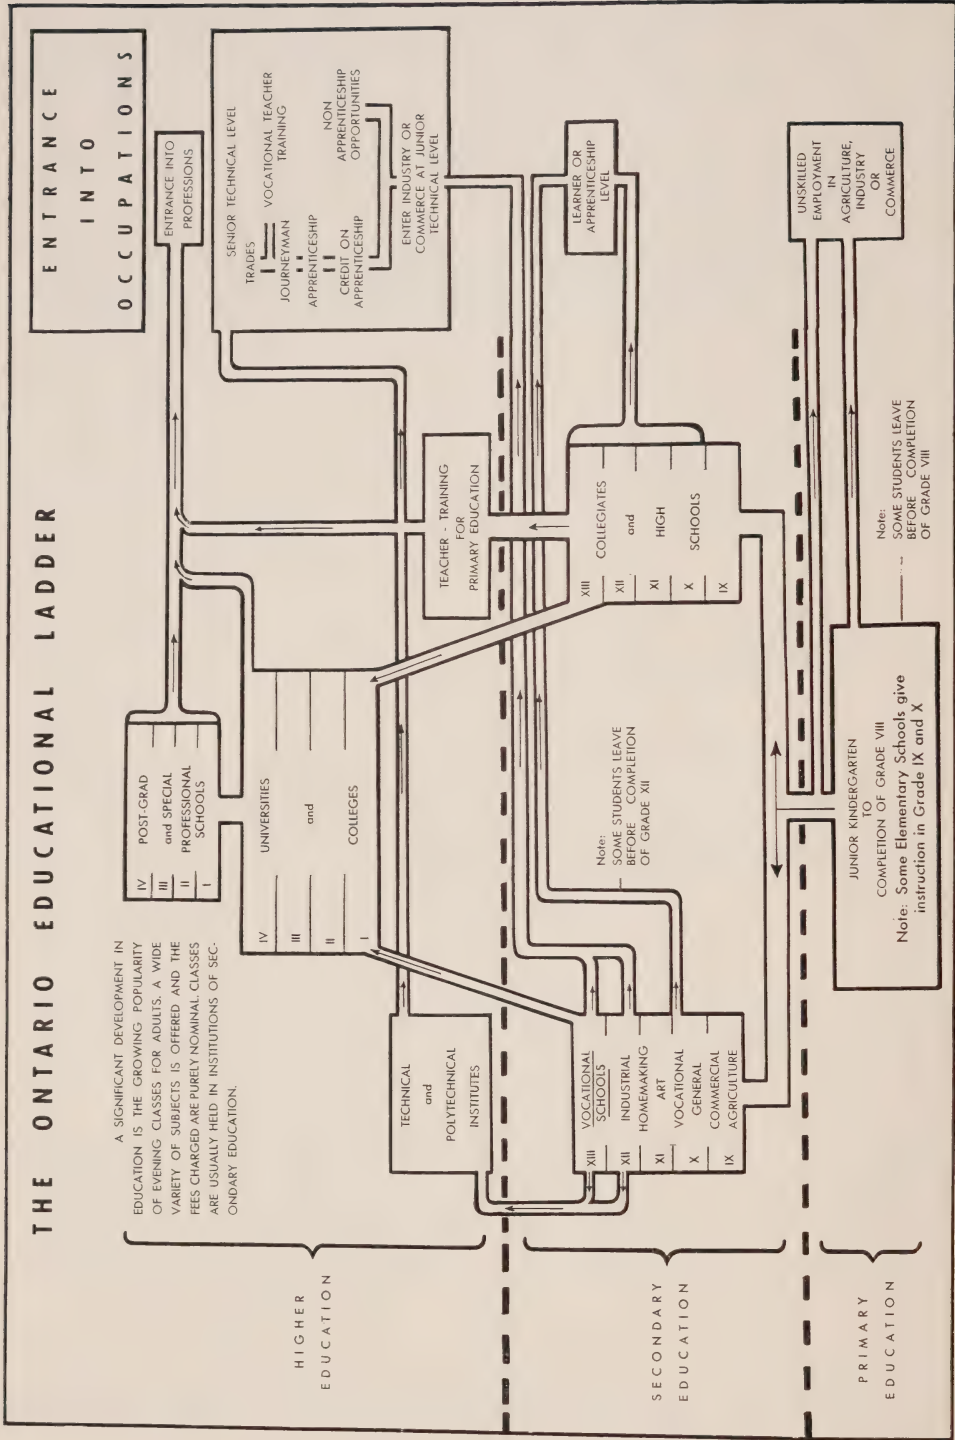

- Ontario School for the Blind, Brantford.  
Ontario School for the Deaf, Belleville.

**School Car**—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of northern Ontario. There are seven of these cars at present, and the length of route ranges from 83 to 221 miles. The route is covered in four to six weeks, and each car is "spotted" for about a week at a time. Problems are solved, work is outlined for the next period, and daily problems of life are discussed. The present enrolment approximates 200, and comprises 10 nationalities. The Department pays all operating costs.

**School Year**—The school year consists of two terms, September 1 to December 22, and January 3 to June 29. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remain on the calendar year basis.

**Secondary School District**—The area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

**Township School Area**—A unit of school administration comprising two or more contiguous rural school sections in the same township or in adjacent townships, or comprising such rural sections along with one or more adjacent villages or towns. See Cir. Elem. 15, "The Township School Area in Ontario."

a—Without duplication.  
b—To elementary schools only.  
c—Includes high school districts without schools.  
d—Includes transportation from secondary school districts without schools, also that paid by elementary school boards on high school pupils.  
e—Includes Sr. Auxiliary.  
f—Includes 499 township area boards, 13 improvement district boards, and 87 boards of education.  
g—Includes 24 union separate boards.  
h—Included with high and collegiate.  
i—Covers current operations, capital charges, capital outlays from current funds, and transportation.

II—ANALYSIS OF CURRENT OPERATIONS, 1948

DEFINITION OF FACTORS:

- Instruction**  
—Actual payments made for salaries of principals and all other teachers (regular, supply, special, including inspectors, Superintendents and Directors employed by the Board )  
**Instructional Supplies**—Supplies, but not equipment, used as an aid in teaching and learning. This includes teachers' supplies, pupils' supplies, text books, library books, films and rental of films, maps, supplies for music, manual training, home economics, agriculture.
- Administration**  
—The business expenses of the board and the secretary-treasurer. This includes salary, office supplies and other expenses of the secretary-treasurer, attendance officer and clerical staff; audit fees, legal fees, postage, advertising, telephone, bank charges on cheques, stamps on cheques; expenses on account of the O.E.A., liability insurance, upkeep of the administration building.
- Plant Operation**  
**Plant Maintenance**  
—The keeping of the school building open and ready for use. It includes the salary, expenses and supplies of the caretaker; fuel, water, electricity, rent, etc.  
—The keeping of the grounds, buildings, furnishings and equipment in a state of good repair. This includes repairs and minor alterations, repainting, redecorating, insurance, care of portable buildings and temporary classrooms.
- Auxiliary Agencies**  
—Activities not directly a part of the main business of instruction yet closely connected with the school. This includes recreational supplies, expenses of school rink, school fair or picnic expenses; prizes or scholarships when paid for by the board; cadet corps expenses; transportation of pupils other than to school; disbursements for hot lunches, cafeteria, etc.

From the 385 cases under observation the following percentages were obtained.

A.A.A.—Average Daily Attendance.

THE SCHOOL  
LEAVING  
GRADE OF  
100 PUPILS

PERSONS TOTAL 100

The diagram reveals the number of drop-outs per 100 pupils through the school grades. For example, 6 out of every 100 pupils drop out at the Grade VII level — completing their school life at this point.

Clearly indicated are the points where large numbers drop out:

- a - At High School Entrance.
- b - At Grade X, when many pupils reach sixteen.
- c - At the end of High School.

Number of elementary pupils who ceased to attend any school without obtaining High School Entrance standing.....	3,695	.....	2,393	.....	4,277	.....	10,365*	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....

Main totals are expressed as a percentage of the grand totals; sub-divisions as a percentage of own class.  
 \*This is 64.3 % of all leaving student life from elementary school.

# PUPIL PROGRESSION

## ENTIRE SCHOOL SYSTEM

## SECONDARY ACADEMIC

Based on Grade IX enrolment for the ten-year period,  
1935 to 1944 inclusive.

## SECONDARY VOCATIONAL

Based on Grade IX enrolment for the ten-year period,  
1935 to 1944 inclusive.

# XIV—PROFESSIONAL CERTIFICATES ISSUED DURING 1947-48

## A(1) Interim Certificates (Intramural)

Training School	Classification of Interim Certificates						Total
	Public and Separate School				High School		
	Primary Specialist	Deferred First Class	First Class	Second Class	Type "B"	Type "A"	
Normal Schools . . . . .	27		966	421			1,414
Ontario College of Education . . . . .					164	88	252
Totals . . . . .	27		966	421x	164	88	1,666
	High School Assistants						
	Type "A"			Type "B"			
Summer Course . . . . .				92			92

x In addition, 221 Deferred Interim Second Class Certificates were issued.

## A(2) Interim Certificates (Extramural)

	Classification of Interim Certificates				Total
	Interim Second Class	Interim First Class	Interim High School Assistant's		
			Type B	Type A	
Teachers who already held lower Ontario certificates . . . . .	5	381	37	32	455
Teachers who had failed in previous years . . . . .	8	40	.....	.....	48
Teachers from other provinces . . . . .	14	19	7	.....	40
Teachers from the British Isles . . . . .	1	12	1	.....	14
Total . . . . .	28	452	45	32	557

## A(3) Interim Certificates in Special Subjects

Subject	Elementary	Intermediate	Supervisor	Specialist
Agriculture .....	57	21	.....	32
Art and Crafts .....	274	97	28	24

A In all Provincially Controlled Schools.

B Commencing with 1943-44 the net enrolment has been taken instead of the May enrolment. Large suburban and semi-urban enrolment is contained in the urban figure.

C This includes the following: Manual Training, Household Science, Auxiliary, Kindergarten, Art, Music, Physical Culture, but excludes Itinerant Music Teachers.

D This includes Third Class, District, Permanent Ungraded, and Temporary.

E Included with Public Schools.

a—Includes 464 Summer Session Interim Seconds.

b—Includes 572 Deferred Seconds in 1943-44 and 297 Deferred Seconds in 1946-1947.

c—Includes 205 Deferred Firsts.

d—Includes 257 Summer Session Interim Seconds.

e—Includes 221 Deferred Seconds.

f—Includes 217 Summer Session Interim Seconds.

g—Includes 228 Deferred Seconds.

This list does not comprise certificates issued to:

(i) those completing Normal School examinations.

(ii) those proceeding to higher certificates.

(iii) those trained outside of Ontario.

## VII—DEPARTMENTAL SUMMER COURSES

### Enrolment by Subjects in recent years

The Summer Courses are conducted by the Department of Education to enable teachers to refresh their knowledge of special subjects, acquire new skills and become acquainted with the latest developments in educational content and method.

Courses	1935	1936	1937	1938	1939	1940	1945	1946	1947	1948

Because of war conditions, the general programme of Summer Courses was discontinued from 1941 to 1944, inclusive. During that period, the following courses were offered:

1942 —Summer Course in Defence Training, Health and Physical Education—925.

1942-43—Winter Course in Manual Training, Type A—40.

1944 —Summer Course in Physical and Health Education and Cadet Training—313.

1944-45—Winter Course in Manual Training Type A—48.

1944 —Refresher Course in Medieval History given during Christmas vacation—45.

\*Visual only. ‡Art only until 1945. †Physical Education only to 1945. §Guidance only since 1945.

**Total 24**

## ABSENTEEISM IN ONTARIO SCHOOLS

Absences from all causes classified by lengths.

## ABSENTEEISM IN ONTARIO SCHOOLS

Rates of absence by months among urban and rural pupils for days lost from all medical and non-medical causes.

Months of the school year are shown by first letter only.

# ABSENTEEISM IN ONTARIO SCHOOLS

URBAN

RURAL

MEDICAL AND NON-MEDICAL

URBAN

RURAL

MEDICAL ONLY

1. Upper Respiratory    2. Digestive    3. Operations —  
Injuries    4. Communicable    5. Miscellaneous

Proportion of all absence attributed to specific causes.

TABLE 3—REPORT OF THE HEALTH SERVICES IN THE PUBLIC,

24. Whitby.....	Ontario.....	Town of Whitby; Twp. of Whitby.....	Whitby, Brooklin.....	5,798,515	6,763	53
25. Whitby East.....	Ontario.....	Twp. of East Whitby.....	Pupils attend Oshawa C.I. and V.S.....	2,768,375	7,000	50

III—SECONDARY SCHOOLS CLOSED

- Year 1946—Continuation Schools—Arkona, Blyth, Chalk River, Drumbo, Fitzroy Harbour, Hensall, Kinburn, Malakoff, Melbourne, Oil Springs, Rockwood, Severn Bridge, Theford, Wyoming.
- Year 1947—Continuation Schools—Alvinston, Burgessville, Embro, Fordwich, Highgate, Ilderton, Mount Albert, Mount Pleasant, Otterville, Springfield, Scotland.  
—High Schools  
—Niagara, Port Rowan.
- Year 1948—Continuation Schools—Caledon East, Delaware, Embro, Odessa, Pakenham, Thornton, Jarvis.  
—High Schools  
—Lobo, Vienna.

TABLE 17—TRANSPORTATION OF PUPILS TO SECONDARY SCHOOLS, 1948-49

(as reported by Principals)

During the school year 1948-49 the number of school pupils transported within the provincial system was approximately 25,000. Some 8,000 of these were public and separate school pupils transported to other elementary schools, while the remaining 17,000 attended secondary schools. A total of \$2,385,446 was spent during the calendar year 1948 on pupil-transportation. Of this sum, elementary school boards spent \$824,497 (Public School Boards \$741,391 and R.C. Separate School Boards \$83,106) on transporting pupils to other elementary schools, and \$544,314 (Public School Boards \$532,115 and R.C. Separate School Boards \$12,199) on transportation to secondary schools. During the same period secondary school boards paid \$1,016,635 on transportation of their pupils. Of this latter sum, \$15,664 was paid by Continuation School Boards. Approximately 75% of those transported to secondary school have the cost paid by secondary school Boards, 20% by elementary school Boards, and the remaining 5% reach school by private automobile. The average route to secondary school is 23 miles long, or 46 miles per day, and the average time taken in the morning is 63 minutes. Approximately 85% of pupils transported to secondary school leave home after 7.30 a.m., have not more than half a mile to walk to catch the bus, travel less than 20 miles to school, and are home again by 5 p.m.

Below is a list of secondary schools throughout the province to which pupils were transported, showing the number carried daily, and the agency bearing the cost.

Note: This Table does not include transportation to cities.

d—Pupils attend Woodstock.

**TABLE 17—TRANSPORTATION OF PUPILS TO SECONDARY SCHOOLS, 1948-49**

The schedule below indicates the maximum rates which the Department will approve for grant purposes in the case of expenditures on transportation for the school year 1949-50.

Maximum Rate Per Mile Per Day					
Class	Passenger Load	First 20 miles	Second 20 miles	Third 20 miles	Over 60 miles
1	1-2	6c	6c	6c	6c
2	3-6	12	10	8	6
3	7-11	20	18	16	10
4	12-17	24	22	20	12
5	18-23	26	24	22	14
6	24-29	28	26	24	16
7	30-35	32	30	28	20
8	36-41	34	32	30	22
9	42-47	36	34	32	24
10	48-53	38	36	34	26
11	54-59	40	38	36	28
12	60 and over	42	40	38	30

However, if on any route, including its feeders, the rates quoted in the above table result in an approved cost exceeding 80c per pupil per day, the maximum approved cost for that route will be reduced to a sum not exceeding 80c per pupil per day.

The schedule is not to apply in the case of transportation of elementary school pupils from a school which is closed where the Inspector has authority to approve expenditures for transportation without reference to the Department.

In the case of transportation provided by public carrier, the actual cost of tickets purchased for approved transportation shall be eligible for grant.

In the case of buses owned by boards, the amount eligible for grants shall be,—

(i) the lesser of the amount actually expended on approved transportation (excluding capital charges and capital outlays from current funds) or an amount based on a rate of 20c per mile; and

(ii) expenditures on the purchase of buses up to the lesser of the actual cost, or, \$150, multiplied by the seating capacity of the bus, subject to the condition that tenders stating the specifications of the vehicle(s) have been called for; and that approval of the expenditure has been given.

All previous instructions as to procedure remain unchanged. All motor vehicles used for the transportation of pupils shall meet the requirements of the Public Vehicles Act and Regulations with respect to licence and insurance.

Number of Candidates who wrote one or more Departmental Upper School papers in 1948—14,613.

### G—COMPLETING CANDIDATES

Information collected from Secondary School principals for the year 1948-49 showed the following:

(a) Number who graduated in 1949, with Graduation Diploma, after completing Grade XII:

Boys—2,857                      Girls—4,222                      Total—7,079

(b) Number who graduated in 1949, with Honour Graduation Diploma, after completing Grade XIII:

Boys—2,593                      Girls—2,243                      Total—4,836

### H—SUMMARY OF HIGH SCHOOL ENTRANCE EXAMINATION, 1948, AS COMPILED FROM THE RECORDS OF THE EXAMINATION BRANCH OF THE DEPARTMENT

(This includes results of candidates from private sources)

Grade VIII net enrolment for the school year 1947-48.....	56,217
Number of High School Entrance Candidates:	
Recommended by Principal on Group II and II.....	32,062
Number taking written tests on Group II and II.....	21,478
	53,540
High School Entrance candidate percentage of 1948 Grade VIII Enrolment.....	95.24%
Number of candidates successful on written test on Group II and II:	
By Regulation 26.....	14,026
27.....	958
28.....	661
29.....	220
37.....	305
	16,170
Total Number of Successful candidates.....	48,232
Percentage of candidates who were successful.....	90.09%
(59.89% by Principals' recommendation and 30.20% by passing written est)

**A section of the cotton department**

This series of views illustrates courses designed by the Provincial Institute of Textiles, Hamilton, for youths looking forward to employment in technical positions in the primary textile industries. All the machinery shown in these cuts has been supplied by the Industry as part of their contribution. A calendar showing organization of the courses and details of the subjects is available.

Frame spinning woollen yarn

Weaving on an automatic bobbin change loom

**Public  
Libraries**

## ADDITIONAL STATISTICS

Number of free public libraries, 1948.....	207
Number of association public libraries.....	263
Total.....	470
Branch libraries.....	41
County libraries.....	12
Average local tax levy per capita.....	59 cents
Ten new Association Libraries were established in 1948.....	

PART III

MISCELLANEOUS

## ENGLISH FOR NEW CANADIANS

The province-wide desire of new Canadians to master our language and the willing co-operation shown by educators is indicated by the number of school boards offering night school classes in English during 1947-48

# **Report of the Minister of Education**

**1949**

To the Honourable Ray Lawson, O.B.E., LL.D., D.Cn.L., D.C.L.,  
Lieutenant-Governor of the Province of Ontario.

Your Honour,

I beg leave to present to your Honour the Report of the Department of Education  
for the year 1949.

Respectfully submitted,

DANA PORTER

Minister of Education

Toronto, November 1, 1950.

## PART I

Counting together some thirty annual reports of Dr. Egerton Ryerson, the Chief Superintendent of Education, and since 1876 the reports of successive Ministers of Education, there have been altogether more than one hundred of these yearly summaries of information on the educational system of Ontario. They unfold a continuous story of progress, and taken together they constitute a complete educational history. The earlier volumes show the one-roomed log building as the typical school-house; the teacher whose only certification arose from a local examination to prove that he was not entirely illiterate; a board of trustees to administer the affairs of a small school section which was practically isolated by the difficulty of transportation and communications. The latest volumes indicate how great the change has been in a hundred years. Building programmes involving millions of dollars, assistance to local authorities by direct legislative grants, township administrative areas and high school districts, transportation of pupils to well-equipped central schools with trained and certificated teachers, these are part of the modern picture of education, and the pages of this report indicate the progress that has been made in these and other directions in the past year.

In the beginnings of our educational system the curriculum was a simple one. In the elementary schools there was reading, writing and arithmetic, while the grammar schools followed the classical tradition of the ancient English foundations. The autonomy of the local authority in these matters was gradually merged in control by the central authority. In the pioneering stage of education this was probably inevitable, and it undoubtedly contributed to the rapid extension of a free school system. New subjects were introduced and the courses of study were defined in increasing detail, though that point was never reached which is exemplified by the boast of an European educational official that by consulting his watch and a calendar he could tell exactly what was being taught in any classroom in the country.

In a gradual movement of this kind it is difficult to tell when the pendulum reaches the end of its swing, but one indicator of educational change is the examination system. With the rigidly defined courses there developed a series of departmentally organized examinations at various levels, of which the number was at a maximum around the turn of the century. Then the number of examinations was gradually reduced and the responsibility for promotion passed to the schools themselves, so that in the past few years there have been only two sets of external examinations. In 1949 announcement was made that the High School Entrance examination, one of the first of the central examinations to be set up in Ontario, would be abolished forthwith. It was made plain that this was a purposeful step in the process of decentralization by the accompanying announcement that transfer of the pupils from one division to another of the school system would be left to the local authority; that part at least of the authority for curriculum planning would be passed to the local level; and that a greater flexibility in school organization would be permitted. A grouping of several grades into a division was suggested as one means to this end. In particular it was indicated that a division which would include grades VII, VIII, IX, and X could be made an effective bridge for the gap between elementary and secondary schools which the Entrance examination had formerly emphasized, and that such a division would furnish a framework for a course of study, complete in itself, which would be suitable for the considerable percentage of pupils who terminate their schooling at this level. It is safe to predict that the next few years will be a period of intense activity in curriculum planning and in experiments in school administration. The freedom accorded the local authorities in these directions will give an opportunity for experimentation. The success or failure of the trials and experiments will indicate how much further and how fast it will be wise to extend the process of decentralization.

This report on the school system of Ontario in 1949 follows the pattern of its predecessors in providing separate reports on elementary education, secondary education and the special branches. This separation makes it easy to find information on specific topics within a particular field, but it does not always help to present a clear picture of the system as a whole. Furthermore, this is a report for a single year, and, unless it is read in conjunction with its predecessors, it will not always relate the momentary picture to the long term movement or educational trend.

One branch of the Department of Education, Community Programmes, appears in a Minister's report for the first time this year. The Community Programmes branch is concerned primarily with adult education and recreational programmes, but there are many ramifications. It has for example developed a very useful organization for assisting in the instruction of newcomers to Canada in the English language and in citizenship. The variety of its activities and the fact that its report appears for the first time justifies the amount of detail that is given.

The tables which by long established custom were incorporated in the reports of the various branches have all been placed in Part II of the report, along with other statistical material. To provide the continuity which is a most valuable characteristic of a series of volumes like these reports, foot-note references to the new locations are supplied wherever tables or summaries have been removed and transferred.

# Elementary Education

## LEGISLATIVE GRANTS

The calculation of grants for elementary school boards in urban municipalities is based on population and for boards in rural areas on assessment per classroom. The total amount paid to elementary boards in 1949 was \$24,102,006, an increase of \$1,838,914 over the figure for the previous year. In an era of rapidly increasing costs, school boards throughout the province have been greatly assisted by these grants and as a result they have been able to provide better school accommodations and improved educational opportunities.

## ADMINISTRATIVE UNITS

A township school area is made up of a number of former school sections. The area may be all in one township or in parts or all of two or more adjacent townships, and it may include a town or a village. By-laws to establish an area, passed by the councils of all the municipalities concerned, must be approved by the Minister of Education before they become effective. Prior to 1949, 499 township school areas had been formed. In 1949 fifteen township school areas were established, and additions were made to twelve existing areas. The establishment of these fifteen areas and the additions to existing areas involved the dissolution of 103 school sections. There are now 3,325 former school sections included in township school areas.<sup>1</sup>

Larger units of administration for separate schools may be established under the provisions of Section 32 of The Separate Schools Act. Before 1949, twenty such units were established replacing 59 former separate school boards. In 1949 four more units were established replacing ten boards.<sup>2</sup>

## TEMPORARY CLOSINGS

When the enrolment in any school becomes so small that it is not economical or advisable to keep the school open, the board concerned is usually willing to close the school and to make arrangements for the pupils to attend nearby schools. Since the pupils will have an opportunity of associating with others of their own age group the transfer is usually advantageous. Fifty-six schools were closed in 1949, more than half of them being schools in township school areas.<sup>3</sup>

## TRANSPORTATION OF PUPILS

Where distance or unusual conditions make it difficult for pupils to attend school the boards concerned often provide transportation to elementary schools. In 1949, 592 contracts for this type of transportation were approved for legislative grant purposes and under these contracts 14,483 pupils were transported to elementary schools.

In most cases where larger high school districts have been formed, transportation for secondary school pupils is provided by the boards of the high school districts. In other parts of the province such transportation is often provided by public or separate school boards. During 1949 approval for legislative grant purposes was given to 505 contracts made by public and separate school boards covering the transportation of 6,748 pupils to secondary schools. The number of rural pupils attending secondary schools has increased considerably since means of transportation have been provided.

---

<sup>1</sup>For tables see p. 181.

<sup>2</sup>For tables see p. 181.

<sup>3</sup>For tables see p. 181.

## **SUPPLY OF TEACHERS**

In the school year 1949-50 there was a noticeable increase in the number of married women teachers employed. Actually there were 4,331 married women teaching in the elementary schools, or approximately one-fifth of the whole elementary teaching group. However, because of the large number of new classrooms constructed, there continued to be a shortage of qualified teachers. Letters of permission were issued to boards to engage 508 persons who had some professional training. During the same period, the school year 1949-50, 561 Letters of Permission were issued to boards for the employment of persons without teacher training experience.<sup>4</sup>

## **CORRESPONDENCE COURSES**

At the end of December, 1949, there were 1,567 persons, unable for one reason or another to attend a regular school, enrolled in the Correspondence Courses. Of these, 1,141 were in Grades I to VIII, 195 were in Grades IX and X, and 231 were in the bilingual courses, Grades I to VIII. During the school year 1948-49, 623 pupils were promoted. Thirty-eight were recommended for High School Entrance standing. Thirty-six were accepted; the other two wrote the examinations and were successful.

Included in the enrolment were 87 adults (21 years of age or older) and 49 inmates of hospitals, reform schools and penitentiaries. Correspondence lessons were also sent to many inmates of similar institutions, where there is a teacher in attendance. Supervision was given in the DVA course in Introductory English to 324 veterans. Correspondence lessons were sent to the children of 36 Ontario families engaged in missionary work in the Arctic or abroad. For six years lessons for Grades IX and X have been sent to teachers in Ontario who were teaching on Letters of Permission and who had pupils in Grades IX and X in an ungraded school. Since September, 1949, over 70 teachers have been so supplied. In 1949 there was an increase in the number of adults enrolled. The additional enrolment was made up mainly of those who were required by their employers to improve their education, and of displaced persons living in Ontario who had had a year's study of Basic English and Citizenship through courses provided by Community Programmes and had then turned to this Branch for a more formal study of English.

## **RAILWAY SCHOOL CARS**

Railway School Cars provide education for pupils living along the lines of the northern railways but so remote from regular schools that they are unable to attend. Six school cars are now in operation in Northern and Northwestern Ontario, three on the C.N.R., two on the C.P.R., and one on the Ontario Northland Railway. The average length of a circuit is 140 miles, and the number of stops is usually four or five. Approximately a week is spent at each stop. Owing to the time lost in moving, the number of visits to each station during the school year is not more than eight. The total enrolment is 150, making an average of 25 for each of the six cars. The teachers hold Ontario certificates, and three are graduates of Ontario universities.

## **SCHOOL HEALTH SUPERVISION**

School health services are now for the most part provided as part of the general public health programme of the local Board of Health, under the super-

---

<sup>4</sup>For tables see p. 183. See also p. 16

vision of the Ontario Department of Health. Only certain school boards which provided medical and dental inspection services prior to 1924 have statutory power to continue doing so. Full co-operation is usually the practice between the local officials of the Board of Health and of the schools, in the interests of guarding and improving the health of the pupils.

## **NEW CONSTRUCTION**

The programme of school construction which began in 1945 continued to expand, and reached the highest peak during the year 1949. In 1949, 107 new elementary schools and 73 additions to existing schools were completed at a cost of approximately \$16,400,000. In addition to the buildings completed, 69 new buildings and 61 additions to existing buildings were under construction at the end of the year.

During the five years since January 1, 1945, 322 new elementary schools, 270 additions to existing schools, and 17 temporary buildings have been completed at a total cost of approximately \$37,227,000. These new buildings have provided accommodation for 63,030 additional pupils.

## **CURRICULUM REVISION**

During the latter part of the year it was announced that a revision of the curriculum was being planned. This revision is to become effective over a period of years. On December 10th the circular "Curriculum: 1" was issued. This circular outlined the suggested changes which include reorganization on an experimental basis of grades into four divisions, abolition of the High School Entrance examination, permissive use of text-books, provision for closer articulation between Grades VIII and IX, an emphasis on Conservation and Map Using, and delegation of greater responsibility for curriculum development to teachers and supervisory officers familiar with the local situation.

## **ADMINISTRATION**

Administrative duties continue to impose a heavy burden on most inspectors, and many of the inspectors serve on committees for revision of curricula and selection of text-books. Many inspectors also teach in the summer school courses. Because of the continued need for the employment in some schools of unqualified or partly trained persons as teachers it is necessary for some inspectors to give a greater than average proportion of time and help to such emergency situations. This supervisory work usually includes special help to the teacher. Tribute is due to the able body of inspectors of the province who have met so well and so generously the requirements of these and other situations.

Group conferences of inspectors and Normal staffs have been continued. These are held at the eight Normal School centres twice in the school year, except in the cases of North Bay and Ottawa, where one longer conference is deemed preferable. Officials of the Department of Education attend these meetings. The discussions make for co-ordinated effort on the part of all field personnel of the Department along the lines of both administration and supervision.

Departmental officials address many trustee groups and public meetings. Sometimes the official opening of a new school gives incidental opportunity for such meetings. These contacts are found of value for acquainting the public with Departmental policy, for discussing general and local school problems, and for obtaining the reaction of the public to aspects of administration.

# Secondary Education

## 1. COLLEGIATE INSTITUTES, HIGH SCHOOLS AND CONTINUATION SCHOOLS

The marked activity in the field of secondary education to which attention has been drawn in previous reports continues unabated.

This activity manifests itself not only in the steadily spreading movement to form enlarged High School Districts and in a province-wide building programme but also in a renewed interest in all aspects of the High School curriculum.

### ENROLMENT

The total enrolment of pupils in the Collegiate Institutes, High Schools and Continuation Schools of Ontario for the school year 1948-49 was 95,663. The number of full-time teachers in these schools was 4,101. Both these figures are higher than for the preceding school year, but the pupil-teacher ratio of twenty-three to one is practically unchanged.<sup>5</sup>

### BUILDING PROGRAMME

The provincial government and the various Ontario municipalities concerned are now well embarked on a major programme of secondary school construction which is accelerating from year to year. For the years 1947 to 1950, inclusive, the expenditure on buildings completed or definitely approved will amount to approximately \$26,000,000. During the calendar year 1948, twenty-seven secondary school projects (new buildings, additions, or temporary structures) were completed, affording normal accommodation to 4,240 pupils, at an estimated cost of \$4,388,000. In 1949 eighteen such projects were completed. These were, on the average, considerably larger schools and were built at an estimated cost of \$7,266,000. It is significant and rather disturbing that in 1949 the secondary school building cost per pupil accommodated was approximately \$1,500.

In 1948 new secondary schools were opened at Bruce Mines, North Hastings (Bancroft), Leaside, Mattawa, Sharbot Lake and South Porcupine. In 1949 the list included the new schools at Eastview, North Essex (Belle River), Exeter, Forest Hill, Gananoque, Listowel, Merlin, East Middlesex (Medway High School), and Tilbury. The 1950 programme for new or additional secondary school accommodation is even larger.

Commitments of the magnitude outlined above, made desirable and indeed necessary by the postponement over the war years of much-needed construction and by the demand for a broadened programme of secondary school training, give reassuring evidence of the interest and faith of the people of this province in High School education. At the same time they emphasize the need for the maximum efficiency in organization and instruction in our schools and for the wisest possible judgment in apportioning money, time and energy between the fundamental needs and other commendable but less important activities of High School students.

### GENERAL COURSE OPTIONS

It is of interest to note the growing acceptance, on the part of pupils and their parents, of the subjects which in recent years have been authorized as options in the general course and have gradually been made available in more and more schools to pupils in Grades XI and XII.

---

<sup>5</sup>For tables see p. 183.

A comparison of the figures for June, 1949, with those for June, 1947, with the obligatory subject of English used as the basis of calculations in each year, shows that the traditional options of Mathematics and Science have declined slightly but are still taken by practically all pupils. (Agricultural Science has gone up from 14.1% to 17.6%; Chemistry has dropped from 88.2% to 82.1%). French has gone back a little, from 92.0% to 89.7% and Latin rather noticeably from 76.7% to 70.4%. German has declined slightly to 6.6% while Spanish holds its own at 4.9%. Greek, unfortunately, still is studied by a mere handful of pupils. About 50 candidates qualified for Grade XII standing in that subject last June.

When we turn to the other permissible choices in these grades, we find that while the number of pupils taking Geography, Commercial Work, General Shop, Home Economics, Music or Art is still small, it is definitely growing in each case. Geography has gone up from 3.2% to 6.0%; Commercial Work from 5.7% to 9.2%; Shop Work from 4.7% to 6.0%; Home Economics from 2.4% to 3.8%; Music from 1.6% to 2.3% and Art from 1.5% to 2.8%.

With the continuing organization of enlarged High School Districts and the increasing availability of instruction in the subjects of this last group, this growth may be expected to proceed at an accelerated pace. Slowly, but with encouraging steadiness, the possibilities inherent in the general course curriculum for adapting High School training to the varying aptitudes and needs of individual pupils are being recognized across the province.

### **SPECIAL INSPECTION OF COMPOSITE SCHOOLS**

The experiment successfully begun in the school year 1947-48 of having certain composite secondary schools visited by two representatives of the inspection branch—one each from the High School and the Vocational School departments—was continued with equally satisfactory results during the past school year. The schools so inspected during 1948-49 were those at Hamilton-Westdale, Kingston, Niagara Falls, Welland, and Weston.

In an inspection of this type, the objective is to view the school as a unit, in an endeavour to determine how skilfully the needs of the individual pupils are being ascertained by the Principal, the guidance officers and the teachers, and how successfully these needs are being met by the various courses of instruction offered and the extra-curricular activities provided.

To this end the Inspectors' attention is directed chiefly to matters of organization and administration; the inspection of classroom instruction is confined largely to teachers who are new to the school. Such questions as drop-out of pupils before graduation, transfer from one department to another, variety of optional subjects, examination and promotion standards, guidance, placement and industrial contacts, evening class programme, the school's relations with the parents and the public generally—all these receive more careful attention than can be given during an inspection of the usual type where the major portion of the time of the Inspectors is spent in the classrooms.

Each year four or five composite schools are being inspected in this way, and the plan, it is expected, will be followed until all schools of this type have been visited.

## **2. VOCATIONAL SCHOOLS**

### **GRANTS AND COSTS**

Statistics show that vocational education has not escaped the persistent upward trend in educational costs. For the calendar year 1948, notwithstanding provincial grants amounting to \$4,090,749 (\$3,527,085 on maintenance and

the balance on capital expenditure), the net cost to municipalities of vocational education rose to \$4,949,902. These figures reflect the high cost of building materials and equipment and progressive increases in the salaries paid to teachers.

The Dominion government continued to make contributions to the provinces, including Ontario, under the terms of the Vocational Schools Assistance Agreement entered into by authority of the Vocational Training Co-ordination Act, 1942. The Dominion government matches the expenditure of the Province up to a specific maximum set forth in the agreement. The provincial expenditure in grants for maintenance alone rose to \$3,527,085, while the federal contribution was again \$589,000.<sup>6</sup> In addition the Dominion made an allowance towards capital expenditures made by school boards for building and equipment projects approved prior to March 31, 1948, giving fifty per cent of the amount granted to municipal school boards by the Province.

## **ATTENDANCE**

The day school enrolment has been fairly stationary in the past few years in the neighbourhood of 32,000.<sup>7</sup> Evening class enrolment on the other hand has had a remarkable growth, from 38,000 in 1946 to 56,000 in 1949. In larger centres where vocational schools exist the appreciation of the adult population for this practical form of help is shown by the regular attendance of the classes. One of the most popular courses is that provided for the training of new Canadians in English and Citizenship. (See also page 35)

## **BUILDING PROGRAMME**

Additions to the St. Catharines and Kitchener schools were officially opened during the year, and in Ottawa a new composite school, Fisher Park School, received its first classes. A composite school for New Toronto and a vocational school for York township are planned.

The heavy building programme for both elementary and secondary schools is linked up with many significant curriculum changes. In most of the buildings under construction and in the old buildings being extended or modernized better provision is being made for instruction in optional subjects such as agriculture, commercial work, home economics or industrial arts. With improved accommodation new equipment is being provided and more teachers of practical subjects are required. In the case of larger units the teachers must be better prepared and more highly specialized. As progress is made along these lines more and more students may expect to receive the specialized courses they require in their home schools.

## **COURSES**

### **1. Agriculture**

Courses in agriculture under Vocational Regulations are being developed in two centres, namely, Belleville and Chatham. While the enrolments are as yet small and confined to rural pupils, there is some indication that these courses are serving a useful purpose, as they are being increasingly recognized by the parents in these areas. The programme for these pupils consists mainly of the usual core of academic subjects, a modified shopwork programme with farm mechanics added, agricultural science, and the study of agricultural topics.

### **2. Commercial**

In Ontario, secondary school pupils are provided opportunities in commercial education through four main channels, which may be indicated as follows:

(a) The Four-Year Course

---

<sup>6</sup>For tables see p. 183.

<sup>7</sup>For tables see p. 183.

A four-year commercial course, leading to the Secondary School Graduation Diploma, is provided in the vocational and composite schools and in the larger collegiate institutes and high schools. This course provides a general education, with specialization in the field of commercial work. While most of the schools offer a general commercial course which fits graduates for a wide range of office positions, a number of the largest schools also offer specialized courses in the fields of accountancy, secretarial studies, and merchandising.

**(b) The Special One-Year Course**

A special one-year course offers a highly concentrated business education to pupils who have completed three or more years of any secondary school programme of studies. It, too, leads to the Secondary School Graduation Diploma.

**(c) The Commercial Option**

High Schools and Collegiate Institutes may offer commercial education, consisting usually of business practice, record keeping, bookkeeping, and typewriting, as one of the options leading to the Secondary School Graduation Diploma in the General course. The emphasis in this instruction is placed upon education for personal use rather than for vocational competency.

**(d) Grade XIII Commercial Studies**

In 1947 examinations in accountancy practice, secretarial practice, and the mathematics of investment were offered at the Grade XIII level. These have been accepted as credits for admission to Normal Schools and to some Universities, and are being continued.

### **3. Home Economics**

Twenty-three new centres for instruction in Home Economics have been opened during the school year, while a number of classrooms in elementary, secondary, and vocational schools have been renovated. As a subject, Home Economics is seldom taught before the seventh grade, but in the primary grades school experiences in personal and home living, when woven into the general school curriculum, give a unity and continuity to new learnings and help the young child to understand the part she must play to make a contribution to her school and home life. In the secondary school, Home Economics is frequently taught in Grade IX and is one of several options which may be chosen by a pupil for credit towards secondary school graduation.

In 1949 Home Economics was taught in 115 vocational schools, in 141 other secondary schools, in Grade VII and VIII classes of 178 elementary schools and in 14 special schools.<sup>8</sup>

### **4. Shopwork**

Shopwork instruction is considered to begin in Grade VII of the elementary school. In Grades VII and VIII the programme is generally known as Industrial Arts, and a variety of media is used, in keeping with the age group of the pupils under instruction.

In the secondary schools, shopwork instruction is provided under two general patterns, one for high schools and another for vocational schools. For the high schools the programme is offered in General Shop, and the records indicate that 110 centres are now established. Many of these offer instruction on an elective basis to the end of Grade XII. When the enrolment in a high school reaches a number where one General Shop is insufficient to accommodate the classes, a second one is established and two teachers are employed who are usually assigned teaching loads according to their interests and training. When greater teaching power in shopwork is required, the plan of instruction follows the vocational school pattern of specialized shops. Vocational schools are established

---

<sup>8</sup>For tables see p. 185.

throughout the cities of the Province either in separate buildings or as vocational units of a composite school which includes a high school or collegiate division. Shopwork instruction in these schools is, for the greater part, organized on an exploratory basis for a two-year period (Grades IX and X), after which specialization takes place in courses in which major and related shop studies form a unit pattern.

## **RESEARCH**

### **1. Commercial**

During the year two important surveys were completed. A report on a five-year study of shorthand instruction in the schools, which was published and made available to those interested in commercial education, evoked much favourable comment. A great deal of interest was also stimulated by another excellent report on Commercial Curricula, prepared jointly by a committee of the Ontario Commercial Teachers' Association and the Educational Policies Committee of the Ontario Secondary School Teachers' Federation.

### **2. Industrial Arts**

The Industrial Arts teachers of Ontario are kept in constant touch with modern trends in education, particularly in so far as they affect Industrial Arts and Crafts. This is accomplished by means of a publication, *THE BULLETIN*, with a circulation of 350 copies, published twice a year in December and March. A Research Committee has formed regional groups which hold monthly meetings to discuss current problems of interest.

### **3. Industrial**

The Research programme for the Industrial and Technical Section, O.E.A., is under the direction of the Technical Research Council. The annual report submitted by this Council indicates the following major accomplishments for the year:

- (a) the preparation of a curriculum brief, in co-operation with the Educational Policies Committee of the O.S.S.T.F., for submission to the Department of Education,
- (b) the further development of a plan for improved co-ordination between technical education and the industries which it serves,
- (c) the operation at Balsam Lake each June of a Conference for the purpose of maintaining interest and progress in improved methods of instruction,
- (d) the maintenance of
  - (i) a Technical Bookshelf in the Legislative Library of more than five hundred volumes of recently published literature, donated by the various publishers,
  - (ii) a very complete library of Audio-visual Aids for the special use of technical education teachers,
- (e) the publication of the *TECHNICAL DIGEST*, which is distributed to technical teachers throughout the Province.

## **TEACHER TRAINING IN SERVICE**

Summer courses provide the chief opportunity for teachers to improve their qualifications. In Agriculture 47 teachers qualified for certificates as follows: Elementary I, 13, Intermediate I, 16, Intermediate II, 15, Inspectors, 3.

The shortage of qualified Commercial teachers remains a problem which, by present indications, will continue for some time to come. There was however an increase of over twenty per cent in the enrolment of teachers at the summer school in commercial subjects, and 13 teachers completed the requirements for the Commercial Specialist's certificate, 28 for the Intermediate Commercial certificate, and 13 for the Elementary Commercial certificate.

In Home Economics 53 teachers qualified for the Introductory Elementary certificate, while 17 received the Elementary Type C, Part II, and 13 the Elementary Type B, Part II.

In Industrial Arts and Crafts 117 certificates were awarded as follows: Elementary Type B, Part I, 23, Part II, 9, Elementary Type A, 20; Specialist, Part I, 14, Part II, 13, Part III, 38.

In addition Saturday classes leading to Type B certificates were held at two centres; at Ottawa for 27 and at Sault Ste. Marie for 18 candidates.

## **PROGRAMME REVISION**

In recent years, since the close of World War II, an opportunity has been offered for a closer study of some factors which affect the efficiency of vocational education generally. Among these may be listed: (a) the need of a better liaison with industry and business and (b) a study of "drop-outs," or students who do not remain in school to graduate.

The matter of closer co-operation with industry in general is being considered by commercial and technical teacher organizations functioning under the Ontario Educational Association, while many direct contacts have been made at the Provincial level with associations interested in employing vocational school students.

In order to improve the "drop-out" situation new two-year programmes of study are being planned, making better provision for those students who must leave school at or about sixteen years of age. It is expected that these programmes will be introduced on an experimental basis in centres where the need is greatest and where suitable accommodation and teaching staff are available.

## **3. PROVINCIAL TECHNICAL INSTITUTES**

### **PROVINCIAL INSTITUTE OF MINING, HAILEYBURY**

In December, 1948, a class of eleven veterans completed a two-year course at the Provincial Institute of Mining, Haileybury, and the year 1949 opened with an enrolment of 43 students. In May, a class of 18 students completed a two-year course. In September, the Institute reopened with an enrolment of 31 students in the two-year course, and 13 students in the three-year course.

Good opportunities for mining technicians continued, and all graduates obtained positions, the majority in the survey and engineering offices of the mines, geological departments, assay offices and mills.

### **PROVINCIAL INSTITUTE OF TEXTILES, HAMILTON**

In September, 1949, the Provincial Institute of Textiles reopened with an enrolment of 35 students, 11 in the first year, 11 in the second year and 13 in the third year. In October the Evening School reopened with an enrolment of 165 representing 36 textile firms located in Acton, Brantford, Dunnville, Galt, Hamilton, Hespeler, London, Milton, Paris, Preston, Toronto, Waterford and Welland.

To assist the Institute the textile industry has contributed a sum of \$110,000 of which \$70,000 has now been spent on new equipment. In addition, a number of firms have donated items of new (\$6,500) and used equipment, classroom supplies and scholarships or bursaries. The machinery manufacturers have extended discounts to the value of \$20,000.

The courses at the Institute cover the various phases of knitting, weaving, the cotton system, the woollen and worsted systems, and textile dyeing and finishing.

## **LAKEHEAD TECHNICAL INSTITUTE, PORT ARTHUR**

The Lakehead Technical Institute commenced the first year of the Technical Mining Course in January, 1948, with an enrolment of 6 students under two instructors. When classes reconvened in September of the same year the Mining course was extended to include the second year, and instruction in Technical Forestry, Arts and Applied Science at first year university level was added to the courses of study. The enrolment was markedly increased, 50 students taking advantage of the facilities.

The opening of the fall term in 1949 permitted the Institute to continue instruction in both years of Technical courses and the first year of the established university courses, and to add a course in professional forestry at university level. This resulted in a further increase in enrolment to 137 day school students and 103 evening school students.

The mining and forest industries have been wholehearted in their support of the technical courses, making available adequate summer employment for the students, taking an active part in shaping the curricula and providing permanent employment for the graduates.

The universities of Ontario and Manitoba have granted recognition to the academic courses and have accepted the Lakehead Technical Institute graduates into advanced standing upon recommendation of the staff.

It is the intention of the Institute to continue under present arrangements with any additions deemed advisable so long as the demand is supported by adequate enrolment.

## **RYERSON INSTITUTE OF TECHNOLOGY, TORONTO**

The Ryerson Institute of Technology, officially opened on September 22, 1948, is a polytechnical type of institution offering tuition on the Junior College level. Its curriculum, consisting of courses of both two and three years' duration, includes Architectural Draughting, Costume Design, Electronics, Food Technology, Furniture Design, Gem Setting, General Mechanical, Horology, Industrial Chemistry, Interior Design, Jewellery Design, Journalism and Publicity, Mechanical Draughting, Metallurgy Technology, Photography, Printing and Publishing, Radio Broadcasting, Retail Merchandising, Tool and Die Making, Tool Design and Welding Technology. The equipment of the Institute is valued at more than \$1,500,000.

With the reopening of the Institute in September, 1949, the enrolment increased to 541 full-time day school students, 273 part-time day school students and 1,530 registered in the evening classes.

In addition to offering courses of its own, the Ryerson Institute co-operates with other Departments of the Provincial Government and the Dominion Government in providing facilities for certain types of training:

(a) The Provincial Department of Labour:

Apprentices in the building trades, the millroom trades and the motor vehicle repair trade.

(b) The Provincial Department of Health:

Nursing assistants.

(c) The Dominion Government:

Special courses for groups of Army personnel.

The Institute also co-operates with the University of Toronto by providing instruction in certain crafts to students registered in the Occupational Therapy courses and in Food Technology to students registered in the Institutional Management course.

It is proposed to offer in September, 1950, three additional courses, Applied Electricity, Food Administration, and Home Economics.

# Professional Training

## ENROLMENT

The eight provincial Normal Schools had a total enrolment, for the 1949-50 session, of 1,481 students, of whom 377 were men.<sup>9</sup> At the same time the enrolment at the Ontario College of Education, including Library, Home Economics, Vocational and Industrial courses, was 470, only twelve less than in the previous year.

Enrolment figures of the Normal Schools over the ten-year period 1939-49 show decreases throughout the first five years and increases throughout the second five years. At the outbreak of the war in 1939 the total enrolment in the eight Normal Schools was 1,247. The trend in enrolment for the next five years was downward: 1,131; 1,112; 938; 882; 765; then upward from 1945 to 1949: 1,019; 1,165; 1,246; 1,260; 1,481. An influx of ex-servicemen accounted in part for the upsurge in 1945 and 1946, just as the decrease in their number was the reason for the virtual halt in 1948. A steady increase is noted, however, in the number of students entering Normal School directly from Grade XIII. This resulted in an increase in enrolment of 221 students in September, 1949.

The University of Ottawa Normal School has yet to attain its pre-war enrolment of 185 in 1939.

Of the total enrolment in Normal Schools, men constituted 25.4 per cent in 1949, as compared with 23.4 per cent in 1939. In the intervening years the percentage dropped to a low of 6.2 in 1943 and rose to a high of 35.3 in 1946.

## TEACHER SUPPLY

There is still a shortage of teachers for the elementary schools, and it has been necessary to adopt a number of palliative measures. Some vacancies were filled by granting letters of permission to partially trained or untrained teachers. Furthermore, in September, 1949, applicants holding standing in five Grade XIII papers, including either English Literature or English Composition, were regularly admitted to the Interim First Class course at Normal School. As of that date, also, teachers who had received Deferred Interim First Class certificates during the period 1943 to 1949, since when admitted to Normal School they had had standing in from five to seven Grade XIII papers only, became eligible for Interim First Class certificates, subject to the condition that they held standing in at least one English paper.

Normal School summer sessions were again held at Toronto and North Bay Normal Schools. Applicants for the course were required to hold at least Middle Schools standing, and to have taught in Ontario for at least five months on a Letter of Permission. The courses consists of two summer sessions, each of six weeks, and at least six months' successful teaching experience is required between the first and second sessions. Successful candidates, 69 at North Bay and 166 at Toronto, received Deferred Interim Second Class certificates at the end of a first summer course in 1949. At the same time Interim Second Class certificates were awarded to 63 and 154 candidates who completed a second summer session. See also p. 7.

## MEDICAL EXAMINATION

As a result of the medical examination of applicants to the Normal Schools and the Ontario College of Education during the year, six applicants were rejected and thirty-two were required to waive disability privileges under the Teachers' Superannuation Act. The cost of this medical examination was met partly by fees paid by the students and partly by the Department of Education and the Teachers' Superannuation Commission.

<sup>9</sup>For tables see p. 185.

# Schools Attended by French-Speaking Pupils

## TEACHER SUPPLY

In 1948-49 there were 154 teachers-in-training at the University of Ottawa Normal School, 17 of them were enrolled in the First Class course and 137 in the Second Class course. As a result of the term and final examinations 17 students were awarded First Class certificates, and 123 obtained Second Class certificates.

There were, in this school year, 1,733 French-speaking teachers employed in the elementary schools. Of this number 1,497 or 86.38% held First or Second Class certificates.<sup>10</sup>

## SECONDARY SCHOOL CLASSES

The total enrolment of French-speaking students taking advanced French courses in secondary schools was 2,189. There were twenty-five schools in which these courses were provided, including the newly established Eastview High School which was opened in September, 1949, with an enrolment of 247 French-speaking students.<sup>11</sup>

To give a complete picture of the secondary school enrolment it should be added that, besides the 2,189 students reported above, there were 1,447 French-speaking pupils enrolled in Grade IX and X classes of elementary schools and 1,571 French-speaking students attending inspected private secondary schools in Ontario. Inspected private schools may recommend their students who are candidates for Grade XII certificates or the Secondary School Graduation Diploma.

## ELEMENTARY SCHOOLS

There were 50,496 French-speaking pupils enrolled in separate and public elementary schools in 1949, an increase of 1,549 over the preceding year. The total of 50,496 includes 1,447 students in Grade IX and X classes in elementary schools, and 181 pupils in auxiliary classes.<sup>12</sup>

## CORRESPONDENCE COURSES

In June, 1949, ended the seventh school year in which correspondence courses for French-speaking children of Ontario were given by the Department of Education. All the courses for pupils of Grade I to Grade VIII have been available since September, 1946.

The French-speaking enrolment during the school year 1949-50 was 317 pupils, divided as follows: Grade I, 62; Grade II, 68; Grade III, 46; Grade IV, 34; Grade V, 32; Grade VI, 30; Grade VII, 23; Grade VIII, 22.

The slight decrease in this total enrolment compared with that for 1948-49 was caused, no doubt, by the establishment in recent years of additional schools in many parts of the Province.

---

<sup>10</sup>For tables see p. 186.

<sup>11</sup>For tables see p. 186.

<sup>12</sup>For tables see p. 186.

# Agriculture

## AGRICULTURE

Agriculture is an optional subject in elementary and secondary schools and special grants are paid to boards under departmental regulations. Farming procedures and the production, processing and marketing of farm products form a part of the school curriculum. A sympathetic attitude towards agriculture is thus developed and a recognition of its importance in the national economy.

## ELEMENTARY SCHOOLS

In elementary schools Agriculture may be taken as an optional subject in Grades VII and VIII, and if the teacher holds a certificate in Agriculture special grants are paid. In the school year 1948-49 reports on agriculture teaching were received from 1,734 schools, of which 1,413 were rural, and grants were paid to 852 schools. There were 444 schools with school gardens, and the number of teachers with certificates in Agriculture was 904.<sup>13</sup>

Since 1938 agricultural topics have been included in the course of study in Natural Science for Grades IV, V and VI and in General Science for Grades VII and VIII. For these courses no special certificate is required and, as no reports are made, it is impossible to determine to what extent agricultural topics are taught.

Interest in school ground improvement is being maintained. There were more entries in the provincial competition in 1949 than in any previous year, and 992 schools reported actual improvements. School Fairs are held in some parts of the province, chiefly in northern districts. These are conducted by local committees acting with the Agricultural Representative and the Inspector. In several township areas itinerant teachers of Agriculture visit the schools. Many pupils have had a part in reforestation projects and tree planting with the encouragement of teachers and boards. In general it may be said that interest in agricultural instruction is being well maintained in many areas.

## SECONDARY SCHOOLS

Instruction in agriculture in secondary schools is provided in two ways. Courses in Agricultural Science may be taught in Grades IX to XII as alternatives to the regular science courses. Many of the smaller schools serving rural areas find that these courses meet their needs and are within their resources. Thirty-eight schools provide these courses in Grades IX and X only, and 142 schools have them in Grades IX to XII. This system where it is in operation seems to meet with approval and the boards concerned have been ready to provide reference books, periodicals and equipment.

Where a more elaborate organization is possible it is provided under the regulations which permit a Department of Agriculture in a secondary school. In this case the programme includes a two-year general course through Grades IX and X with instruction in Agriculture and Shopwork for boys and in Home Economics for girls. Commercial work is optional with the languages in Grade X. Since 1944 66 schools have organized departments of agriculture.<sup>14</sup>

It is worthy of note that since 1944, when the revised programme for schools with Departments of Agriculture was introduced, the attendance in most of the schools shows an increase largely due to the fact that rural school pupils are receiving instruction in practical subjects in which they are directly interested.

In these schools the importance of farming and the knowledge which is re-

---

<sup>13</sup>For tables see p. 189.

<sup>14</sup>For tables see p. 189.

quired by farmers is a part of the regular curriculum. As a result, pupils who have an opportunity to remain on the farm receive, through their studies, a broader view of the possibilities in farming and its importance in the modern world.

It should also be noted that the following activities have been a feature in all schools in which a department of Agriculture has been introduced:

- (1) The serving of a hot lunch and teacher supervision during the lunch hour.
- (2) The increased use of the school as a community centre.
- (3) The holding of an "Open Night" or "Achievement Day" each year. Parents, trustees and others visit the school on these occasions in large numbers. This creates a great deal of valuable publicity in the community.
- (4) Provision for visits to homes of pupils by the Principal and teachers in connection with home project work. This has fostered greater co-operation and understanding between parents and members of the staff.

## TEACHER SUPPLY

There is still a shortage of teachers, mainly in smaller schools. The need for additional teachers is being partly met by Ontario Agricultural College graduates who attend the College of Education (12 this year) and through Summer Courses in Agriculture held at the Ontario Agricultural College. The number of teachers granted permission, 17, is seven more than last year. This is due to the need of teachers for classes in some larger schools and to changes in staff in several smaller schools.<sup>15</sup>

## PRACTICAL WORK

There are now 31 schools with special Agricultural classrooms. Practice at schools is provided in gardening and experimental plots in 140 schools; in care of poultry during the winter and raising chicks in the spring in 64 schools; in beekeeping in 52 schools; in greenhouse practice at 3 schools. Buildings for agricultural purposes have been built at Blenheim and Palmerston, and another is under construction at Elmira. In addition provision is made for supervising home projects of an economic nature by the teacher during the summer months. These projects include activities in calf clubs, poultry clubs, home garden clubs, swine clubs, grain clubs and similar practical farming operations, which in several areas are carried on jointly by the teacher of Agriculture and the Agricultural Representative. Several thousand pupils attended the Royal Winter Fair in November by arrangements made by the General Manager with the Deputy Minister of Education.

## CONFERENCES

A conference of agricultural teachers was held at the Ontario Agricultural College on July 27-28-29, during the fourth week of the summer school. Some 60 teachers attended representing 46 schools, 31 of them which have departments of Agriculture. Lectures were given by members of the college staff on Conservation, Horticulture, Animal Husbandry, Poultry, Dairying, Agricultural Engineering, Soils and Field Husbandry. Sessions for discussion were also held each day.

Regional Conferences of agricultural teachers were begun in the fall of 1949 at Port Perry on November 5th, at Smiths Falls and Palmerston on December 3rd. Conferences were also held at Tilbury on February 4th and at Oakville on March 4th.

The attendance at the conference represented from 50% to 85% of the teachers in each area. All enjoyed the opportunity of discussing mutual problems and learning what was being done in other schools. It is intended to continue these Regional Conferences annually.

---

<sup>15</sup>For tables see p. 189.

At Palmerston 43 pupils took part in the Perth County ploughing match. An inter-school ploughing match was held between Seaforth High School and Clinton Collegiate Institute, and pupils of Drayton High School had a ploughing competition of their own.

Co-operation between the Agricultural Representative and teachers of Agriculture is increasing. In many areas a larger number of pupils are engaging in club activities under the Department of Agriculture.

## **SUPERVISION**

Inspection of the schools with departments of Agriculture is divided between the two inspectors of Agriculture and one of the high school inspectors. Schools not included in general inspections but where classes are taught Agricultural Science are visited by one of the Agricultural inspectors.

## **TEACHER TRAINING**

Instruction in Agriculture is a part of the regular course at Normal Schools. The instructors are capable and a good course is given as far as the time allotment on the Normal School programme will allow. Normal School students who have taken four years of Agricultural Science during the High School course are eligible for the Interim Elementary certificate on completion of the Normal School course. Others must attend summer courses to secure the certificate.

The enrolment in the summer school for 1949 was as follows: Elementary I, 13; Intermediate I, 16; Intermediate II, 15; Inspectors, 3; total 47. The Specialist and Farm Mechanics courses were not offered.

# Art

## SUPERVISION AND TRAINING

A number of Art education workshops have been organized throughout the province and teachers, both rural and urban, have participated in the activities. Lectures, discussions and practical work in Art and Crafts have been included in the programme, and slides and motion pictures have been used effectively. In the provincial Normal Schools attention has been given to the subject of Art education.

The summer course in Art has proved to be so popular that it has been necessary to limit the enrolment to 500 and to turn away some applicants. In addition to teachers in service a number of workers in Community Programmes were admitted to the summer course and given practical work and special lectures pertinent to their problems.

## PUBLICATIONS

Two reports, made by the Art Branch in co-operation with the Essex School Art Unit of the Toronto Board of Education, have been distributed to all inspectors. The first report, **PICTURE MAKING BY CHILDREN OF AVERAGE ABILITY IN THE ELEMENTARY SCHOOLS OF ONTARIO**, described the normal methods and standards of achievement of children in Grades I to VIII. Over 400 children took part in the work, and pictures were submitted for study from 122 inspectorates throughout the province. The second report, **CATALOGUE OF ILLUSTRATIVE MATERIALS AND VISUAL AIDS FOR ART AND CRAFTS EDUCATION**, listed the materials available relative to the methods outlined in the first report.

The Essex School Art Unit, organized jointly by the Department of Education and the Toronto Board of Education in 1948, has continued to make investigation of problems connected with Art education in Ontario. During the past school year "Art and the Adolescent," and "Art and the Kindergarten Child" have received attention. When the investigations in these fields are completed reports will be forthcoming.

## SPECIAL PROJECTS

Classes for exceptionally gifted children continue to be held in the Ryerson Institute of Technology. A carefully selected group of children is given special instruction each Saturday morning from October to March. A report regarding the achievements of these children will appear as soon as sufficient data have been gathered.

Officials in charge of the Trinity Class for Limited Learners in Kirkland Lake have kindly co-operated with the Art Branch in conducting experimental work in art for the pupils enrolled in this class. The purpose of the experimental work is to discover the forms of expression in art of which limited learners are capable. A general report will be forthcoming after sufficient research has been conducted.

# Audio-Visual Education

## TEACHER TRAINING

A summer course in Audio-Visual Aids was held in Toronto during July and August. Teachers were given an opportunity to become familiar with the various types of Audio-Visual Aids. Demonstration lessons illustrating the approved techniques for classroom utilization were given by experienced teachers. Training and practice in the operation of all types of Audio-Visual equipment received considerable attention.

## SCHOOL BROADCASTS

A programme of eighty school broadcasts covering thirteen different school subjects was prepared for use in the elementary and secondary schools in the province. These broadcasts were presented in co-operation with the Canadian Broadcasting Corporation over a series of seventeen local stations. A teacher's manual outlining the programme was distributed to all Ontario teachers in September.

Most of the school broadcasts were planned for one specific grade level this year. This change was effected as a result of recommendations of groups of teachers, and has apparently resulted in greater teaching effectiveness as reported by school listening posts.

Two surveys of the educational value of these broadcasts were made during the year. Helpful suggestions and criticisms were received, and several changes in the general format of the broadcasts were effected as a result of these surveys.

As a result of favourable comments from teachers, the policy of correlating visual aids of all types with school broadcasts was instituted. Possibly the most effective type of correlation was in the field of such non-projected aids as posters, pamphlets, picture sets, and booklets.

Special arrangements with the British Broadcasting Corporation resulted in a programme of twenty-four British school broadcasts being offered to Ontario schools on Thursdays from October to April. Every effort was made to choose those broadcasts that would correlate closely with the Ontario programme of studies.

## FILMS AND FILMSTRIPS

There are approximately 1,400 schools registered with the Visual Education Branch for film service and depending largely on this service of supply of educational films. The use of films has shown an increase over the previous year, and sound and silent films were shown to a total audience of 5,637,423 students.

A supplementary film catalogue was prepared during the year and distributed to schools using our educational films. This catalogue contained descriptions of 130 new films recently added to the library and correlated with the programme of studies.

Basic lists of recommended filmstrips for elementary and secondary schools were prepared and included in the Visual Education catalogue. Many schools are now establishing their own libraries of filmstrips.

# Auxiliary Education

The Province of Ontario established mental hospitals, industrial schools, and schools for the deafened and blind before 1900. Beginning in 1910, under an act passed by the Legislature, day classes for retarded children were established in the city of Toronto. Since that date 543 day classes have been organized in the cities and towns. Besides providing for the mentally backward or academically retarded, the larger municipalities through their boards of education have organized day classes for the deaf and hard-of-hearing, the crippled, the hospitalized, the home-bound, and the children with defective sight.

Day classes have been developed to provide for a distinct need at a cost which is a fraction of hospital or residential types of education. Along with the development of day classes, there has been a weakening of the stigma which attached to the blind, the deaf, the crippled and the school failure. This changed reaction of the public is one of the greatest triumphs of modern education. Along with the kindergarten and the nursery school, the special schools have contributed much to the improvement of teaching methods and materials of instruction.

## URBAN ORGANIZATION

In the year 1949, as a result of surveys conducted by the Auxiliary Education Branch or the teaching staff in the municipality, the following classes were organized: Handicraft classes, 4; Opportunity classes, 3; Partial Opportunity Classes, 2; Remedial Opportunity classes, 7; Sanatorium classes, 8; Orthopaedic classes, 9; Speech Correction and Lip Reading classes, 4.<sup>16</sup>

## URBAN SURVEYS

Surveys of hearing were conducted by the officials of the Auxiliary Education Branch with the assistance of the resident inspectors and the local speech correction teachers in Fort William, Guelph, Port Arthur and Smiths Falls. Surveys of hearing commenced in previous years were continued under local direction in Brantford, Hamilton, Kitchener, London, Ottawa, Windsor, and York Township.

The Child Guidance Clinic opened in Toronto by the Board of Education has operated with outstanding success for one complete school year. The Child Guidance Clinic provides for the Toronto schools both diagnostic and remedial services for children who have learning difficulties.

In September, 1949, at the request of the Ottawa Separate School board, the officials of the Auxiliary Education Branch assisted by Dr. F. J. McDonald and two special class teachers staffed an educational clinic for one week to serve the English Separate Schools. Educational problems were discussed with the teachers and parents concerned.

## RURAL SURVEYS

At the request and with the personal assistance of inspectors the Auxiliary Education inspection staff examined 667 pupils in small schools which do not have any psychological service. In the last five years there has been a notable increase in the number of pupils reported for a rural survey.<sup>17</sup>

## CLASSES FOR CRIPPLED CHILDREN

From 1926 to 1948 educational provisions for the crippled child remained unchanged at a total of seven classes. There were orthopaedic classes in Toronto

---

<sup>16</sup>For tables see p. 189.

<sup>17</sup>For tables see p. 189.

and Ottawa to which crippled pupils were transported by school bus. In all other parts of the province home instruction classes and units provided for the school needs of crippled children. Although the Auxiliary Classes Act states the limitations clearly, in some places educational facilities were denied to cripples unless psychological tests indicated that their probable achievement would be three grades higher than those who are admissible to Opportunity Classes.

In 1949 the number of classes was increased to seventeen by the efforts of public and private agencies. The educational officials of the cities of Hamilton and London conducted their own surveys with the assistance of the Cerebral Palsy Parent Councils and the medical profession. In Toronto one teacher was added to the staff of Wellesley Orthopaedic School. The Ontario Society for Crippled Children opened Woodeden Hospital for cerebral palsied children aged three to six, and under the Public Schools Act and the Auxiliary Classes Act established an orthopaedic school. The Variety Club under the same Acts opened Variety Village, and established there an Habilitation School for crippled adolescents aged seventeen and eighteen, with a staff of five teachers. Cerebral palsy surveys of Windsor, Chatham and Kent County were conducted jointly by private agencies, the medical authorities and officials of the Auxiliary Education Branch with the help of the resident inspector and local teachers. As a result the Windsor Board of Education provided a teacher for the crippled children attending the Red Cross Workshop for occupational and physical therapy.

### **SPECIAL SECONDARY CLASSES**

Over a period of five years both the special secondary class and the secondary academic-vocational class for maladjusted pupils have displayed a capacity for holding maladjusted pupils in school. While pre-vocational classes or special classes taking instruction in Grade IX subjects have held less than 20% of the enrolment for the full year, the Grade IX C at the Fort Frances High School has held 90% of its pupils and the academic-vocational class in the Toronto Technical School 75%.

Thus far, experiments in Fort Frances and Toronto indicate that failing, frustrated and maladjusted pupils of the age for admittance to secondary school can be instructed and readjusted successfully where the following conditions are provided:

- (i) a sensitive teacher with experience in individual teaching in an elementary handicraft class is employed to teach the academic subjects,
- (ii) the course is designed to allow the student to commence his work in reading, languages, mathematics and social studies at or slightly below his actual individual achievement levels,
- (iii) the school has provided learning materials suited to each student's achievement levels,
- (iv) the student does not have to adjust to more than five teachers weekly,
- (v) the teacher organizes groups small enough to permit the use of individual instructional methods,
- (vi) the Grade IX C Class does not go as a unit to the shops or to physical education, but is broken up into several groups which are each attached to one of the regular Grade IX classes.

### **TEACHER TRAINING**

Prior to 1940 teachers of all special or auxiliary classes were trained by one summer course of five weeks' duration. Because teachers felt the need of further training, a refresher course of five weeks was provided and proved both popular and useful in training experienced special class teachers.

After 1945 this refresher course was reorganized and became the requirement for the Intermediate certificate in Auxiliary Education. All teachers who had been appointed supervisors or school psychologists in charge of special education immediately secured the second certificate or equivalent qualifications.

The supervisor of special classes must be a skilled teacher, well-versed in diagnosing and correcting the disabilities of handicapped pupils. This means that he must be competent to administer and interpret tests, to plan and carry out remedial instruction in many educational areas, and be generally proficient in the special procedures, sources and resources needed for all types of instruction.

The course<sup>1</sup> for Supervisors and Specialists was planned as a third summer course for both elementary and secondary school teachers to give practical experience in resolving the actual instructional difficulties of real pupils enrolled in the Remedial Class. Thirty-three teachers enrolled in the course in which the daily sessions were one hour on Supervisory Practice, two hours of teaching individual pupils, one hour on Clinical Discussions, and one hour on Educational Problems.

# Guidance

The organized guidance service begun in Ontario in 1944 has expanded more rapidly than was anticipated, and guidance is now accepted as a necessary part of every large secondary school. In smaller schools the service can be offered in a more informal way because of the natural opportunity there for friendly help; but there too provision must be made to ensure that students and their parents get the information and the help they need. With the information that is available to such schools, and particularly with trained leadership, adequate help can be given.

## INFORMATION

Early misconceptions of guidance as a programme of testing and prescription are giving way to better understanding of its scope and its limitations. It is now more commonly understood that its first responsibility is to give factual information about such matters as choice of course in high school, training courses available beyond high school, university entrance requirements, training and personal qualifications for entry into various occupations, occupational outlets, and occupational trends. A second responsibility is to help each student to some understanding of his skills and weaknesses, so that he can make plans for a course of action that will offer a reasonable chance of satisfaction.

The Grade IX course in Occupations is still the only part of the guidance service required by regulation of the Ontario Department of Education. It is a practical and economical way of reaching all Grade IX students with some general information about the occupational world and preparation for it. It serves also to suggest to them the need for further individual planning, and the chance for help through counselling.

Schools are gradually developing valuable files of information about occupations and about training opportunities. Information of great value has been contributed by business and industry, by various professional groups, the universities, and the federal government. Special mention should be made of the occupational studies prepared and sent by the Economics and Research Branch of the Federal Department of Labour. This material is distributed to the schools through the Mailing Service provided by the Vocational Guidance Centre of the Ontario College of Education.

Many other means are being used to encourage young people to make long-range plans. Occupations Days, in which experts in various fields are brought to the school for discussion with interested students, are increasing in number. Libraries of guidance books, plans for counselling with people outside the school, supervised work experience, films, and posters are in common use.

## COUNSELLING AND TESTING

The counselling of individual students regarding their present progress and their future plans is still the unique and most valuable feature of the work. In large and moderately-sized schools the time-objective per week for counselling is one period of approximately forty minutes for each twenty students. Many schools have already reached that objective. Others are moving towards it. While many interviews are at the request of the counsellor or other staff members, the proportion of those requested by students themselves appears to be increasing. The number of consultations with parents is also increasing. Small schools necessarily find it difficult to provide special counselling time.

If intelligent help is to be given students in making their individual plans, a careful study must be made of individual differences and needs. In addition to all that can be learned about them from observation and from consultation, some group tests of such factors as ability to learn, aptitudes, skills, and interests are used. Counsellors are developing skill and judgment in the use of tests as a means of furthering their understanding of students.

## **ELEMENTARY SCHOOLS**

An interesting and encouraging development during 1949 has been the voluntary movement of more and more elementary schools toward search into the possibilities of organized guidance in their schools. Many centres now offer group work in Grade VIII, or in VII and VIII. Some elementary schools are developing a counselling service. Some are taking steps to discover and to remedy special handicaps to learning, such as lack of reading skill. Guidance in the elementary school stresses the understanding and the development of students rather than vocational and educational choice.

## **TRAINING AND ASSISTANCE**

While there are now over 800 teachers in the province who have some specific training in guidance, the most pressing need continues to be for adequately-trained workers. Progress of the work must wait on the training of suitable people to do it. In 1949 one hundred and sixteen teachers attended the summer school offered by the Ontario Department of Education for either the Elementary, the Intermediate, or the Specialist course. A considerable number of them were from elementary schools.

The Vocational Guidance Centre of the Ontario College of Education continues to be an invaluable means of distributing information, test materials, and textbook materials for use in the group work related to guidance. The Mailing Service has already been mentioned. A copy of *The School Guidance Worker*, a magazine published by the Vocational Guidance Centre, is included in every issue of the Mailing Service. It is an excellent medium for the pooling of guidance ideas.

McMaster University and the Ontario Agricultural College arranged conferences with school guidance workers and principals, which were felt to be of great value in promoting understanding of guidance problems. The University of Western Ontario and Queen's University plan similar conferences.

A series of five fifteen-minute broadcasts was presented by the Department of Education and the CBC as part of the programme of school broadcasting. Lesson aids for use with the guidance broadcasts were sent to all secondary schools and were made available to elementary schools on request.

# Music

## MUSIC INSTRUCTION

The percentage of classrooms in elementary schools in which a regular course of music was given under the supervision of a qualified music teacher was 87. In the cities a course in music is provided in every classroom; in the counties, in 86% of classrooms, in the districts in 72%. In schools attended by French-speaking pupils the percentage is 72.<sup>18</sup>

Courses in music are offered in 407 secondary schools, chiefly in Grades IX and X, but in some schools extending to Grade XIII.<sup>19</sup> Musical organizations in secondary schools have been reported as follows: Orchestras 78, Bands 47, Choirs 268, and Operettas performed 20.

## TEACHERS AND TRAINING

There were 1,134 certificated teachers and supervisors of music engaged in Ontario schools in 1949. Of these 775 were employed in elementary schools and 359 in secondary schools.

In the eight provincial Normal Schools music is taught to all students. There is a steady improvement from year to year in the attitude and ability of the student-teachers, which may be attributed to the province-wide acceptance of Music as a school subject.

Courses leading to nine different types of certificates in Vocal and Instrumental Music were given at a summer school in 1949. The total enrolment was 397.

## MUSIC OPTION

Music is an optional subject in Grades X to XIII. To receive credit towards the Secondary School Graduation Diploma students may either take a school course if one is offered or they may submit certain certificates from the Royal Conservatory of Music of Toronto, or other accredited examining bodies. By school courses 343 pupils received Grade XII standing in 1949 and 61 received Grade XIII standing. Certificates from the Conservatory or other bodies were presented as equivalents for Grade XII by 244 pupils in 107 schools, and for Grade XIII by 189 pupils in 87 schools.

## MUSIC FESTIVALS

Music festivals have been encouraged as a means of motivating classroom work, establishing standards of performance, and stimulating public interest. The number of festivals held during 1949 in which more than one school was involved was approximately 125, and nearly every part of the province was served.

## RADIO

During January, February and March the Department, in co-operation with the Canadian Broadcasting Corporation, presented twenty Music broadcasts in three series, i.e., "Primary School Music," five fifteen-minute programmes for Grades I to III; "Junior School Music," five fifteen-minute programmes for Grades IV to VI; "Music for Young Folk," ten thirty-minute programmes for Grades VII to X. For all these broadcasts the commentary was prepared and given by the Provincial Director of Music. In addition the Music Branch prepared a special broadcast for Remembrance Day.

<sup>18</sup>For tables see p. 190.

<sup>19</sup>For tables see p. 190.

## CONCERTS

To bring live music of high quality to secondary school pupils in smaller communities, and to encourage young artists who are for the most part graduates of the Ontario schools, the Department has arranged, during four years, 336 concerts by 115 artists. In the school year 1948-49, 44 artists gave 97 concerts in 35 towns.

## JUNIOR LEAGUE MUSIC SCHOLARSHIPS

During the year 1948-49, the fourth and last year in which the Junior Leagues of Hamilton and Toronto awarded Music scholarships to pupils in Grades IX and X of Ontario schools, six scholarships to the value of \$1,000 were awarded.

# School Attendance

## ENROLMENT

The total enrolment of all schools of the provincial system, exclusive of night classes, for the school year 1948-49 was 711,714. This was an increase of 21,102 over the enrolment of the previous year. The elementary schools showed an increase of 20,495, and the secondary schools as a group an increase of 607. There was a decrease in continuation school enrolment due to the closing of some of these smaller schools and the transfer of pupils to larger and better equipped schools of the new high school districts. The decrease in vocational and special industrial school enrolment may be related to a tendency for pupils to take positions in industry on completion of Grade X courses.<sup>20</sup>

## SCHOOLS AND TEACHERS

For the school year 1948-49 there were 5,927 public schools and 886 separate schools in operation. The staffs of these schools were 15,608 and 3,590 respectively.<sup>21</sup>

## ATTENDANCE

The percentage attendance for elementary schools was 93.8, and for secondary schools 95.4. An examination of the causes of absence shows that these follow the usual pattern with illness the predominating factor, and that unlawful absences constitute only a very small part of the total.<sup>22</sup>

## EMPLOYMENT

Reports of local attendance officers show that 1,722 school children's employment certificates, good for not more than six weeks in any term, were issued in the calendar year 1948. Home permits for short periods were issued in 1307 cases. When a pupil leaves school to take employment while still of school age he must obtain an employment certificate and a further certificate for each change of employment. Therefore, although 5,521 certificates were issued in 1948, the number of pupils affected is considerably less than this.<sup>23</sup>

---

<sup>20</sup>For tables see p. 191.

<sup>21</sup>For tables see p. 191.

<sup>22</sup>For tables see p. 192.

<sup>23</sup>For tables see p. 192.

# Examinations and Scholarships

## DEPARTMENTAL EXAMINATIONS

The Departmental Examinations Branch has as its main function the supervising of the Departmental examinations, the recording of standing, and the issuing of academic and professional certificates.

The experience of the past three years has shown that the Grade XIII departmental certificates can be released to the schools on or about August 9th. This date appears to be satisfactory since sufficient time is available for submission of applications for admission to universities and Normal Schools.

Statistics showing the results of the High School Entrance, the Grade XIII, and the Normal School examinations, as well as the number of Intermediate certificates, Secondary School Graduation Diplomas, and Secondary School Honour Graduation Diplomas issued, will be found in Part II of this report.

## STUDENT AID

### (a) Dominion-Provincial Student-Aid Bursaries

When the first scholarships were established in 1943, many awards lapsed for want of suitable applicants. However, in recent years the situation has improved and principals are bringing to the attention of students the benefits available under the programme. The purpose of the bursaries is to assist students of adequate ability who are financially unable to continue their education. Student-Aid Bursaries, therefore, differ from the awards administered by the Universities by reason of the fact that financial need is the factor given the greatest weight in determining who should benefit from the awards.

Type A Bursaries are for applicants who are entering universities, Normal Schools, Grade XIII, and Grade XII of Vocational courses in the secondary schools. Type B Bursaries are for applicants who have already entered upon their courses in universities, Normal Schools, the Ontario College of Education, the Ontario College of Art, the Provincial Technical Institutes, and the Ontario College of Pharmacy. In 1948-49 there were 1,065 awards made to students. The total amount distributed was \$199,770, including a contribution of \$50,000 from the federal government.<sup>24</sup>

### (b) Transportation Assistance

The transportation subsidy provided by the Department of Education for persons who reside in the territorial districts and are enrolled at an eligible institution has been in operation for three years. The number of students who benefited by this subsidy in 1947 was 746 at a cost of \$14,343.00; in 1948, 698 at a cost of \$13,291.55. In 1949 the sum of \$14,032.40 was paid in transportation assistance to 708 students. Of these 337 resided west of Sudbury and 371 east of Sudbury.<sup>25</sup>

### (c) Scholarships for Post-graduate Study in France

The Department of Education Act provides for the payment out of the Consolidated Revenue Fund annually of the sum of \$6,000 to be awarded by the Minister of Education in scholarships to residents of Ontario for the purpose of enabling them to pursue courses of study in France. The holders of these scholarships for the school year 1949-50 were Miss Marion Ellis, Sandwich Collegiate Institute, Mr. Donald Nobbs, Ridgetown High School, Miss Winifred Smeaton, Malvern Collegiate Institute, Toronto, and Mr. William Stickland, University of Toronto Schools, Toronto.

<sup>24</sup>For Tables see p. 193.

<sup>25</sup>For tables see p. 193.

#### **(d) Miscellaneous Scholarships**

Over the years a number of public-spirited citizens have shown their interest in education in a very worth-while manner by making bequests to the Ontario government for the purpose of establishing scholarships. These scholarships are administered by the Department of Education and are awarded on the basis of the marks obtained at the Grade XIII Departmental examinations, under terms mutually agreed upon by the donor, the Minister of Education and the Provincial Treasurer. These include the Carter Scholarships, the J. R. Cooke Scholarship for the Stirling High School, the Sidney Acker Memorial Scholarship, the Jacob Goldblatt Memorial Scholarship, and the Dr. James T. MacBride Scholarship; in the last named case the principal sum is not deposited with the Provincial Treasurer.

#### **(e) The O. E. A. Elementary Teachers' Loan Fund**

The O. E. A. Elementary Teachers' Loan fund was established some years ago by the Urban Teachers' Section of the Public School Department of the Ontario Educational Association. Loans are available to graduates of Ontario secondary schools who wish to enter any one of seven of the eight Normal Schools. The Fund, which is on deposit with the Provincial Treasurer, is administered by the Department of Education under the direction of the Committee.

### **INTERCHANGE OF TEACHERS**

Arrangements for the interchange of teachers between Ontario and other parts of Canada or the Commonwealth are made by the Department of Education, the Canadian Education Association and the Secretary of the League of the Empire, London.

For the school year 1949 forty-two exchanges were arranged, twenty-two with the British Isles, five with South Africa, one with Australia, twelve with other provinces of Canada, and two with the United States.

### **RECORDS**

The purchase of a Recordak has made possible the microfilming of Departmental records of academic standing for the years subsequent to 1873. As a result, these records are more readily available and valuable storage space has been released for current needs.

## **Public Records and Archives**

The corner-stone of a new Archives building on the west side of Queens' Park was laid on November 19, 1949. Dr. Sigmund Samuel made a generous contribution to the cost of the building and the University of Toronto provided the site. The facilities of the building will be shared by Dr. Samuel, the University, and the Public Records and Archives branch of the Department of Education. This new building when complete will provide greatly improved accommodation for archives material and better facilities for service to the public.

During the year the regular work of the branch included the indexing of Crown Land papers and the Calendaring of the James P. Whitney papers. Three historical exhibits were again circulated to forty-four schools throughout the province. Teachers-in-training at the Ontario College of Education had an opportunity to familiarize themselves with the archives and to recognize their value to teachers of history.

# Community Programmes

The Community Programmes Branch of the Department of Education combines those services in Recreation and Adult Education formerly provided under the Physical and Health Education Branch of the Department of Education and the Ontario Adult Education Board.

The Branch, established in April, 1948, is primarily a service organization. Its policy of providing services only on request and in response to expressed need is based on the strong belief that it is the right of the individual to choose his leisure-time activities and that the main growth of recreation and adult education will take place in communities under community auspices.

The Branch co-operates with other departments of government and provincial interest groups in the general fields of recreation and informal education. It assists in the development and enrichment of cultural, social, physical and educational activities in communities whether they are conducted by public, private, commercial or industrial agencies. In particular, it works towards the development and maintenance of municipal recreation programmes and services as the basis of well-balanced community programmes of organized leisure-time activities for all.

## CONSULTANT SERVICES

Advisory and consultant services to communities are provided by the technical staff of the Community Programmes Branch and through a field staff situated throughout the province.

Qualified members of headquarters staff give technical advice and consultation in such matters as organization and administration of municipal recreation services, general community planning and programmes, organization methods and techniques with respect to the theatre, art and crafts, music, social recreation and recreation in rural areas, parent education, group discussions and forums, use of radio in local programmes, citizenship training programmes for newcomers to Canada and for ethnic groups.

Field representatives, providing general services to local communities, operate in six different areas of the province, with district offices situated in Fort William, North Bay, Ottawa, Toronto, London and Hamilton.

The field representatives in addition to doing a heavy volume of work by correspondence have made over 2,000 personal visits to communities during 1949. Some of the duties which they are expected to perform most frequently are to give general advice to municipal recreational agencies on organization, administrative and programme problems, to make arrangements for the visits of headquarters staff and other leaders, to assist in organizing and conducting area leadership courses, to organize citizenship training classes for newcomers to Canada, and to encourage communities to assist in solving the problems of these newcomers.

## LEADERSHIP TRAINING

Although there is a general need for more and better facilities, it has been decisively proven that, in most areas in the province, there are facilities available which remain idle because of the lack of active leadership. Grants to communities provide for financial assistance in the operation and maintenance of facilities and equipment, but the great bulk of the grants available is directed toward the provision of leadership services. Similarly, a large part of the service of the Branch is connected with the training of local leaders.

As a programme of recreation depends for its vitality on leadership, the training of leaders as a part of local community recreation programmes is continually encouraged and assisted through staff services. However, it is only the larger communities which can economically operate their own training courses. Therefore, to assist the smaller communities the Branch provides special services to encourage and promote leadership training institutes and courses in selected centres for large areas. These courses, to which all interested communities or community groups in the area may send their leaders or potential leaders, are jointly sponsored and operated by the Branch and the interested organizations.

In 1948-49 leadership training courses were provided in Art, Audio-visual problems, Citizenship Teaching, Parent Education and Family Relations, General Leadership, Handicrafts, Physical Recreation, Rural Composite Programmes, Social Recreation, and Theatre. Altogether 164 courses were held and the total attendance was 7,181.

## **RURAL COMMUNITY NIGHT SCHOOLS**

A special programme of leadership training for rural areas is now being developed. Training courses, called "Rural Community Night Schools", provide both recreation and educational activities. These courses are open to all and, besides discovering leaders, they are designed to develop the appreciations and skills of a large number of persons. Rural community night schools combine the services of both the Department of Agriculture and the Community Programmes Branch. They are organized to take in a large area involving one or more counties. The school management committee may consist of twenty or thirty members. As many as 200 pupils, some travelling thirty miles or more, attended one of these schools one night a week throughout the past winter.

Fifteen such schools which operated in the province in 1949 combined from three to fourteen of the following types of classes or activities; Woodworking, Public Speaking, Sewing, Motor Mechanics, Folk Dancing and Singing, Farm Engineering, Drama, Weaving, Farm Science, Farm Machinery, Music, Wood Refinishing, Leathercraft, Radio, Electricity, Shop Work, Art, Plastics and Art Metalwork.

In addition to the courses mentioned above, more extensive and advanced training in Art, Crafts, Music and Theatre are offered each year to community leaders from all points in the province in conjunction with the summer schools offered by other Branches of the Department.

Each year the Branch conducts a seven- to nine-day training course for municipal recreation directors. These courses are planned in co-operation with the Extension Department of an Ontario university. The University of Western Ontario provided facilities for the course held in 1949. The course content was centred around municipal administration, community organization for recreation, and problems concerning programmes. The registration was forty-eight.

## **PROVINCIAL GRANTS**

Grants are provided to encourage and assist municipalities in establishing and maintaining recreation services and activities which will serve the community's needs and achieve the fullest use of all the community's facilities and leadership resources.

The development of municipal programmes of recreation as aided by grants is shown by the increase between the year 1945-46, when 18 municipalities received grants amounting to \$10,213.90, and 1948-49, when \$140,067.82 was paid to 105 municipalities.

Grants are paid annually and are based upon the annual expenditures of the appointed municipal recreation authority, as follows: 33⅓% of the salary paid to a full-time director of recreation to a maximum of \$1,000; 33⅓% of the salary paid to a full-time secretary for the director of recreation to a maximum of \$500; 33⅓% of the salaries paid to part-time or full-time assistant directors of recreation to a maximum of \$500 for each assistant, total maximum \$1,600; 20% of the annual operating and maintenance of the community programme to a maximum of \$400.

It is not necessary for a full-time director of recreation to be employed. Of about 140 communities in Ontario now carrying on programmes in compliance with the regulations, less than half employ full-time staff; others employ part-time persons, or special instructors, and a number use volunteer leadership entirely. The grants to an individual municipality, which are based on expenditures as outlined above, range from less than \$100 in the case of smaller communities to the fixed maximum of \$3,500. Recent additional grants provide for maxima up to \$9,800 according to the population.

Grants are paid to provincial organizations conducting recreation programmes on a province-wide basis. The following organizations received assistance in this manner during 1949: Ontario Camping Association, Ontario Society of Film Councils, Ontario Branch Canadian Youth Hostels, Ontario Religious Education Council, Ontario Regional Fellowship Canadian Work Camp Fellowship of Canada, Ontario Recreation Association.

The Ontario Recreation Association was formed in 1946 following two Provincial Recreation Conferences made possible through the services of the Branch. The membership of the Association includes public and private agencies and both volunteer and professional workers. It works closely with the Community Programmes Branch, the Ontario Recreation Directors' Federation, and co-operates with five area or zone recreation associations whose members meet frequently to exchange ideas and information and to plan co-operative programmes such as leadership training courses.

Financial contributions of \$2,000 each were made to the Dominion Drama and Ballet Festivals during 1949.

## **CITIZENSHIP TRAINING**

The peak attendance in Citizenship classes for newcomers during the school year 1948-49 was reached on the 1st of March, 1949, when there were 533 classes with 12,289 students. This compared with just over 5,000 students in 240 classes in March, 1948. Out of this total of 533 classes, 163 were organized and paid for directly by the Community Programmes Branch of the Ontario Department of Education.

During the year the department sponsored a series of 13-week programmes in Polish and Ukrainian over 13 Ontario stations. These programmes were adapted specially for listeners of those two ethnic groups and were designed to encourage them to participate in the life of the community, to take advantage of the educational facilities offered to them and to give them essential information about Canada and our way of life. Answers to questionnaires sent out by the Community Programmes Branch to Polish and Ukrainian listeners indicated that the programmes were well received by both newcomers and established residents.

In conjunction with the Federal Government (Department of the Secretary of State) the Community Programmes Branch sponsored the radio series "In Search of Citizens" which was broadcast over the Dominion network.

In response to representations from the Branch, Thomas Nelson and Sons published a Canadian version of **LEARNING THE ENGLISH LANGUAGE**, which is the basic text for teaching English.

The Branch this year completed a 90-page mimeographed book entitled CANADA, OUR COUNTRY, which is used as the Citizenship Manual for second year students. About 4,000 copies were distributed. Pamphlets produced by the Canadian Citizenship Branch, Ottawa, entitled OUR LAND, OUR HISTORY, and OUR GOVERNMENT were used as supplementary material in the second year course.

Attendance certificates were issued to those newcomers who had attended classes in Basic English and Citizenship. A simple ceremony of presentation was arranged wherever it was possible.

Supplementary reading kits were prepared to serve as libraries for the classes in the Northern districts where library facilities were not available.

## **NATIONAL COUNCIL ON PHYSICAL FITNESS**

In April, 1949, an agreement was reached with the Department of National Health and Welfare under which the province, through the Community Programmes Branch, co-operates with the National Council on Physical Fitness in the promotion of the Physical Fitness of the people of Ontario and subsequently receives annual grants under the terms of the National Physical Fitness Act. The maximum amount of grant for which the province is eligible is \$74,063.25 on a dollar-for-dollar basis.

# **Public Libraries**

## **GRANTS**

Legislative grants paid to public libraries in 1949 amounted to \$405,000. The expenditures of the libraries and the local tax levies showed an increase. The amount spent on books increased by \$55,000 and the expenditure for salaries showed an increase of \$162,000.

## **CIRCULATION**

Book circulation reached a total of 13,700,000 volumes, including children's books. This was an increase of 809,000. The circulation of children's books, 4,600,000 volumes, increased as town and city libraries broadened their work with schools and as the county libraries in the twelve counties extended their service to cover practically all rural schools in their areas.

## **NEW LIBRARIES**

During 1947 two more free public libraries were established by change of status from association libraries. Six new association libraries were formed. There was however no change in the number of county libraries. Contracts have been let, or are in preparation, for the erection of new main libraries at Sudbury and Port Arthur. New branches were opened in Niagara Falls, Hamilton and Peterborough, the latter in rented temporary quarters.

## **TRAVELLING LIBRARIES**

The work of the Travelling Libraries continues to expand. Schools, and particularly rural schools in the districts, and in counties where there is no county library, are making increasing demands on this service which may in time curtail the work with adults. The circulation for 1949 increased by 10,000 books. Four qualified librarians devote their time to the selection of books with attention to the particular needs of the groups or schools being served.

# Trade Schools

The number of schools registered in 1949 under The Trade Schools Regulation Act was 156. There were two cancellations of registration, and approval was given for the registration of six new schools. Under the Act the facilities, courses, charges and advertising of privately-operated trade schools must be approved and the Act applies both to schools offering correspondence courses and to schools in which the pupils attend for instruction.

## CORRESPONDENCE SCHOOLS

Private correspondence schools do a considerable volume of business in Ontario, particularly in remote areas where ordinary school training is not available. The courses of study of registered schools and their methods of forwarding, marking, and returning assignments are annually approved with a view to assuring the students training and service consistent with the fees charged. To meet increased operating and promotion costs correspondence schools have been permitted to increase their fees by percentages varying from 10 to 20% in the past four years.

## TRADE SCHOOLS

Private schools in which the pupils attend for instruction in subjects covered by The Trade Schools Regulation Act must maintain adequate standards. In general accommodation and equipment are satisfactorily maintained, and where it has been necessary to recommend improvement the recommendations have been met. Most of the teachers employed are experienced. Schools of this type have been permitted to increase their fees by one-third or one-half in recent years. Permission to make these increases is given only when the request is supported by detailed information justifying the change, and when it permits only a reasonable return on the proprietor's investment.

# Physical and Health Education

## SUPERVISION

The work of this branch of the Department of Education includes the supervision of the physical and health education programmes in the elementary and secondary schools, the provision of summer courses and coaching schools for teachers of physical education, and the operation of summer camps for specific purposes.

The training of elementary school teachers in physical education is part of the Normal School course, but in addition one thousand rural school teachers attended short training courses in physical education methods during the year. There is still a definite shortage of trained men and women in the elementary schools having a knowledge of the best methods of imparting game, dance and gymnastic skills to pupils.

The branch co-operates with the Men's and Women's Physical Education Section of the Ontario Education Association in the preparation of a bulletin to spread information of new ideas and improved methods of teaching physical education. It also works closely in association with the Ontario Federation of School Athletic Associations in efforts to improve the type of competition in secondary school games and athletics and in conducting provincial tournaments in Rugby, Volley Ball, Basketball, Hockey, Gymnastics and Curling.

## SUMMER COURSES

A summer school course in Physical and Health Education was conducted at the Ontario Agricultural College, Guelph. Sixty teachers attended this course in preparation for Elementary, Intermediate and Supervisor's certificates.

A course in Physical Education for secondary school men teachers was conducted at Hart House, University of Toronto, and a course for secondary school women teachers was held at the Ontario College of Education. The enrolment at both these courses was lower than in the preceding year; the enrolment of fewer student veterans and the fact that two universities are now giving full courses in physical and health education may be assigned as reasons for the decrease. There is still a shortage of qualified teachers of physical education, particularly of women teachers, in secondary schools.

## CAMPS

Two-week courses of training in athletic leadership in camp at Longford Mills on Lake Couchiching were attended by 406 secondary school boys selected from secondary schools throughout the province. Training was given in basic athletic skills, in the organization of a physical education programme, coaching and refereeing, and the courses proved a valuable experience for the boys participating. Visits to schools to which these leaders and those of previous courses have returned show the value of the training. Principals report that these boys are making excellent contributions in their schools and shouldering responsibilities of leadership.

Camp counsellor training courses were given to train more counsellors for non-profit camping organizations throughout the province. Two three-week courses were conducted for girls at Belwood Lake Camp near Fergus, and 133 girls took advantage of the training. A similar course held at Bark Lake Camp, Irondale, was attended by 72 boys. Counsellors in training receive practical experience in all the basic skills related to good camping and an opportunity of testing their resourcefulness and initiative. Reports indicate that boys and girls trained in these courses are making useful contributions in the camps in which they serve.

Grants for the summer of 1949 amounting to \$22,000 were paid to 175 camps attended by 12,000 boys and 14,000 girls. The subsidies are paid to non-profit camps on the basis of the number of campers and the time spent in camp.

# Ontario School for the Blind

## ENROLMENT

A total of 188 pupils, including 102 boys and 86 girls, were enrolled at the Ontario School for the Blind in 1949, compared to a total of 177 in the previous year.<sup>26</sup> The distribution of the enrolment by provinces was as follows: Ontario, 127; Manitoba, 20; Saskatchewan, 29; Alberta, 12. Tables showing the visual acuity and the causes of blindness of the pupils will be found on p. 194.

## PROGRAMME

Emphasis continued during the year upon the development of the individual child, not only academically, but physically and socially. Great interest was evident in skating, sports day, music, drama, and club activities. Extension of high school work in the School's programme has opened up new opportunities to graduates. During the last five years, several graduates have proceeded to university and have qualified for degrees.

# Ontario School for the Deaf

## ENROLMENT

The enrolment of the Ontario School for the Deaf reached a total of 343 in 1949, including 167 boys and 176 girls. This total exceeded the enrolment in 1948 by eight pupils.

A comparison of the enrolment of 1949 with that of 1939 shows three trends over the ten-year period. First, pupils are remaining in the School for a longer period. Sixty-seven pupils in 1949 had been in attendance for from nine to fourteen years, while in 1939 only forty-nine pupils were in that group. Second, the average age of pupils graduating from the School has dropped. In 1949 only six pupils were more than seventeen years of age, compared with sixteen pupils in 1939. Third, more pupils are reaching Grades VIII, IX, and X. Twenty-six pupils were enrolled in these grades in 1949, compared to thirteen pupils in 1939.<sup>27</sup>

## IN-SERVICE TRAINING OF STAFF

A course in special methods of instructing deaf children was continued in the School in 1949 for recently appointed members of the teaching staff. One teacher of senior classes took a year's leave of absence for study in the Department of Education of the Deaf at the University of Manchester, England, and three staff members took a nine weeks' summer course in their specialized field at Northwestern University, Evanston, Illinois. Three staff members attended the convention of American Instructors of the Deaf in Jacksonville, Illinois.

# Services Rendered

## IN MEMORIAM

Mr. Herbert Bolingbroke, B.A., B.Paed., Inspector of Public Schools for Ontario North, died at his home in Uxbridge on August 16, 1949. Mr. Bolingbroke was born in Brighton, England, and came to Canada at the age of sixteen. He enlisted and saw three and one-half years of active service in the First World War. Subsequently he attended the Hamilton Normal School and Queen's University. He taught in the Hamilton Public and Technical Schools. His first principalship was at McIlwraith Public School, Hamilton, after which he was principal of George R. Allan Public School, Hamilton, for several years. Mr. Bolingbroke was appointed a public school inspector in 1939 and served in South Renfrew for eight years before transferring to the inspectorate of Ontario North. In his passing the province lost an educationist who had a deep interest in rural education and who constantly strove to improve the educational opportunity for all the children of the area in which he served.

Mr. Norman Campbell, M.A., who retired as Inspector of Public Schools for Frontenac South in August, 1948, because of ill-health, passed away on February 11, 1949. Mr. Campbell was a native of Grey County, where he received his public and secondary education. He attended the Model School at Hanover in 1914 and taught for a short time in rural schools in Grey County before attending the Toronto Normal School, from which he graduated in 1917. After completing the Normal School course he enlisted in the first Great War and proceeded overseas. When he returned to Canada he taught in the Portsmouth Public School. He was a graduate of Queen's University, receiving the degree of Master of Arts in 1924. He attended the Ontario College of Education and graduated in June, 1925. Mr. Campbell taught for short periods in the Monteith Academy, in the Hamilton Technical School, and in Glebe Collegiate Institute, Ottawa. He was appointed inspector of public schools for Renfrew North in 1928, with headquarters at Pembroke, and served in this inspectorate for seventeen years, being transferred to the inspectorate of Frontenac South in 1945. Mr. Campbell devoted himself whole-heartedly to the task of improving the educational facilities and the educational opportunities for the young people in the areas where he served.

Mr. Reuben Daniel Keefe, B.A., Provincial School Attendance Officer and Supervisor of Railway School Cars, passed away on May 26, 1949. Mr. Keefe was born at Iroquois, Ontario, of United Empire Loyalist stock. He graduated from the University of Toronto in 1901. He taught for two years in Colborne and Gananoque, and was principal of the Penetanguishene High School for twenty-eight years. In 1935 he was appointed Provincial School Attendance Officer, and Supervisor of Railway School Cars in 1942. Mr. Keefe will be remembered for his kind and sympathetic manner and his splendid co-operation with all with whom he worked and for the fine service which he gave as an aggressive leader in a successful effort to improve school attendance throughout the province.

Mr. William J. Lee, B.A., retired Separate School Inspector, died at his home, 434 Brunswick Avenue, Toronto, on April 4, 1949, in his eighty-second year. Mr. Lee was a native of Lanark county. He received his early schooling in Perth, and his first training as a teacher, in 1885, was at the Model School in that town. After some years of teaching experience in Sturgeon Falls, Perth and Stanleyville, Mr. Lee became principal of St. Joseph Separate School, Ottawa, in 1891, which position he filled with noteworthy success for twenty-five years. In 1915 he was appointed Inspector of Separate Schools for the western and central parts of

Southern Ontario, and in 1922 was transferred to an inspectorate consisting only of Toronto separate schools. On the death of Inspector J. F. Power in 1931, Mr. Lee succeeded Mr. Power as senior inspector of the Toronto separate schools. He retired in 1940. Mr. Lee's kindliness and sympathy obtained the ready co-operation of his teachers and associates. As an educational leader he was in many respects in advance of his time.

Mr. Vincent C. Quarry, B.A., died at his home in Hamilton on July 11, 1949. Although in poor health for a year or more, Mr. Quarry had, up to the time of his death, carried on his duties as Inspector of Separate Schools. Mr. Quarry was born in the township of Stephen, Huron County. For his elementary schooling he attended his home school at Mount Carmel. His secondary and college education were secured at St. Michael's College, Toronto. Graduating from the University of Toronto and obtaining a teacher's certificate from the Faculty of Education, he taught in the Collegiates of St. Catharines, Niagara Falls and Chatham. He was appointed an elementary school inspector in 1920 and served as Inspector of Separate Schools in Renfrew County and in the Districts of Northern Ontario. On transfer of the late Inspector J. F. Sullivan from London to Hamilton, Inspector Quarry succeeded Mr. Sullivan in the London Separate School Division, where he served until 1945, when he was transferred to an inspectorate including the Niagara Peninsula and adjacent areas, with headquarters at Hamilton. Mr. Quarry will be best remembered by his work in organizing many separate schools in Northern Ontario and in the building of new schools and improvement of accommodation in the schools for which he was responsible.

## RETIREMENTS

Dr. McGregor Easson, Chief Inspector of the Ottawa Public Schools, retired on July 31, 1949. Dr. Easson was born near Stratford, where he received his elementary and secondary school education. After attending the Model School at Stratford, he taught in a rural school for some time and then entered the Ontario Normal College at Hamilton. Later he taught at Shakespeare and Falstaff Schools in Stratford before joining the staff of the Ottawa Public Schools in 1908. In 1918 he was appointed principal of Elgin Street School. During the period from 1928 to 1937 he was inspector of public schools, and in 1937 was appointed Chief Inspector. He is a graduate in Arts of Queen's University and holds the degree of Doctor of Paedagogy from the University of Toronto. Dr. Easson has taken a prominent part in public life. He has served on the executives of the Ottawa Teachers' Institute, Ottawa South Community Orchestra, Central Canada Exhibition Association, Health League of Canada, National Council of Education, and the National Committee, Canadian Legion Educational Services. He is a Past President of the Ottawa Rotary Club and is a Governor of Carleton College. For several years he served as an alderman for the City of Ottawa. He is interested in athletics, and for some time was Ontario Athletic Commission representative for Eastern Ontario for track and field events. During Dr. Easson's term of office as Chief Inspector, the Kindergarten for four-year-old children was introduced. Dr. Easson had also much to do with the development of the Intermediate School in Ottawa.

Mr. D. T. Walkom, B.A., retired on August 31, 1949, as Public School Inspector of District Division 6, with headquarters in Sault Ste. Marie. Born near Essa, Ontario, he obtained his elementary education in the local rural school. Upon graduation from the Barrie Collegiate Institute he attended the Bradford Model School and taught for three years. He discontinued teaching and was engaged in railroad work until 1908, when he entered Queen's University. Upon

his graduation he joined the staff of the Sault Ste. Marie High School and remained there for ten years. In 1921 he was appointed Public School Inspector at Cochrane and was transferred the following year to Sault Ste. Marie. Mr. Walkom devoted himself unstintingly to the betterment of education. He was especially interested in the field of Agricultural Science, and displayed a keen interest in Music. He was an excellent administrator and organizer. His keen insight, wise counsel and sympathetic guidance made him a valuable inspector whose service in Division 6 will long be remembered.

Mr. George Ryerson retired on June 30, 1949, after thirty-six years of faithful and efficient service at the Ontario School for the Blind at Brantford. He joined the staff on November 1, 1913, and served as purchasing agent and bursar, fulfilling his duties in such a way as to keep the school running smoothly and to promote the comfort and physical well-being of the students.

PART II

---

# GENERAL STATISTICS

## TERMINOLOGY

**Assessment**—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

**Attendance Efficiency**—The percentage relationship of the actual days attended to the perfect aggregate.

**Auxiliary Classes**—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

**Capital Charges**—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

**Compulsory School Age**—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part-time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

**Consolidated School**—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyances instead of the original one-room school.

**Correspondence Courses**—Reach those more isolated than the school car pupils. They supplement the work of the regular school when remoteness, winter weather, ill-health, or physical disability prevent regular attendance. Sixteen hundred is an approximate year's active enrolment for these courses, which reach from Grade I to X, and are sets of carefully prepared lessons based on the new Course of Studies. A Departmental staff handles this correspondence with extreme promptness, and a pupil's progress depends entirely upon his own efforts. About 75% of these pupils live in Northern Ontario, and 15% of them are of foreign parentage. These courses are entirely free.

**Cost per Pupil-Day**—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

**County Pupil**—A secondary school pupil living within the County but outside any secondary school district.

**District**—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing.

**Enrolment (Net)**—The number of pupils who have attended school during the year, excluding all duplications.

**Fifth Classes**—Grades IX and X in Elementary Schools, doing work similar to the First two grades of Secondary Schools. The majority of these classes are in rural areas.

**Free School Age**—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

**General Maintenance**—Ordinary, current expense, as opposed to capital outlays and debenture charges.

**Inspectorate**—The area under the supervision of a local Departmental representative.

**Kindergarten Primary**—A class combining the work of the kindergarten and Grade I.

**Non-Resident Pupil**—A secondary school pupil who is neither a resident nor a County pupil.

**Public School Section**—A subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

**Resident Pupil**—A secondary school pupil living within the secondary school district.

**School**—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

- (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
- (b) **R.C. Separate**—For the children of Roman Catholics.
- (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

- 1. **Collegiate Institutes.**
- 2. **High Schools.**
- 3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

1. **Technical High School.**
2. **Commercial High School.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

**III. Provincial Technical Institutes**

These offer courses designed to train technicians for positions in industry which are supplementary to, but not in the field of, professional engineering. The admission requirement is secondary school graduation, and the courses are of two or three years' duration. The institutes are owned and administered directly by the Department of Education under the Vocational Education Act, Part II, but close co-operation with industry is maintained through advisory committees, the members of which are appointed by the Minister.

**IV. Professional Training Schools**

- (a) Ontario College of Education (University of Toronto)—for the training of secondary school teachers.
- (b) Provincial Normal Schools—for the training of elementary school teachers.

**V. Special Schools:**

- Ontario School for the Blind, Brantford.
- Ontario School for the Deaf, Belleville.

**School Car**—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of northern Ontario. There are six of these cars at present, and the length of route ranges from 83 to 221 miles. The route is covered in four to six weeks, and each car is "spotted" for about a week at a time. Problems are solved, work is outlined for the next period, and daily problems of life are discussed. The present enrolment approximates 150, and comprises 10 nationalities. The Department pays all operating costs.

**School Year**—The school year consists of two terms, September 1 to December 22, and January 3 to June 29. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remain on the calendar year basis.

**Secondary School District**—The area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

**Township School Area**—A unit of school administration comprising two or more contiguous rural school sections in the same township or in adjacent townships, or comprising such rural sections along with one or more adjacent villages or towns. See Cir. Elem. 15, "The Township School Area in Ontario."

**GENERAL STATISTICAL SUMMARY OF ONTARIO PROVINCIALY CONTROLLED DAY SCHOOLS, 1949**  
(Financial Data for calendar year 1949; other data on school year named)

a—Without duplication.

b—To elementary schools only.

c—Includes high school districts without schools.

d—Includes transportation from secondary school districts without schools, also that paid by elementary school boards on high school pupils.

e—Covers current operations, capital charges, capital outlays from current funds, and transportation.

f—Includes Sr. Auxiliary.

g—Includes 303 township area boards, 14 improvement district boards, 20 consolidated school boards and 87 boards of education.

h—Includes 29 union separate boards.

i—Included with high and collegiate.

j—Covers current operations, capital charges, capital outlays from current funds, and transportation.

<sup>a</sup> In all Provincially Controlled Schools.

<sup>b</sup> Commencing with 1943-44 the net enrolment has been taken instead of the May enrolment and large suburban and semi-urban schools have been treated as urban.

<sup>c</sup> This includes the following: Manual Training, Household Science, Auxiliary, Kindergarten, Art, Music, Physical Culture, but excludes Itinerant Music Teachers.

<sup>d</sup> This includes Third Class District, Permanent Ungraded, and Temporary.

<sup>e</sup> Included with Public Schools.

a—Includes 464 Summer Session Interim Seconds.

b—Includes 572 Deferred Seconds in 1943-44 and 297 Deferred Seconds in 1946-1947.

c—Includes 205 Deferred Firsts.

d—Includes 257 Summer Session Interim Seconds.

e—Includes 221 Deferred Seconds.

f—Includes 217 Summer Session Interim Seconds.

g—Includes 228 Deferred Seconds.

h—Includes 275 Deferred Seconds.

i—Includes 243 Summer Session Interim Seconds.

This list does not comprise certificates issued to:

(i) those completing Normal School examinations

(ii) those proceeding to higher certificates.

(iii) those trained outside of Ontario.

## VI—DEPARTMENTAL SUMMER COURSES

### Enrolment by Subjects in recent years

The Summer Courses are conducted by the Department of Education to enable teachers to refresh their knowledge of special subjects, acquire new skills and become acquainted with the latest developments in educational content and method.

Because of war conditions, the general programme of Summer Courses was discontinued from 1941 to 1944, inclusive. During that period, the following courses were offered:

1942 —Summer Course in Defence Training, Health and Physical Education—925.

1942-43—Winter Course in Manual Training, Type A—40.

1944 —Summer Course in Physical and Health Education and Cadet Training—313.

1944 —Refresher Course in Medieval History given during Christmas vacation—45.

1944-45—Winter Course in Manual Training Type A—48.

\*Visual only. †Art only until 1945. ‡Physical Education only to 1945. §Guidance only since 1945.

(a)—A comparatively small sum since 1944, and thereafter included with local levies.

(b)—Includes debenture levy, also township grant.

(c)—Included in current operations previous to year shown as a special disbursement.

(d)—Figure covers transportation to elementary schools only.

(e)—Unmatured debenture principal, and capital loans.

(f)—Data not available.

Cost covers current operations, capital charges, capital outlays from current funds, and transportation.

This Table excludes the 5 Sr. Auxiliary Schools. The cost per pupil of average daily attendance in these was \$469.00. If these 5 schools are included with Vocational above, the following revisions in the year figures appear:

A.D.A. Vocational and Senior Auxiliary.....	26,549
Cost per pupil of A.D.A.—Vocational and Senior Auxiliary.....	\$357.32
All Secondary.....	276.86
All Schools.....	153.48

1. Cost covers current operations, capital charges, capital outlays from current funds, and transportation.

2. High Schools include Collegiate Institutes.

3. Transportation costs to secondary schools include those paid by elementary school boards.

No. certificated teachers . . . . .	904

Agricultural Science was taught during the year in the Secondary Schools listed below. Under (a) are schools in which Lower School courses only are taken, and under (b) both Lower and Middle School courses. Schools in Which Departments of Agriculture have been established have (D) after the name.

### Collegiate Institutes

- (a) Brockville, Collingwood, Cornwall, Oshawa, Owen Sound, Perth (D), Stratford, York Memorial. Total 8.  
 (b) Barrie, Belleville, Clinton (D), East York, Fort William, Goderich (D), Ingersoll, Kitchener, Lindsay, Napanee (D), Orillia, Picton (D), Port Arthur, Renfrew (D), St. Marys (D), Scarborough, Smiths Falls (D), Stamford (D), Strathroy (D), Woodstock. Total 20.  
 Departments of Agriculture 10.

### High Schools

- (a) \*Acton, Ailsa Craig, \*Arnprior, Bothwell, Bracebridge, \*Brampton, Brooklin, Delhi, Dryden, Durham, \*Eastview, Elmvalle, \*Fenelon Falls, \*Hanover, Lucknow, \*Marmora, Merrittton, North Gower, Parkhill, Richmond Hill, \*Sutton, Wallaceburg, Walkerton, Wingham (D). Total 24.  
 (b) Alexandria (D), Alliston, Amherstburg, Arthur (D), Arva (D), Athens (D), Aylmer (D), Bancroft, Beamsville (D), Beaverton, Belle River (D), Blenheim (D), Bowmanville, Bradford, Brighton, Burford (D), Burlington, Caledonia (D), Cayuga, Chesley (D), Chesterville (D), Cochrane (D), Drayton (D), Dundalk, Dunnville (D), Dutton (D), Elmira (D), Essex (D), Exeter, Fergus, Florence, Forest (D), Fort Frances, Grimsby (D), Hagersville (D), Harriston, Harrow (D), Iroquois, Kemptville (D), Kincardine (D), Kingsville (D), Lakefield, Leamington (D), Listowel (D), Madoc, Markdale, Markham, Maxville, Meaford (D), Merlin, Midland, Milton (D), Milverton, Mitchell (D), Morewood, Mount Forest, Nepean, Newburgh, Newcastle, New Liskeard, Newmarket, Norwich (D), Norwood, Oakville (D), Orangeville, Palmerston (D), Pelham (D), Petrolia (D), Port Credit, Port Elgin (D), Port Perry (D), Preston (D), Ridgetown (D), Saltfleet (D), Seaforth (D), Sharbot Lake, Shelburne (D), Simcoe (D), Smithville, Stirling (D), Stouffville, Streetsville, Sydenham (D), Thamesford, Tilbury (D), Trenton, Tweed (D), Uxbridge (D), Waterdown, Waterford (D), Watford (D), Wheatley (D), Whitby (D), Wiarton, Williamstown, Winchester (D). Total 96.  
 Departments of Agriculture 54.

\* Introduced Agricultural Science in September, 1949.

### Continuation Schools

- (a) Chatsworth, Eganville, Grand Valley, Hallville, Seeley's Bay, Tavistock. Total 6.  
 (b) Agincourt, Brownsville, Clifford, Denbigh, Lynden, Lyndhurst, Manitowaning, Merrickville, Millbrook, Mindemoya, Mount Brydges, Mount Elgin, New Dundee, New Hamburg, Orono, Port McNicoll, Richard's Landing, St. George, Stevensville, Sundridge, Tamworth, Teeswater, Thamesville, Tiverton, Wellington, Woodville, Total 26.  
 Departments of Agriculture in Vocational Schools, Chatham, Belleville.

### Teachers

Holding Specialist certificates . . . . .	161
O.A.C. graduates included above . . . . .	113
Holding Intermediate certificates . . . . .	112
Completed Intermediate Part I . . . . .	9
Granted permission . . . . .	17
	299

## AUXILIARY EDUCATION

### Urban Organization, 1949

Handicraft Classes—Sudbury 1, Toronto 3 . . . . .	4
Opportunity Classes—North York TSA 1, Scarboro TSA 2 . . . . .	3
Partial Opportunity Classes—V. K. Greer Memorial 1, Napanee 1 . . . . .	2
Remedial Opportunity Classes—Cornwall 1, Gravenhurst 1, Port Arthur 2, Timmins 1, Toronto 2 . . . . .	7
Sanatorium Classes—Brant Sanatorium 1, Peninsula Sanatorium 1, Mountain Sanatorium 6 . . . . .	8
Orthopaedic Classes—Hamilton 1, London 1, Variety Village 5, Windsor Red Cross Unit 1, Woodeden Hospital 1 . . . . .	9
Speech Correction and Lip Reading Classes—North York 1, Oshawa 1, Windsor 2 . . . . .	4

Separate.....	101,331	90.9	11.9	106,431	92.1	10.7

**Table No. 8—Absence in Elementary Schools**

Causes of Absence	1948-49 Days Lost	Percentage Loss			
		1945-46	1946-47	1947-48	1948-49
Illness.....	5,213,662	66.19	61.39	69.32	71.33
Home help.....	523,372	8.49	7.83	7.74	7.16
Parental neglect.....	423,286	6.87	6.48	5.99	5.79
Physical obstacles.....	102,274	2.51	5.73	2.51	1.40
Truancy.....	20,444	.34	.28	.26	.28
Privation.....	6,891	.12	.14	.12	.09
Irregular closing.....	654,557	10.40	13.32	9.19	8.95
Other reasons.....	365,091	5.08	4.83	4.87	5.00
Total days lost.....	7,309,577	100.00	100.00	100.00	100.00
The above losses are classified:					
Lawful.....		5,397,077	6,285,692	5,986,022	6,029,731
Unlawful.....		2,753,707	1,751,680	1,371,247	1,279,846
Percentage Attendance.....		92.0	92.1	93.3	93.8

**Table No. 9—Summary of Attendance Officer's Reports**

	1945	1946	1947	1948
School children's employment certificates issued.....	648	490	345	1,722
Home permits issued.....	1,661	1,432	1,510	1,307
Employment certificates issued.....	7,180	5,905	6,232	5,521
Cases brought before magistrates.....	965	528	478	241

The foregoing summary is for the calendar year. The number of certificates issued does not indicate that the same number of pupils discontinued their attendance permanently. School children's employment certificates are granted for not more than six weeks in a term. Home permits, also, are for short periods, and the holders usually return to school. As an employment certificate is required for every change of employment the number of certificates is greater than the number of pupils who obtained them.

Table No. 10—Secondary Schools

Schools	Number of Schools	Number of Teachers	Enrolment		Percentage Attendance	
			1947-48	1948-49	1947-48	1948-49
High Schools and Collegiate Institutes. . . . .	283	3,804	87,733	89,928	95.0	95.0
Continuation Schools. . . . .	114	297	6,234	5,344	95.0	93.8
Vocational and Special Industrial Schools—Day. . . . .	43	1,659	32,116	31,418	94.0	97.4
Night. . . . .	43	1,732	48,351	55,975		
Totals. . . . .		7,492	174,434	182,665		

A percentage attendance of 93.8% for all elementary schools and of 95.4% for secondary schools must be regarded as satisfactory.

## DOMINION-PROVINCIAL STUDENT-AID BURSARIES

School Year	Class	Value of Awards†		Number Awarded	Total Amount Awarded	Recovered from Dominion Gov't.
		Resident	Non-Resident			
1934-44	—	—	—	192	\$45,950.00	No agreement
1944-45	—	—	—	566	134,448.00	\$31,974.00
1945-46	—	—	—	632	137,415.00	30,982.50
1946-47	—	—	—	751	161,670.00	50,000.00
1947-48	—	—	—	968	199,760.00	50,000.00
1948-49	Type A					
	University	\$200.00	\$400.00	158	57,425.00	50,000.00
	Normal School	175.00	250.00	85	20,415.00	
	Grade XIII	100.00	100.00	216	21,600.00	
	Grade XII (Voc.)	100.00	100.00	41	4,100.00	
	Type B					
	University	200.00††	400.00††	472	85,267.00	
	Ont. Coll. of Art	150.00	300.00	6	885.00	
	Ont. Coll. of Education	150.00	300.00	25	2,932.00	
	Normal School	125.00	200.00	56	6,492.00	
	Prov. Technical Institutes	125.00	200.00	6	654.00	
				1,065	\$199,770.00	\$50,000.00

† In these two columns the value of Type A Bursaries is the actual value of the award; in the case of Type Bursaries, the value is the maximum amount available.

††In the case of the Ontario College of Pharmacy, the maximum values are \$150.00 and \$300.00 respectively.

### STUDENTS RECEIVING TRANSPORTATION ASSISTANCE

First year.....	196
Second year.....	184
Third year.....	171
Fourth year.....	150
Fifth year.....	6
Sixth year.....	1
	<hr/> 708

Of these students 337 resided west of Sudbury and 371 resided east of Sudbury.

The institutions attended by these students were as follows:

University of Toronto . . . . .	273
Queen's University . . . . .	222
University of Western Ontario . . . . .	84
University of Ottawa . . . . .	53

To the Honourable Ray Lawson, O.B.E., LL.D., D.Cn.L., D.C.L.,  
Lieutenant-Governor of the Province of Ontario.

Your Honour,

I beg leave to present to your Honour the Report of the  
Department of Education for the year 1950.

Respectfully submitted,  
DANA PORTER,  
Minister of Education.

Toronto, October 1, 1951.

**PART I**  
**GENERAL**

# Report of the Minister of Education

1950

The data contained in the pages of this report throw some light on the present state of education in Ontario. The full significance of educational statistics sometimes becomes apparent only if the information presented is compared with similar figures for other systems or for other periods. For example, the expansion and improvement which have taken place in a period of one hundred years can be seen if the facts and figures in this volume are compared with some of the details and opinions contained in Egerton Ryerson's report as Chief Superintendent of Education for the year 1850. In the main such a comparison yields contrasts and differences, but occasionally we find striking parallels and the expression of views which we can hardly believe to be separated from our own by the passage of a century of educational history.

Ryerson reported that in 1850 there were in existence 3,407 school sections, with schools in 3,057 of them. He deplored the tendency to increase the number of sections and to reduce them to too narrow limits by frequent changes in their boundaries. The modern reflection of this view is to be found in the recent rapid development of township school areas. There are now 536 of these larger school units which have been formed out of 3,469 school sections, a few more than were in existence a hundred years ago. Ryerson's attitude is also significant in connection with the organization of high school districts, which is now practically complete for the province.

The age of compulsory school attendance in Ontario was raised to sixteen years by the Adolescent School Attendance Act, passed in 1919. Ryerson was in 1850 reporting the number of children between the ages of 5 and 16 as if he recognized that this represented the proper age span for school attendance. The total he gave was 259,258, but he was forced to admit that only 151,891 were in attendance, and that after all allowances were made for enrolments in private schools and grammar schools there were 100,000 children not attending any school. The school enrolment is now practically identical with the population of school age. The number is in

excess of 700,000, and the day-to-day attendance is close to 95% of the enrolment. The attendance acts are properly enforced, and public opinion recognizes their validity.

The School Act of 1850 permitted each school section to determine the method to be employed in supporting its school — whether by voluntary subscription, by rate-bill or by assessment on property. By all these methods and by allotment from the legislative grant the total amount available for teachers' salaries is given by Ryerson as £88,478. In 1950 the legislative grants for all educational purposes were in excess of \$42,000,000.

The other large item in the cost of education mentioned in the 1850 report is £14,189 spent locally on the erection and repair of school houses. The government's contribution seems to have been the distribution of 400 copies of "a comprehensive and excellent work on School Architecture." The return shows that there were 2,975 common school houses in Upper Canada; 99 of brick; 117 stone; 1,191 frame and 1,568 log. Of these 1,036 were in bad repair; only 98 had more than one room; 996 had no facilities for ventilation; 978 had no playgrounds; 1,215 had no privies. A happier note was struck in recording that 271 schools were erected during the year, and these, "in construction and conveniences," were "generally a great improvement on the old ones."

To point the contrast, the construction programme for 1950 saw the completion of 228 new schools or additions which provided accommodation for 36,000 pupils. The estimated cost was \$31,000,000. It can safely be said that these buildings also represent a great improvement on the old ones, but it cannot yet be said that the physical requirements of the school system have been completely met. It must be assumed that for the next ten years the school enrolment is likely to increase at the rate of 25,000 annually. Shortages of materials and rising costs of construction and equipment are likely to be encountered in any attempt to meet this continuing need.

The system of allotment of the legislative grants was reorganized in 1950. Since so many municipalities are faced with large capital expenditures or debenture charges incurred in connection with their school building or renovation programmes it was considered fair to make such expenditure one of the main bases of grant allotment. At the same time a larger proportionate grant was provided for poorer municipalities by fixing a differential table of percentages varying between 16 and 90 per cent, based on population and assessment, to be used in determining the rate of repayment of approved expenditures.

There was a shortage of trained teachers in 1850. Out of 3,476 teachers employed, 291 had attended the Normal School, or in other words about 8 per cent had had some professional training. The Normal School had only been open for three years. In 1950-51 there were some 25,000 teachers employed in the schools of the provincial systems. Approximately 2,200 new teachers were taking courses in the training schools, and yet it was necessary to permit, as for some years past, about 450 persons to teach without professional training.

It is of passing interest to note the reversal of the proportions of men and women teachers. In 1850 there were 2,697 males and 779 females, or rather better than three to one. The proportions in the Normal Schools and in service in the elementary schools today are just the reverse, one to three or four. In the secondary schools men are still in the majority.

For many years the elementary school grades in Ontario were named after the divisions of the four readers, from junior first to senior fourth. Ryerson admitted that one of the advantages of the adoption of the Irish National Readers was that it facilitated the classification of pupils. He added that, in 1850, these recommended books were gradually superseding all others. It is interesting to note that in 1950 we have reverted to the use

of recommended books after many years of rigidly authorized readers and other texts whose exclusive use provided uniformity but not variety. Recommended lists of books now permit the teacher considerable latitude of choice. Ryerson's remark about the use of the readers to classify pupils is also interesting in the light of modern developments. The substitution of primary, junior and intermediate divisions for the older classification is a deliberate attempt to free the school system from the shackles of the one-grade, one-book, one-year organization. Experiments with the new organization are in progress in many centres throughout the province. The freedom it permits should help to solve some of the problems of retardation of pupils held back because of weakness in one subject or another. A free organization should permit progress in each subject at a rate suitable to the capacity of the individual, and the provision of subject matter related to his interests and needs.

Where formerly uniformity was thought desirable and a detailed curriculum was imposed by the central authority, local authorities are now being encouraged to prepare their own courses. Experiments are being carried on in the development of new curricula with particular reference to local needs and interests. Special attention is being given in these experiments to the needs of the considerable number of pupils who will leave school as soon as they have passed beyond the age of compulsory attendance.

This, therefore, is a period of growth and expansion of the school system supported by generous legislative grants, a period of experimental seeking for better educational materials and methods by the enlistment of local interest and enthusiasm, and so a time of progress and healthy development in the history of education in Ontario.

# Elementary Education

## LEGISLATIVE GRANTS

During the year some alterations have been made in the grant plan. The grant is the sum of

- (a) \$16.00 for each pupil of average daily attendance during 1949;
- (b) a percentage of expenditures during 1949 for
  - (i) instructional salaries up to an amount for such salaries of \$75.00 for each pupil of average daily attendance,
  - (ii) debenture charges for new buildings or additions, and for transportation up to the amount approved in each case, and
  - (iii) approved capital outlays from current funds except that, in the case of a board in an urban municipality with a population of 2,500 or more and a board in a rural municipality with a population of 20,000 or more, the amount eligible for grant is not more than would have been eligible under Regulations 64/49,
- (c) in the case of larger units of administration, \$300.00 for each former school section included in the larger unit.

The total amount paid to elementary boards in 1950 was \$27,799,518.00, an increase of \$3,697,512.00 over the figure for the previous year.

## ADMINISTRATIVE UNITS

In recent years there has been a definite trend in the province toward a reduction in the number of administrative units for the elementary schools. Under existing legislation, councils of the municipalities concerned are permitted, by means of by-laws, to combine two or more school sections to form township school areas administered by school boards of five members. A township school area may include part or all of one or more townships, and a town or village adjacent to the rural portion of the area may be included. The by-laws to become effective must be approved by the Minister of Education. Before 1950, 514 township school areas had been formed. In 1950, 142 school sections were dissolved to form 22 new township school areas and to make additions to 10 existing areas. The formation of the 536 areas in existence at the end of 1950 has involved the dissolution of 3,469 former school sections.<sup>1</sup>

A similar trend is noticeable in the administration of separate schools. In 1950 six new union boards were formed to administer separate schools formerly under the direction of fifteen authorities.<sup>2</sup>

## TEMPORARY CLOSINGS

The closing of one-room schools with low enrolment has been encouraged in the interests of economy, efficiency, and the social development of the child by association with other children of his own age. As the result of voluntary action by the school boards concerned, thirty-nine small schools were closed in 1950. Twenty-six of these schools were in township school areas.<sup>3</sup>

<sup>1</sup> For tables see p. 90

<sup>2</sup> For tables see p. 95

<sup>3</sup> For tables see p. 95

## TRANSPORTATION OF PUPILS

The Department, during 1950, has continued its policy of assisting school boards to finance the transportation of pupils to elementary and secondary schools. The need for transportation of pupils has been created largely by increased enrolment in some schools, decreased enrolment in other schools, and the trend toward larger schools. Improved roads have facilitated transportation arrangements.

In 1950, 660 contracts for the transportation of 18,117 pupils to elementary schools were approved for legislative grant purposes. These did not include agreements for transportation necessitated by closing small schools, a type of contract which is approved by the elementary school inspector without reference to the Department.

As the organization of larger high school districts continues, the boards of most of these high school districts are assuming responsibility for the transportation of secondary school pupils.<sup>4</sup> During 1950, however, public and separate school boards received approval for legislative grant purposes for 614 contracts covering the transportation of 6,447 pupils to secondary schools. The number of rural pupils attending secondary schools continues to increase with the improvement of transportation arrangements.

## THE SUPPLY OF TEACHERS

During the school year September, 1950, to June, 1951, it was necessary to grant letters of permission for boards to engage 424 persons who did not possess complete professional qualifications for elementary schools in the province, but who had completed, at some time, a teacher-training course.

During the same period of time it was necessary to issue 443 letters of permission to boards to engage persons without teacher-training experience. Both these numbers are lower than those for the previous school year.<sup>5</sup>

## CORRESPONDENCE COURSES

In 1950 it became possible to extend the opportunities of education through correspondence courses to a wider constituency and in a broader field of subjects and grades. The courses may now be received by anyone unable to attend school, and by anyone attending school if he has the recommendation of the local elementary school inspector or high school principal and wishes to take subjects not provided in the school. The total enrolment in correspondence courses in December, 1950, was 1,446. This total included 945 taking ordinary elementary school courses, 202 in elementary bilingual courses, and 198 Grade IX and X courses.<sup>6</sup>

This enrolment showed a slight decrease in those taking elementary courses, which may have been due to the improvement of transportation facilities provided by school boards with the aid of the Department of Education. On the other hand, there was an increase in the enrolment in Grades IX and X. Adult courses and Grades XI and XII were begun this year.

In addition, a special service was given as usual to missionaries from Ontario (39 families at points in the Arctic, South America, British West Indies, Africa, China and Japan), to persons teaching on letters of permission, and to teachers and inmates of institutions such as hospitals, reform schools and penitentiaries.

The courses are free, but students taking the courses for adults and those in secondary grades are required to purchase their own books. Thirty

---

<sup>4</sup> For tables see p. 143

<sup>5</sup> For tables see p. 204

<sup>6</sup> For tables see p. 204

teachers in schools throughout the province were engaged in revising courses for the first six elementary grades, in writing new ones for seventeen secondary academic and three vocational subjects, and in preparing special elementary courses for adults. Through the courtesy of the Department of Education of the Province of Alberta, the courses for Grades I-III were adaptations of correspondence courses prepared by that province. The generosity of the Alberta Department of Education in this connection is gratefully acknowledged. In addition, work was begun on four Trade Courses being prepared in collaboration with the Federal Government and Correspondence Course Branches in other provinces.

A staff of thirty-six, twenty-eight of whom were teachers, did the teaching and clerical work for both new and old courses, and at the end of the year three teachers were appointed to mark work in Grades XI and XII on a part-time basis.

The library, newly formed in 1949 for Grade VIII only, although still small, was expanded to provide also for physically incapacitated children in Grades IV, V, VI and VII and students studying English Literature and Composition in Grades IX, X, XI and XII.

## **RAILWAY SCHOOL CARS**

In order to provide education for children living in sparsely settled areas along the lines of the northern railways, two school cars were put in operation in 1926. To-day there are six such cars, three on the C.N.R., two on the C.P.R., and one on the O.N.R. Each car operates on a circuit of approximately 140 miles and makes from six to eight circuits a year. The number of stops varies from three to five, with an average enrolment of six at each stop. The teachers are chosen for their adaptability to pioneer life. They have been of great assistance to parents and children, some of whom have been new Canadians, not familiar with our way of life. In many cases the school car has been a centre of community life.

## **SCHOOL HEALTH SERVICES**

Most school health services continue to be administered under the Ontario Department of Health as part of a general community health programme. This practice necessarily requires co-operation between the two departments of government and their officers in the field. This co-operation has been facilitated by consultation among the departmental officials concerned. There is co-operative effort also, consistent with economy of construction, to provide necessary accommodations for the school nursing staff in new and in renovated school buildings. Moreover, inspectors are expected to promote co-operation in school health work by the school boards and teachers with the local medical and nursing staffs.

## **NEW CONSTRUCTION**

In 1945, an elementary school building programme was initiated to meet the accelerated growth in school population. The number of elementary school pupils will probably continue to increase until 1960. So far, construction has kept pace with the requirements and has included 424 new schools, 368 additions, and 17 temporary buildings. Accommodation has been provided for 91,000 pupils. In 1950, 27,000 pupil-places were provided. Although in general construction has kept pace with demands, in certain suburban areas the growth has been particularly rapid, and it has been difficult to provide sufficient school accommodaton.<sup>7</sup>

---

<sup>7</sup> See also p. 12

Administrative duties requiring the attention of school inspectors have continued to be met by them with willingness and efficiency. Among such duties looming large in the inspectors' work are those concerned with new school construction, transportation of pupils, and reports relating to legislative grants. It is also the duty of inspectors to facilitate in an administrative and professional way the work of special subject supervisors and agencies, such as agriculture, art, audio-visual aids, auxiliary education, home economics, industrial arts, music, school attendance, and travelling exhibits of the Royal Ontario Museum. The services of our field inspectors have been freely given in the work of curriculum co-ordinating committees, and they have interested themselves in those schools and classes doing experimental work on curriculum. Many of them have served on the staffs of summer schools. Extra duties have also devolved on inspectors in regard to selection of and help for emergency teachers, and in their responsibilities because of discontinuance of the High School Entrance examination. All these special services are much appreciated. Group conferences of inspectors and Normal School staffs, attended also by Departmental officials, have been held periodically. These have been valuable in clarifying professional and administrative problems. Appointments of new and assistant inspectors have lightened somewhat inspectors' administrative duties through reduction in the size of certain inspectorates.

## **Secondary Education**

### **1. COLLEGIATE INSTITUTES, HIGH SCHOOLS AND CONTINUATION SCHOOLS**

#### **HIGH SCHOOL DISTRICTS**

The guiding principle in a policy of trying to meet more fully the needs of pupils in the secondary schools has been to provide an attractive variety of courses, adequate accommodations, and convenient means of transportation on as wide a scale as possible. Enlargement of school districts is one means to this end. In June, 1950, twenty-nine additional high school districts were formed to come into operation January 1, 1951. As three of these were formed by dividing existing districts and one by joining two districts, the actual increase in the number of districts was twenty-five. By the end of the year the greater part of the province had been organized into high school districts. Only four counties (Prince Edward, Dundas, Leeds and Grenville) lacked district organization entirely, but plans were being considered to organize portions of these. The average district contained nineteen elementary school sections.

Transportation approvals for 1950-51 increased greatly. High school boards operated 1,092 routes and carried 27,847 pupils 49,281 miles per day at a daily cost of approximately \$13,000.<sup>8</sup>

#### **ENROLMENT**

The total enrolment of pupils in the collegiate institutes, high schools and continuation schools of Ontario for the school year 1949-50 was 97,160. The number of full-time teachers in these schools was 4,323. The corresponding numbers for 1948-49 were 95,272 pupils and 4,101 teachers.

---

<sup>8</sup> For tables see p. 143

## BUILDING PROGRAMME

During 1950 the programme of secondary school construction was continued and extended. In 1949 eighteen secondary school projects (new buildings, additions and alterations) were completed at an estimated cost of \$7,266,000. In 1950 twenty-nine such projects were completed at an estimated cost of \$13,018,000.

New secondary schools were completed at Chesley, Cornwall (Suburban), Gravenhurst, Huntsville, Oshawa, Ottawa (Fisher Park), Parry Sound, Ripley, Tillsonburg and Wallaceburg. These attractive and well-designed buildings provide accommodations for 4,530 additional pupils at an estimated cost of \$5,703,000. The additions and alterations, at an estimated cost of \$7,315,000, accommodate 4,320 pupils. The building plans for 1951 indicate that there will be a substantial increase over the programme for 1950.<sup>9</sup>

## CURRICULUM

(a) The announcement of the combination of Grades VII, VIII, IX and X into one unit for curriculum purposes, to be called the Intermediate Division, has already had far-reaching effects in the schools throughout the province. Elementary and secondary school teachers have welcomed enthusiastically the opportunity to work together in discussing and planning new courses of study. Work on the revision of the curriculum has absorbed much of the time of administrators, supervisors and teachers.

Co-ordinating committees, locally organized under the authority of the Department of Education, have been set up to consider the curriculum requirements of their own areas. These committees have appointed subcommittees whose duty it is to draw up courses of study in the various subjects. These courses, recommended by the co-ordinating committees, may be approved by the local boards for adoption. Much of this work is still to be completed, but enough has been done to indicate that teachers have been keen to take advantage of the opportunity to introduce new ideas and to adapt subject matter to local conditions. In addition, committees of elementary and secondary school inspectors were appointed by the Department of Education to draw up general suggestive outlines of courses of study in the various subjects for experimental use.

(b) Summer workshops in curriculum building were held at Kingston and Port Arthur. Other groups met at Fergus and Dorset to work on problems related to the social studies and conservation, respectively.

(c) In Curriculum Memorandum I, issued in December, 1949, the announcement was made that steps would be taken to distribute more equitably the weight of the prescribed work over Grades XI, XII and XIII (the Senior Division). As a preliminary step experimental courses in Grades XI and XII were established for the school year 1950-51. Three schools were selected for each subject and asked to try out revised courses of study in these grades. The information gained from these experiments is expected to be helpful in making adjustments in the courses of study of the Senior Division.

## SPECIAL FORMS OF INSPECTION

Another group of composite secondary schools was selected in 1950 for joint inspection by inspectors of both the High School and Vocational School branches. These were the secondary schools at Cornwall, Galt, Kirkland Lake and Peterborough. The inspectors again directed their attention

---

<sup>9</sup> See also p. 10

chiefly to matters of organization, accommodations, promotion standards, optional subjects, guidance, and the relation of the school to the community. Although there was less opportunity for visiting the classrooms, the work of new teachers was carefully observed.

In September, 1950, another type of inspection was inaugurated on an experimental basis for a selected group of high schools with staffs of not fewer than five teachers. In view of the growth of inspectors' duties arising from the increased number of high school districts, it was proposed that inspectors might give certain schools an inspection which, for one year, would not lay as much emphasis as usual on classroom visiting. There would be more opportunity to pay attention to the work of local curriculum committees in order that the inspectors might be able to keep abreast of the latest developments. In addition a considerable part of the inspector's time might be spent with the principal, heads of departments and members of the staff in discussion of such matters as administration, organization, optional subjects and local educational problems.

Early reports on this type of inspection indicated that both principals and teachers were keen to discuss their problems with the inspector and that much was to be gained from round-table discussions by small groups.

## SECONDARY SCHOOL GRADUATION DIPLOMA

The announcement was made in September, 1950, that Departmental certificates of Middle School standing would be discontinued. This change in the regulations places upon the principal the responsibility for (a) checking and recording carefully the standing of each pupil at the end of Grade XI and (b) reporting accurately the standing at the end of Grade XII of each pupil who is eligible for the Secondary School Graduation Diploma. Marks and proficiency standing will no longer be reported to the Department.

## 2. VOCATIONAL SCHOOLS

### GRANTS AND COSTS

Legislative grants to vocational schools in the fiscal year 1949-50 amounted to \$4,500,169<sup>10</sup> and the net municipal expenditure for these schools was in excess of six million dollars. Building and equipment costs continued to increase along with operating costs.

Under the Vocational Schools Assistance Agreement the government of Canada pays a grant equal to provincial expenditures in grants for maintenance up to a fixed maximum (\$589,000) and also makes an allowance toward capital expenditures for buildings and equipment equal to fifty per cent of the provincial allowance for these purposes. Under this arrangement a payment of \$333,498 was received on account of capital expenditures and the provincial expenditures were far in excess of the amount required to qualify for the maximum grant under the maintenance clauses.

### ATTENDANCE

The day school enrolment for 1949-50 was 31,852, a figure differing by about four hundred from that of the previous year.<sup>11</sup> The enrolment in evening classes was 58,793, an increase of nearly 3,000 over the preceding year. The nearly stationary day school enrolment and the increasing attendance in evening classes are conditions which have been noticeable for several years past.

---

<sup>10</sup> For tables see p. 179

<sup>11</sup> For tables see p. 179

## TEACHER SUPPLY AND TRAINING

The generally inadequate supply of properly trained teachers for all phases of vocational education constitutes one of the greatest problems restricting its present development. There has been a steady demand from the smaller centres for the introduction of instruction in home economics, industrial arts, and commercial options. In the larger centres of population the extension of the curriculum to provide suitable new training opportunities for students who normally leave school at or about age sixteen creates a new and additional demand for teachers of trade subjects.

Summer school courses, the usual type of special training for applicants already possessing a teaching certificate, have enabled 130 teachers to qualify for Commercial certificates, 83 for Home Economics certificates, and 140 for Industrial Arts certificates.

In addition to the regular summer school courses for the training of Industrial Arts teachers, Saturday classes have proved their worth as a further means of training teachers in service. During the past year a new class was organized for the Kenora district. In Home Economics the research group organized a ten-day workshop study to train eighteen teachers in speed techniques for clothing construction.

The Technical Research Council of the Technical Section, Ontario Educational Association, conducted its annual refresher course for teachers at Balsam Lake with twenty-four teachers in attendance. This course differed from previous courses in that time was devoted to the development of newer approaches to the teaching of academic subjects in courses terminating at the end of Grade X.

## ANNIVERSARY

The teachers of Industrial Arts used the 1950 Easter Convention to mark fifty years of progress in their special field. The first Inspector of Manual Training classes in the Department of Education, Mr. A. H. Leake, who was appointed in 1900, was present at the anniversary meeting and addressed the members. To further mark the occasion the Industrial Arts Research Committee published a special bulletin with appropriate articles and messages.

## GREER MEMORIAL AWARD

The Greer Memorial Award is made annually to recognize an outstanding contribution to the advancement of education in Ontario. This year the Technical Research Section of the Technical Section of the Ontario Educational Association was honoured for its eminent services to technical education.

## 3. PROVINCIAL TECHNICAL INSTITUTES

### LAKEHEAD TECHNICAL INSTITUTE

The Lakehead Technical Institute at Port Arthur has arrived at a temporarily static position. The courses in Technical Mining and Technical Forestry have been established to the satisfaction of industry. Students graduating from the first year university courses are accepted into advanced standing at the universities of Ontario and Manitoba. Special classes for elementary school teachers and for other regularly employed adults are very popular.

Before any appreciable expansion or development can take place enlarged quarters are necessary. The Advisory Committee have been most active, working toward the establishment of permanent, adequate quarters and the incorporation of a junior college in connection with the Institute.

The Committee and staff do not foresee any marked increase in total enrolment under present arrangements; they expect to register about one hundred students each year. Students are drawn principally from North-western Ontario, but there is an ever-increasing number from Eastern Ontario applying for admission to Forestry.

### PROVINCIAL INSTITUTE OF MINING

The year 1950 opened with an enrolment of forty-one students at the Provincial Institute of Mining at Haileybury, and in May a class of eleven completed the two-year course. In September the Institute reopened with an enrolment of 29 students in the two-year course and 18 in the three-year course, a total of 47 students.

Good opportunities for mining technicians continued, and all graduates obtained suitable positions in the industry. The majority went into the survey and engineering offices of the mines or into the assay offices, geological departments and mills. Since the opening of the Institute in 1945, one hundred graduates, about fifty-five per cent of the total, have obtained positions in the survey and engineering offices. The others are engaged in various technical occupations in the mining industry.

### PROVINCIAL INSTITUTE OF TEXTILES

In June, 1950, the Provincial Institute of Textiles at Hamilton graduated its first class of 13, all of whom found immediate employment in the industry. In September the Institute reopened with a full-time enrolment of 38 students, 18 in the First Year, 9 in the Second Year, and 11 in the Third Year. Three part-time students enrolled in the day school. In October the evening school reopened with an enrolment of 155, representing 35 textile firms located in Brantford, Dunnville, Galt, Guelph, Hamilton, Hespeler, Paris, Preston, Toronto, Waterford and Welland.

The textile industry has contributed a further sum of \$10,000 for machinery, bringing their total contributions for this purpose up to \$120,000. Payments by individual firms for sponsorships, bursaries and scholarships exceeded \$15,000 during the year. Used equipment has been made available as required and many textile supplies have been donated when requested.

The Institute continues to offer courses in the technical aspects of the cotton, woollen and worsted systems of spinning, knitting, weaving and textile dyeing and finishing.

### RYERSON INSTITUTE OF TECHNOLOGY

The Ryerson Institute of Technology at Toronto offers courses of two and three years' duration in eleven broad fields: architectural technology, electrical technology, graphic arts, furniture design and fabrication, jewellery arts, photography, home and institutional management, fashion, retail merchandising, industrial chemistry, mechanical and industrial technology.

Advisory committees composed of men and women drawn from the industries concerned have been of inestimable value in assisting the authorities of the Institute in such matters as courses of study, purchase of equipment, and qualifications of staff. They have also been instrumental in raising sums of money for bursaries and scholarships. In addition, they have assisted in the placement of the graduates and have acted in a liaison capacity between the industries concerned and the Institute. These committees have contributed greatly to the Institute's rapid growth and development.

The demand for the type of instruction given at the Institute was such that the enrolment increased to the point where it is difficult to house all the

students who apply. The number enrolled in the diploma course was 825; in the special up-grading courses for industry, 45; and in the part-time courses, 323. The last number includes the students from the University of Toronto who are registered in the Occupational Therapy and Institutional Management Courses and who take their practical work at Ryerson. In the evening classes 2,307 persons were enrolled.

In addition to housing its own students, the Institute provides accommodation for the apprenticeship classes operated by the Department of Labour and the Nursing Assistants classes that are held under the auspices of the Department of Health.

The new courses in Applied Electricity, Food Administration and Home Economics, which were started in September, have been well received. It is evident that they will fill a need in the economic life of the province. At the request of the University of Toronto the course in Institutional Management is being transferred to Ryerson commencing September, 1951. It will be renamed "The Hotel, Resort and Restaurant Administration Course."

The Institute operates its own radio station, which is on the air for five hours daily during the academic year. It also publishes a student newspaper and an annual calendar.

## Professional Training

### ENROLMENT

The eight Provincial Normal Schools had a total enrolment for the 1950-51 session of 1,704 students, an increase of 223 students over the enrolment of 1949-50.<sup>12</sup> Definite increase was also registered at the Ontario College of Education, which had an enrolment of 534 students in courses for High School Assistant's, Library, Home Economics, Vocational Training, and Industrial Arts and Crafts certificates. This enrolment was 64 greater than that of the previous year.

In the fifteen years before 1949, an average of 10.6 per cent of Grade XIII students in the Provincial secondary schools entered Normal School in the following year to take the course leading to the First Class certificate. The percentage varied little during this fifteen-year period, but in September, 1949, it advanced to 13.6, and in September, 1950, to 15.3.

### RECRUITMENT

Two special efforts were made to encourage the recruitment of teachers for elementary schools in the year under review: the organization of Committees of Selection in the Normal Schools, and the use of the "teaching try-out" experience with senior students in secondary schools.

Early in 1950 a Committee of Selection was organized at each Normal School, with the principal as chairman and with other members appointed from the Normal School staff, the inspectorial staff, and the Ontario Teachers' Federation. One or more representatives of these Committees visited the secondary schools of the province to interview applicants for admission to Normal School. Principals of secondary schools informed the Committee of students in Grade XIII interested in teaching as a vocation, and advertisements, stating the requirements for entrance to Normal School and advising any interested and qualified persons to request an interview, were inserted in daily and weekly newspapers with a view to reaching possible

---

<sup>12</sup> For tables see p. 55

applicants no longer in high school. At the time of each interview, effort was made to assess the personal qualities of the applicant in so far as teaching was concerned as well as to answer questions raised by the student. Progress reports were made to the Department of Education. Committees gave special study to certain cases, and requested the medical examination of some applicants before the opening of the school term.

Values realized by the work of the Committees of Selection included: arousal of increased interest in teaching as a vocation, spread of accurate information about the education of teachers, and a gain in experience by Committee members in assessing the personal qualifications of applicants.

The second special effort was encouragement of the "teaching try-out" experience, a plan designed to give interested senior high school students an opportunity of observing and teaching elementary school pupils in the classroom. A number of high school guidance departments had been using this plan with such success that, in 1950, the Provincial Director of Guidance, with the co-operation of educational officials in Galt, prepared a pamphlet outlining the steps of the method. It is expected that the information thus made available will lead to more general use of the "try-out" plan in the high schools of the Province.

## TEACHER SUPPLY

Except in such special fields as girls' physical education and home economics, the supply of teachers for secondary schools was adequate during the year. The supply for elementary schools improved but remained below that required.

No reduction was made in the academic requirement for admission to the First Class course in the Normal Schools during the year, standing in five Grade XIII papers, including one English paper, being required as in 1949. Normal School emergency summer sessions for the training of teachers employed on Letters of Permission were again held at the Toronto and North Bay Normal Schools. Applicants for these courses were required to hold at least Middle School standing and to have taught in the Province for at least five months. A total of 296 candidates qualified for Deferred Interim Second Class certificates at the First Year Course, and 262 candidates qualified for Interim Second Class certificates at the Second Year Course at the summer sessions.

## MEDICAL EXAMINATIONS

As a result of the medical examination of applicants for admission to the Normal School course and those of the Ontario College of Education during the year, thirteen applicants were rejected and fifty-two were required to waive disability privileges under the Teachers' Superannuation Act. The cost of this medical examination was met partly by fees paid by the students and partly by the Department of Education and the Teachers' Superannuation Commission.

# Schools Attended by French-speaking Pupils

## TEACHER SUPPLY

In 1949-50 there were 147 teachers-in-training at the University of Ottawa Normal School, 22 of whom enrolled in the First Class course and 125 in the Second Class course. As a result of the term and final examinations 22 students were awarded First Class certificates, and 109 obtained Second Class certificates.

There were in this school year 1,819 French-speaking teachers employed in the elementary schools. Of this number 1,553 or 85.37 per cent held First or Second Class certificates.

## SECONDARY SCHOOL CLASSES

The total enrolment of French-speaking students taking advanced French courses in secondary schools was 2,370.<sup>13</sup> There were twenty-six schools in which these courses were provided, including the newly-established Cornwall St. Lawrence High School, which was opened in September, 1950, with an enrolment of 247 French-speaking students.

To give a more complete picture of the secondary school enrolment it should be added that besides the 2,370 students reported above there were 1,454 French-speaking pupils enrolled in Grade IX and X classes of elementary schools and 1,653 French-speaking students attending inspected private secondary schools in Ontario. Inspected private schools may, on the recommendation of the inspector, qualify for certain privileges in reporting the standing of their pupils.

## ELEMENTARY SCHOOLS

There were 52,587 French-speaking pupils enrolled in public and separate elementary schools in 1950, an increase of 2,091 over the preceding year.<sup>14</sup> The total of 52,587 includes 1,454 students in Grade IX and X classes in elementary schools, and 228 pupils in auxiliary classes.

## CORRESPONDENCE COURSES

In June, 1950, ended the eighth school year in which correspondence courses for French-speaking children of Ontario were given by the Department of Education. All the courses for pupils of Grade I to Grade VIII have been available since September, 1946. Enrolment figures are shown in Part II of this report.<sup>15</sup>

---

<sup>13</sup> For tables see p. 104

<sup>14</sup> For tables see p. 103

<sup>15</sup> For tables see p. 213

# Agriculture

The regulations of the Department of Education provide for instruction in Agriculture in elementary and secondary schools as an optional subject and for payment of special grants to boards of schools in which instruction is offered.

The study of methods of producing, processing and marketing farm products and practices in vegetable and flower growing form a part of the school curriculum. An understanding interest is thus developed in the importance of agriculture and the interdependence of urban and rural communities.

## ELEMENTARY SCHOOLS

In elementary schools Agriculture may be taken in Grades VII and VIII as an optional subject. Present courses provide that agricultural topics are included in Natural Science of Grades IV, V and VI and in General Science of Grades VII and VIII for which no special certificate in Agriculture is required.

Reports were received from 1,492 schools, of which 775 were eligible for grants. It is worthy of note that the remaining 717 schools taught Agriculture, though not eligible for grants as the teacher held no special certificate in Agriculture.<sup>16</sup>

Interest in school ground improvement is being fairly well maintained. There were more entries in the Provincial competition last year than in any previous year.

School Fairs are maintained in some parts of the province. These are organized under local committees with the assistance of the Agricultural Representative and the inspector.

On the whole the interest in agricultural instruction is being maintained. Attention is being given in many schools to imparting an elementary knowledge of plants, insects, soils and other topics related to agriculture, even though some of the teachers have not taken special training in this field. Four Regional Conferences of Normal School masters and inspectors have been held in the past year in an effort to stimulate interest in agricultural studies in the schools.

## SECONDARY SCHOOLS

Instruction in Agriculture is provided in the secondary schools in two ways. Some schools provide courses in Agricultural Science which are optional with General Science and in which agricultural topics are taken along with the topics of the Science courses. These courses are taken in Grades IX to XII in 143 schools and in Grades IX and X in 38 schools. The boards have provided reference books, magazines and equipment relating to agricultural topics. This combination of courses seems to meet with general approval, particularly in smaller schools and those serving rural areas. Many of these schools cannot provide any other form of agricultural instruction.

Another type of organization is found in schools which have adopted the programme of Agricultural Science and which operate under regulations for Departments of Agriculture. The programme in these schools includes a two-year general course through Grades IX and X and provides for instruction in Agriculture and Shop Work for boys and Home Economics for girls. Commercial work is optional with the languages in Grade X. This year Middle School courses are taken in 17 schools. The revised programme was initiated in the summer of 1944 and the number of schools now in operation has increased from 12 to 70. Provision is made in these schools for the

---

<sup>16</sup> For tables see p. 203

serving of a hot dish at noon hour and for the use of the school as a community centre.<sup>17</sup>

During the past year 8,000 pupils in 183 schools took part in home project activities. Of this number 3,000 were enrolled in club work, most of the clubs being directed by the Agricultural Representative; 700 were in Calf Clubs, 232 in Grain Clubs, 170 in Poultry Clubs, and 270 in Home Beautification Clubs. Approximately 1,000 pupils took part in county live-stock and seed judging competitions, and 125 in school and county competitions.

Departments of Agriculture are in operation in 68 schools under General Regulations and in 2 schools under Vocational Regulations, making a total of 70.

The number of schools introducing the programme under Regulations for Departments of Agriculture has shown a regular increase each year since 1943-44, when 12 schools were taking work beyond Agricultural Science. In 1944-45 there were 30; in 1945-46, 42; in 1946-47, 53; in 1947-48, 56; in 1948-49, 60; in 1949-50, 66; and in the current year, 70. Boards of several schools in new High School districts will introduce the programme next year when new buildings are completed.

## TEACHER SUPPLY

Altogether 323 teachers are engaged in giving agriculture instruction in secondary schools. While all schools with Departments of Agriculture have qualified teachers there is still a shortage of teachers properly certified in agriculture, and this shortage is felt chiefly in the smaller schools. The number of teachers granted permission was 26, nine more than last year.<sup>18</sup>

Teachers qualify for certificates in agriculture in several ways. Graduates of the Ontario Agricultural College may attend the Ontario College of Education. Those with other professional qualifications take summer courses in Agriculture at the Ontario Agricultural College.

Instruction in Agriculture is a part of the regular course at Normal Schools. The instructors are capable and a good course is given as far as the time allotment on the Normal School programme will allow. Normal School students who have taken four years of Agricultural Science during the High School course are eligible for the Interim Elementary certificate on completion of the Normal School course. Others must attend summer courses to secure the certificate.

The enrolment in the summer school for 1950 was as follows: Elementary II, 17; Intermediate I, 23; Intermediate II, 22; Specialist, 25; Inspectors, 4; Farm Mechanics, 21; total 112.

## PRACTICAL WORK

There are now forty-two schools with special Agricultural classrooms. Practice is provided in gardening and in experimental plots in 146 schools; in the care of poultry during the winter and raising chicks in the spring in 75 schools; in beekeeping at 60 schools; in greenhouse practice at 3 schools. Buildings for agricultural purposes have been built at Blenheim, Palmerston, Elmira, Oakville and Exeter. In addition, provision is made for supervising home projects of an economic nature by the teacher during the summer months. These projects include activities in calf clubs, poultry clubs, home garden clubs, grain clubs, swine clubs and similar practical farming operations, which in several areas are carried on jointly by the teacher of Agricul-

<sup>17</sup> For tables see p. 203

<sup>18</sup> For tables see p. 203

ture and the Agricultural Representative. Several thousand pupils attended the Royal Winter Fair in November by special arrangement.

## **GRANTS**

Grants for 1950 for Agriculture in elementary schools totalled \$21,135.00, and grants for Agricultural Science and Departments of Agriculture totalled \$125,426.22.

# **Art**

## **SUPERVISION AND TRAINING**

Meetings of teachers have been held in some twenty inspectorates, with illustrated lectures in which particular emphasis was placed on picture making. Art education workshops in which teachers participated in large numbers have been organized in many rural and urban areas. The summer course in Art and Crafts had again to be limited to an enrolment of 500. Thirty Community Programmes workers were included in this number.

## **PUBLICATION**

A small illustrated book **CHILDREN AND THEIR PICTURES** was published and issued in quantity to Normal Schools and to Inspectors. This book offers in condensed and simplified form an outline of approved practices in classroom picture making. Inspectors were asked to make use of the book wherever difficulties were being encountered in developing a picture-making programme.

## **SPECIAL PROJECTS**

Classes in Art for sixty children showing outstanding ability in this field were held in the Ryerson Institute of Technology on Saturday mornings from October to March inclusive.

Research in art education was continued at the Essex School Art Unit, organized jointly by the Department of Education and the Toronto Board of Education in 1948.

# **Audio-visual Education**

## **TEACHER TRAINING**

The summer course in Audio-visual aids was held in Toronto. Teachers were trained in the operation of many types of audio-visual equipment, and demonstration lessons were given to show how these aids could be used in the classroom to enrich many types of teaching.

## **SCHOOL BROADCASTS**

A programme for ninety-four school broadcasts covering fourteen different school subjects was prepared for use in the elementary and secondary schools in the province. These broadcasts were presented in co-operation with the Canadian Broadcasting Corporation over a series of twenty-three stations. A teacher's manual outlining the programme was distributed to all Ontario teachers in September.

Two surveys of the educational value of these broadcasts were made during the year. Helpful suggestions and criticisms were received and some changes were made in the programmes as a result.

The policy of correlating visual aids of all types with the broadcasts was continued as a result of recommendations received from Teachers' Conventions and school inspectors. Non-projected aids seem to prove most useful, and a careful search for suitable maps, posters, picture sets and booklets was made prior to the publication of the radio manual.

Three exchange broadcast series from other provinces were included as an experiment. Reports received at the Department served to indicate that this policy has proved useful in our schools.

## FILMS AND FILMSTRIPS

Approximately 150 additional schools registered with the Visual Education Branch for film service during the year. A supplementary film catalogue was prepared and distributed to schools using the film service of the Visual Education Branch. This catalogue contained descriptions of seventy-five new films added to the library during the year. A section showing correlation with the Programme of Studies was included as a guide to teachers in their selection of films. There were 92,819 screenings of educational films from the Visual Education Branch to a total school audience of 5,515,273 students during the year.

Revision of the recommended filmstrip lists for elementary and secondary schools served to stimulate further interest in this visual aid. Many schools are now making good progress towards building up their own local libraries of filmstrips.

# Auxiliary Education

## URBAN ORGANIZATION

In elementary schools thirty-six new classes were organized in 1950. These classes may be grouped as follows: Handicraft classes, 9; Opportunity classes, 6; Opportunity classes in Remedial Reading, 6; Speech Correction and Lip Reading, 7; Orthopaedic classes, 2; Sanatorium classes, 2; others, 2.<sup>19</sup>

In secondary schools special groups were organized by the local authorities in the Fort William Collegiate, the Kenora High School, the Long Branch High School and the St. Catharines Collegiate and Vocational School. Other groups are being organized in the Toronto secondary schools. Two types of special service are represented: (i) a remedial reading service in the Kenora and Fort William schools, and (ii) a special course provided in the Long Branch and the St. Catharines schools for a group who continue to need individual teaching.

The experimental classes in the Fort Frances High School and the Toronto Central Technical School have continued with their previous success in readjusting students and in holding them longer in school. Where courses and instruction have been adapted to the individual needs of the student, the results have been superior to any of the so-called pre-vocational courses which had been offered previously in the larger centres.

In London the Student-aid services have demonstrated the value of individual instruction. This service is for the student who has been absent for any reason or for the student who feels the need of assistance in a subject.

<sup>19</sup> For tables see p. 102

## RURAL ORGANIZATION

Rural surveys were conducted in fifteen inspectorates by the resident inspector with the assistance of inspectors from the Auxiliary Education Branch. More than 1,000 children were examined.<sup>20</sup>

A number of counties have been considering how they might best provide special educational services for rural schools. A possible solution is to secure an itinerant teacher with some of the following qualifications: training in individual teaching methods suited to the speech, sight or hearing defective; training in methods of instructing the backward child and the child retarded in reading, arithmetic and language; the ability to enlist the co-operation of the classroom teacher and give directions and training to the classroom teacher while retaining a number of pupils for personal instruction. Such a teacher would have to be capable of diagnosing educational problems, laying out remedial measures and meeting satisfactorily the questions of both teachers and parents.

## SPECIAL EDUCATION

The trends in special education everywhere indicate its extension to pre-school and adult levels and an expansion of its scope to meet a greater variety of needs. In keeping with these trends the Toronto Board of Education has established pre-school classes for deaf children. During this last year several centres were opened for children too young mentally for school attendance, following the pattern established by the pilot class in Kirkland Lake. While these are not officially connected with the educational system there has been considerable consultation with and help given by the Auxiliary Education branch.

On the adult level a considerable number of habilitation units for paraplegics and sufferers from crippling diseases have been organized to train these young people to fit in to the industrial life of the community. A number of rehabilitation units have been formed to aid men and women who because of tuberculosis, arthritis, poliomyelitis or similar physical disability must be retrained to take a new place in society. For these purposes teachers have been sent to Lyndhurst Lodge, the Isolation Hospital, and other institutions when a teacher was required.

## PROVISION FOR CRIPPLED CHILDREN

Provision for crippled children in the province includes:

- (i) Bedside teaching in hospitals, provided by boards of education in Hamilton, London and Toronto,
- (ii) Home instruction classes in urban centres and units in rural areas, for children homebound from physical defects, arranged through boards of education;
- (iii) Transportation to school for children attending orthopaedic classes and units,
- (iv) Day classes:
  - (a) Under boards of education in Chatham, Hamilton, Kitchener, London, Ottawa, Toronto, Windsor,
  - (b) Under public school boards appointed under the Public Schools Act in Woodeden near London and Variety Village near Toronto,
- (v) Volunteer centres providing care and treatment for cerebral palsied children in Chatham, Hamilton, Toronto,

---

<sup>20</sup> For tables see p. 102

- (vi) A hospital centre for 22 junior cerebral palsied children at Woodeden, under the Ontario Society for Crippled Children where children are kept a few months for inaugural training,
- (vii) A residential hospital for 24 boys at Variety Village, maintained by the Variety Club of Toronto,
- (viii) A residential home, the Home for Incurable Children, for children 16 years of age and under, in Toronto.

A residential school similar to those provided for the deaf and blind children is needed to cope with the problem of the crippled child.

## Guidance

During 1950 an attempt was made to expand the guidance services within the schools on a sound basis while avoiding the danger of "spreading too thin." Guidance involves certain services which can and should be undertaken by any school even if no staff member has specialized training in the field. On the other hand there are services which should be handled only by those who are trained in guidance. It is essential that the guidance services be consistent with the available facilities of the school and with the extent to which individual teachers have the necessary specialized training.

The voluntary movement toward guidance services in the elementary schools gained momentum. The guidance services in the secondary schools have been strengthened by the practical work which has been done. It is now generally recognized that guidance is concerned with the provision of assistance to all students in order that they may have access to the latest available educational and occupational information, that they recognize their limitations and potentialities, develop their abilities to the fullest possible extent, and utilize this knowledge and development in their school and post-school courses.

## INFORMATION

In order that all pupils might have some general assistance in getting information about educational opportunities and vocational requirements, the Ontario Department of Education continued its arrangement with the Vocational Guidance Centre of the Ontario College of Education whereby each secondary school and each elementary school inspector received free of charge, nine times a year, a parcel of the latest available guidance material.

During 1950 the production of occupational information by the Economics and Research Branch of the Dominion Department of Labour was greatly increased. This material has been furnished free of charge to the Guidance Branch which, in turn, has distributed it to the schools.

The Grade IX course in Occupations was still the only obligatory part of the guidance service. It has been such a useful and economical means of meeting certain common needs that many schools are now providing additional group work in one or more of Grades VII, VIII, IX, X and XII. The text-notebooks of the Vocational Guidance Centre have provided excellent material for study in these classes.

Conferences of high school principals, counsellors, and the faculties of the universities were held at McMaster University, Queen's University, and the University of Western Ontario. Principals and counsellors were given an opportunity to get first-hand information about the different university courses. Furthermore, these conferences fostered mutual understanding, and

laid the basis for the interchange of information which will be helpful to those secondary school graduates who pursue further education in the universities.

Circular 1:3 entitled GUIDANCE IN THE INTERMEDIATE DIVISION was published in April, 1950. It is an 80-page statement recording basic principles and practices of guidance and was offered as a concise practical handbook for guidance workers in the schools.

An outstanding feature of the year's work was the introduction of the "Ontario School Record" system. The suggested plan with its accompanying forms provides a means for the development of records which are both integrated and cumulative. They pool significant data which throw light on the individual's development and needs over a definite period of time. In addition to showing trends in development they integrate and present the data by time sequences in a manner which affords a picture of the individual's accomplishments at any given time. These records also offer an opportunity for continuity throughout the school system.

Excellent co-operation was given by the schools participating in the follow-up study of the Canadian Research Committee on Practical Education. The schools succeeded in getting questionnaires returned by 4,227 students. This was 36 per cent of the total number who withdrew from these schools in 1948.

A series of six fifteen-minute broadcasts on guidance was presented in co-operation with the Canadian Broadcasting Corporation over a network of Ontario and Quebec stations. In order to make these broadcasts more effective, lesson aids to accompany the broadcasts were supplied to all secondary schools and made available, on request, to all elementary schools.

## TEACHER TRAINING AND SUPPLY

In the summer of 1950 the Ontario Department of Education once again offered to teachers summer courses leading to Elementary, Intermediate and Specialist Guidance certificates. One hundred and sixteen teachers registered in these courses. Over nine hundred teachers in Ontario now have had some training in the field of guidance.

While it might appear that this number of people with training would be adequate to meet the demand there is a tendency for schools having teachers with training in guidance to send others for training. This has resulted in a clustering of trained people in certain schools. While this is, in many ways, desirable because it results in more efficient work in these particular schools, it is somewhat deceiving because many schools still do not have a single teacher who has taken training in guidance. Schools of various sizes which do not have a staff member trained in guidance may be classified as follows: two schools with a staff of over twenty teachers, fifteen schools with a staff of ten to nineteen teachers, fifty-nine schools with a staff of five to nine teachers, and one hundred and nine schools with a staff of one to four members.

## PLACEMENT SERVICES

Traditionally most vocational schools, and some academic schools provide a job placement service for their students. Over a period of many years certain schools have built up a clientele of employers who look to them when filling positions suitable for entry applicants. This job placement service has been a very valuable part of the guidance services and has been materially strengthened, in a number of Ontario centres, by close co-operation with the Special Placements Section of the National Employment Service.

# Music

## MUSIC INSTRUCTION

Eighty-six per cent of the classrooms in elementary schools in Ontario provide regular courses in music under the supervision of qualified music teachers. All city classrooms offer courses, and eighty-five per cent of classrooms in the counties and seventy-eight per cent of classrooms in the districts. These percentages are practically unchanged from last year except for a definite increase in the districts.<sup>21</sup>

In the secondary schools 410 schools offer music. In the majority of them the courses are confined to Grades IX and X, but there are courses in the higher grades in many schools. Instrumental music receives attention in a number of schools in addition to vocal music. School choirs are to be found in more than 200 schools, and concerts and operettas are common school activities.<sup>22</sup>

## TEACHERS AND TRAINING

The number of qualified teachers and supervisors of music in the schools of Ontario in 1950 was 1,134, of whom 775 were in the elementary schools. These figures are unchanged from 1949. The enrolment in the summer courses held in Jarvis Collegiate, Toronto, was 416 and nine different courses in vocal and instrumental music were offered. Music is a regular subject of instruction in all the Normal Schools.

## MUSIC OPTION

The number of pupils offering music as an optional subject toward a secondary graduation diploma is steadily increasing. For this purpose pupils may either take a school course if one is offered or they may submit certain certificates from the Royal Conservatory of Music, Toronto, or other accredited examining bodies. In 1950, by Conservatory certificates, 285 pupils from 131 schools obtained Grade XII standing and 220 pupils from 100 schools obtained Grade XIII standing. At the same time 448 pupils obtained Grade XII and 128 Grade XIII standing through school courses.

## RADIO

The annual series of broadcasts given by the Department of Education in co-operation with the Canadian Broadcasting Corporation were continued in January, February and March, 1950. The usual division into Primary School Music, Grades I-III, Junior School Music, Grades IV-VI, and Music for Young Folk, Grades VII-X was followed.

## CONCERTS

The concert tours promoted and underwritten by the Department of Education again provided an opportunity for secondary school pupils and their parents in small communities to hear good music provided by young Canadian artists. In 1949-50 sixty-three performers gave 152 concerts in 45 towns.

---

<sup>21</sup> For tables see p. 206

<sup>22</sup> For tables see p. 206

# School Attendance

## ENROLMENT

For the school year 1949-50 the total enrolment of the schools of the provincial system was 745,276, an increase of 32,864 over the previous year. The elementary schools showed an increase of 31,195 and the secondary schools an increase of 1,669. Only the continuation schools showed a decrease in total enrolment, and this is attributable to the transfer of pupils from these schools to the better equipped schools of new high school districts.<sup>23</sup>

## SCHOOLS AND TEACHERS

There were 5,899 public schools and 947 separate schools in operation in the school year 1949-50. The staffs of these schools numbered 16,306 and 3,740 respectively.<sup>24</sup>

## ATTENDANCE

Elementary schools had an attendance record of 93.0 per cent and the secondary school of 94.9 per cent, which may be considered as satisfactory. The common causes of absence all contribute, with illness responsible for about 70 per cent of the lost time.<sup>25</sup>

## EMPLOYMENT

The number of school children's employment certificates issued in the calendar year 1949 was 771. These are issued only to children under fourteen years of age, and are valid for not more than six weeks in a term. The number of home permits issued to adolescents from fourteen to sixteen years was 1,384. Employment certificates issued to adolescents fourteen to sixteen totalled 4,603. As a pupil must obtain a certificate for every change of employment the number of pupils affected would be less than the number of certificates issued. Comparable figures for 1950 are as follows: children's employment certificates 628; adolescent home permits 1,399; adolescent employment certificates 4,465.<sup>26</sup>

# Examinations and Scholarships

The Departmental Examinations branch is concerned mainly with the supervision of the Departmental examinations, the recording of standing, and the issuing of academic and professional certificates.

In recent years the administration of the student-aid programme, including Dominion-Provincial Student-Aid Bursaries and Transportation Assistance, has been an added responsibility of considerable importance.

## DEPARTMENTAL EXAMINATIONS

Statistics showing the results of the Grade XIII and the Normal School examinations, as well as the number of Intermediate certificates, Secondary

---

<sup>23</sup> For tables see p. 68

<sup>24</sup> For tables see p. 68

<sup>25</sup> For tables see p. 69

<sup>26</sup> For tables see p. 69

School Graduation Diplomas, and Secondary School Honour Graduation Diplomas issued, will be found in Part II of this Report.<sup>27</sup>

In the fall of 1949 the immediate discontinuance of the High School Entrance examination was announced. In 1950 pupils were promoted from Grade VIII to Grade IX upon the recommendation of their principals, subject to the approval of the elementary school inspectors concerned.

## **STUDENT-AID**

### **(a) Dominion-Provincial Student-Aid Bursaries**

When the first scholarships were established in 1943 many awards lapsed for want of suitable applicants. However, in recent years practically all of the available bursaries have been awarded and accepted. The purpose of the bursaries is to assist students of adequate ability who are financially unable to continue their education. In 1949-50 there were 1,155 awards made to students. The total amount distributed was \$229,820, including a contribution of \$60,000 from the federal government.<sup>28</sup>

### **(b) Transportation Assistance**

The transportation subsidies provided by the Department of Education for persons who reside in the territorial districts and are enrolled at an eligible institution have now been in operation for four years. In 1950 the sum of \$13,163.85 was paid in transportation assistance to 659 students. Of these 427 resided west of Sudbury and 232 east of Sudbury.<sup>29</sup>

### **(c) Scholarships for Post-graduate Study in France**

The Department of Education Act provides for the payment out of the Consolidated Revenue Fund annually the sum of \$600 to be awarded by the Minister of Education in scholarships to residents of Ontario for the purpose of enabling them to pursue courses of study in France. For the school year 1950-51 the holders of these scholarships were Miss Margaret Carleton of Guelph Collegiate Institute and Vocational School, Miss Glenise E. McKenna of Timmins High and Vocational School, Miss Ruby Stauffer of Niagara Falls Collegiate Institute and Vocational School, and Miss Bessie E. Stewart of Leaside High School.

## **INTERCHANGE OF TEACHERS**

The Department of Education encourages interchange of teachers as a means of maintaining Commonwealth unity, of promoting national and international goodwill and understanding, and of broadening teachers' interests and their knowledge of educational methods.

For the school year 1950-51 thirty-three exchanges were arranged, twenty-two with the British Isles, eight with other provinces of Canada, and three with the United States.

---

<sup>27</sup> For tables see p. 151

<sup>28</sup> For tables see p. 205

<sup>29</sup> For tables see p. 205

# Public Records and Archives

The chief purpose of the Archives branch is to collect and preserve government records of enduring value and to make these available to authorized persons, including serious students of history. It has also been a policy of the branch to accept or acquire, as occasion offered, records of all kinds which are of province-wide significance. Without a central repository in which documentary and other treasures can be preserved there is a great danger that much material of the greatest historical interest will be lost. Both these functions of the provincial archives will be better carried out with the completion of the new Archives building, and the transfer of the accumulated materials to roomier quarters.

## Community Programmes

The Department of Education administers its provincial services in the fields of community recreation and adult education through its Community Programmes branch. The services provided by the branch are designed to encourage the development of programmes of cultural, social, physical and educational activities which may be sponsored by public and private agencies in the communities throughout the Province. In the main these services consist of annual grants to municipal councils establishing and maintaining public recreation programmes; a technical advisory service to municipal and community organizations; training courses for activity or group leaders; the preparation and circulation of periodicals, bulletins, and manuals and materials for training courses and the provision of Provincial services for the training of immigrants in Citizenship and basic English.

Towards the cost of these services in 1950 a grant of \$74,063.25 was received from the Federal Government as authorized under the National Physical Fitness Act.

### ANNUAL GRANTS

Annual grants are paid to municipalities which appoint Municipal Recreation Committees under the Regulations of the Department of Education, and which establish or maintain municipal recreation services. This financial assistance has encouraged the widespread growth of public recreation services through the Province. Now 163 municipalities have organized public recreation programmes and 62 municipalities employed paid full-time directors of recreation. Five years ago eighteen municipalities received grants totalling \$10,213.90. In the fiscal year 1950-51, 138 municipalities received \$195,351.06.<sup>30</sup>

Grants amounting to \$5,150 were also made to the following associations concerned with recreation and adult education: Ontario Recreation Association, Canadian Youth Hostels Association, Christian Work Camp Fellowship of Canada, Ontario Association of Film Councils, Ontario Camping Association and Ontario Council of Christian Education.

### ADVISORY SERVICES

The branch provides advisory services to community groups and interested citizens through a headquarters staff of technically trained advisers

---

<sup>30</sup> For tables see p. 206

and through a staff of 13 field representatives operating from six district offices located in Fort William, North Bay, Ottawa, Toronto, London and Hamilton. These staffs supply consultation services by correspondence or personal visits, organize and conduct leadership training courses, and prepare and distribute publications and resource materials. During 1950 over 450 advisory visits were made to Ontario communities by the advisory staff. The volume and variety of the requests from community groups has made it necessary to expand these services during the past year and specialist advisory services are now offered in the following fields: Municipal Organization for Recreation, Parks and Recreation Facilities, Social Recreation, Physical Recreation, Drama, Films and Radio, Family Relations, Citizenship Training, Surveys and Research, and Arts and Crafts.

## LEADERSHIP TRAINING

Since the scope and extent of adult education and recreation programmes are largely dependent upon the availability of trained leaders, the policies and resources of the Community Programmes Branch are primarily directed towards leadership training.

Municipal directors of recreation were offered a short course at Kingston in September, 1950. This course, with an enrolment of 50, was given in co-operation with the Extension Department of Queen's University.

Community group leaders were provided with courses in Art, use of Audio-visual Aids, Parent Education and Family Relations, Leadership Techniques, Handcrafts, Physical Recreation, Social Recreation, and Theatre. Altogether 148 courses with a total enrolment of 7,475 were held in 102 centres all over the province.

Rural group leaders attended night schools operated jointly by the Community Programmes branch and the Department of Agriculture. In 1950, twenty-one of these schools offering instruction in one or more of the following were conducted: Woodworking, Public Speaking, Sewing, Motor Mechanics, Folk Dancing and Singing, Hobby Crafts, Welding and Metalcraft, French, Farm Engineering, Drama, Weaving, Farm Science, Farm Machinery, Music, Wood Refinishing, Leathercraft, Home Decorating, Home Building and Repairs, Radio, Electricity, Shop Work, Art, Plastics and Art Metalwork, Oil Painting, Design, Home Nursing, Food and Nutrition, Rural Planning, Bookkeeping, Typing and Shorthand.

Advanced summer courses in art, crafts, music, and theatre are given to teachers and community leaders by the staff of the branch at the regular summer schools of the Department of Education.

## PUBLICATIONS

There has been a marked increase during the past year in the demand for publications and instructional material on recreation and adult education which are prepared and issued by the Branch. These include THE COMMUNITY COURIER, a monthly magazine of general interest; literature and instructional aids in Citizenship, Parent Education, Theatre, Hockey, Baseball and Puppetry; and playground manuals on Arts and Crafts, Quiet Periods, Sports and Active Games, and Puppetry. Over 53,000 copies of these publications were distributed during 1950-51. The branch maintains a technical library service which lends books to recreation workers and distributes the Publications of the Physical Fitness Branch of the National Department of Health and Welfare.

## **CITIZENSHIP TRAINING**

A training programme is conducted in Basic English and Citizenship for both newcomers to Canada and Canadian-born adults. Many of these classes are operated by local school boards, but in outlying districts classes are organized and teachers are paid directly by the branch. Teaching aids and literature issued by the Federal Government or by the Branch itself are supplied to these classes and examinations are held and certificates of proficiency awarded which are accepted by the judges before whom these newcomers appear when applying for Canadian Citizenship certificates. In 1950-51 there were altogether 14,006 students enrolled in 550 Citizenship training classes. Eighty-two of these classes were specially organized in places where school classes were not available.<sup>31</sup>

## **NEW SERVICES**

The increasing public interest in community recreation has made it necessary for services to be offered in new fields. One of these is Employee Recreation, a field which is developing rapidly, particularly in defence industries. For this reason the Surveys and Research unit of the Branch undertook a survey of employee recreation programmes in a thousand manufacturing industries throughout Ontario. A report on this survey is being printed and will be issued in the near future. Research studies in other fields related to recreation are also being conducted.

# **Public Libraries**

## **SERVICE**

At the end of 1950 the public book service of the province was covered by 212 public libraries, 266 library associations and two fully organized township libraries. The larger public libraries operate 46 branches, making the total number of outlets 524. In addition there are 12 county library co-operatives serving rural communities in which no library has been established, carrying book service to approximately 1,400 rooms in rural schools, and strengthening the service already offered by village libraries and those in the smaller towns.

## **BOOKMOBILES**

Three bookmobiles, or mobile libraries are in use, providing service in the suburban areas of York Township, Etobicoke Township and London.

## **LIBRARIANSHIP**

Since the adoption of certification in 1946 there has been a steady increase in the number of professionally qualified librarians serving the province, although the demand for such trained personnel is still in advance of the supply. In the public service there are now 420 librarians holding certificates in Classes A, B and C. Those holding Class E certificates number 113.

## **GRANTS**

Legislative grants to public and country libraries in 1950 were \$425,000. The total expenditures of libraries increased by \$310,000 over

---

<sup>31</sup> For tables see p. 206

the previous year, and amounted to \$2,971,515. The increase in total expenditures was made up by \$45,000 in book purchases, \$222,000 in salaries and \$43,000 in maintenance and general costs.

## **USE OF BOOKS**

Book circulation in 1949 reached a total of 14,700,000, an increase of 700,000. This total was made up of adult non-fiction, 2,500,000; children's books, 6,000,000; adult fiction, 6,200,000. The trend towards greater use of more thoughtful and useful books is still marked and is being strongly fostered by the libraries.

## **NEW LIBRARIES**

During the year two new public libraries were established, two associations became public libraries, and three new associations were set up. One county council passed a county library by-law but was unable to have the library in operation in the current year.

## **TRAVELLING LIBRARIES**

During the year 6,745 books were added to the Travelling Libraries stock, and 6,300 were withdrawn as being no longer fit for service. Boxes sent out numbered 1,486 and the books contained in them accounted for 66,940 issues. It is notable that, of this number, 54,000 were used in elementary schools.

# **Trade Schools**

The number of schools registered in 1950 under The Trade Schools Regulation Act was 148. Applications for registration of six schools with head offices in the United States and without branch offices in Ontario were refused. There was one cancellation of registration for failure to comply with the regulations, and approval was given for the registration of three new schools.

## **DAY AND NIGHT SCHOOLS**

Periodic inspections were made of these schools to determine the adequacy of accommodation and of the students' protection against fire hazard and accident. Courses of study and examination requirements were examined and teachers' qualifications were rated.

Because of increased accommodation costs and higher teachers' salaries approval was given for fee increases varying from ten per cent to twenty-five per cent.

## **CORRESPONDENCE SCHOOLS**

The courses of study offered and the method of providing home-study services were inspected. Permission was granted for an increase in fees varying from ten per cent to fifteen per cent because of the increased cost of text-books, lesson assignments and administrative and teachers' salaries.

# Physical and Health Education

## OBJECTIVES

Specific objectives of the Physical Education branch are:

- (1) the improvement and organization of physical education programmes in the elementary and secondary schools of the province,
- (2) to give assistance and encouragement to teachers in the field,
- (3) to provide adequate training of teachers for organizing and teaching physical education,
- (4) to promote a better understanding of the educational value of physical education on the part of school and community personnel,
- (5) leadership training for secondary school children, especially as it applies to school athletics and camp counselling.

## SUPERVISION

Visits were made to 230 secondary and 107 elementary schools, and time was devoted to discussing with the teachers their current problems and the planning of general programmes of activities.

Bulletins for men and women teachers, dealing with instructional methods and professional news, were prepared and distributed four times in the year.

## TEACHER TRAINING

Summer courses in Physical and Health Education, each of five weeks' duration, were held for three different groups of teachers. A course at Guelph for elementary school teachers had an enrolment of 123; at Kingston 48 secondary school women teachers attended; and at Toronto there was an attendance of 44 secondary school men teachers.

Twenty-two short courses were held for elementary teachers in rural areas, with a total enrolment of 706. Nine courses of instruction for coaching and officiating in hockey, basketball, and track and field were held in different centres.

Assistance was rendered in the production of two films designed to help instruction in rural schools. Funds for this purpose were provided from the Strathcona Trust Fund.

## CAMPS

Four leadership courses, each of two weeks' duration, were conducted at the Ontario Athletic Training Camp, Lake Couchiching. The candidates, 218 girls and 222 boys, were selected by secondary school principals and staff members. These students on their return provide leadership in athletics and recreation both in the school and in their community.

Two camps were operated to provide trained leaders for non-profit summer camps. At Belwood Lake two three-week courses were held, attended by 134 girls. At Bark Lake one three-week course and two two-week courses trained 120 boys. Counsellors trained in these courses are making a valuable contribution in the camps to which they go.

Subsidies amounting to over \$25,000 were paid to 197 non-profit camps. The camps receiving this assistance provided camping experience of from six to fourteen days for more than 20,000 boys and girls.

# Ontario School for the Blind

## ENROLMENT

One hundred and seventy-six pupils, including 94 boys and 82 girls, were enrolled at the Ontario School for the Blind in 1950, compared with a total of 188 pupils in the previous year. Three students left during the term, making the total at the end of the school year 173.<sup>32</sup> The distribution of this enrolment by provinces was as follows: Ontario, 115; Alberta, 11; Manitoba, 17; Saskatchewan, 30.

Tables showing the visual acuity and the causes of blindness of the pupils will be found on p. 218. It will be seen that twenty-two of the thirty-two new pupils have some sight in each eye, and that four more have some sight in one eye. These twenty-six have at least sufficient vision to be able to get about safely, but not enough to enable them to obtain an education visually.

## PROGRAMME

A balanced programme of academic, physical, and social activity was provided for the pupils in the light of their individual needs and capacities. Music and drama continued to receive emphasis, and highlights of the year were participation in the Brantford and Brant County music festivals, and the presentation of a one-act play at the Central Ontario Drama Festival at Hart House, University of Toronto. Academic instruction was given in all grades from I to XII. Group and team activities were features of the vigorous programme in physical education.

# Ontario School for the Deaf

## ENROLMENT

The enrolment of the Ontario School for the Deaf during the school year 1950-51 was 345. This total showed an increase of two pupils over the total of the previous year.<sup>33</sup>

## PROGRAMME

The school is organized in three departments. The junior department, in which the pupils range in age from 5 to 11 years, is a preparatory division in which initial instruction is given. The intermediate department for pupils aged 12 to 15 years provides instruction in sewing for the girls and manual training for the boys, in addition to an academic programme that includes language, reading, arithmetic, history, geography, nature study, and art. The senior department accommodates students of 15 years and over, and operates on a rotary basis. Students in this department divide their class time equally between academic study and vocational work. Courses in carpentry, printing, baking, barbering, business, and farming are provided for the boys. Courses in dressmaking, fancy sewing, beauty parlor work, laundry, cooking, general housework, and business are provided for the girls.

---

<sup>32</sup> For tables see p. 208

<sup>33</sup> For tables see p. 207

# Service Record

## IN MEMORIAM

John Duncan Campbell, B.A., D.Paed., who retired on August 31st, 1945, from the position of Assistant Superintendent of Elementary Education, died February 24th, 1950, at his home, 70 Lascelles Boulevard, Toronto, in his seventy-fifth year. Dr. Campbell was born in the Township of Wellesley, Waterloo County, and received his elementary education in the rural school of S.S. No. 9 Turnberry, Huron County. He obtained his secondary education at Seaforth Collegiate Institute and Harriston High School. In 1895 he attended the Provincial School of Pedagogy and began teaching in U.S.S. No. 12 Culross, Bruce County, where he remained for four and a half years, resigning his position to become principal of Highgate Continuation School. Later he attended the University of Toronto and graduated in 1908 with First Class Honours in Mathematics and Physics. In September, 1908, he was appointed to the staff of Chesley High School and was named as principal in 1909. In 1913 he received an appointment from the Department of Education as Master in the Stratford Normal School, later serving in the same capacity at the Ottawa and Toronto Normal Schools. Under his skilful and steady guidance thousands of student-teachers learned the art of teaching. In 1928 Dr. Campbell was appointed to the staff of Inspectors of Technical Schools under the Department of Education, and one year later was named Assistant Chief Inspector of Public and Separate Schools, the title of which office was changed in 1944 to Assistant Superintendent of Elementary Education. Dr. Campbell remained in this official capacity until his retirement in 1945, ever carrying out the duties of this responsible position with outstanding care and ability. In 1943, Dr. Campbell was awarded the degree of Doctor of Pedagogy by the University of Toronto. His thesis related to the teaching of arithmetic and was a splendid contribution to education in this field. The educational system of Ontario benefited greatly from the services of Dr. J. D. Campbell, and his sound scholarship and good judgment won for him the respect of all his associates.

James Brown MacDougall, B.A., D.Paed., who had until his retirement in 1942 held the position of Assistant Chief Inspector of Public and Separate Schools, died on May 28th, 1950, at his home, 304 St. Clair Avenue East, Toronto, aged 79. Dr. MacDougall's career was particularly identified with the development of education in Northern Ontario. He was the first resident Inspector of Public Schools there, being so appointed in 1904. As a young man he travelled by primitive means of transportation the great stretches of Northern Ontario, establishing schools and school boards throughout the rapidly growing mining, agricultural and lumbering settlements. It was his initiative that started the unique system of Railway Car Schools, "schools on wheels," that still serve groups of children living in isolated communities at the small stations on the great east-west and north-south railway lines of Northern Ontario. During Dr. MacDougall's term from 1925 to 1942 as Assistant Chief Inspector he revised the system of recording school attendance, and had much to do with the first steps toward Consolidated Schools and Township School Areas. Dr. MacDougall was a native of Scotland, but received his early education in Almonte and his professional training in Perth Model School and Ottawa Normal School. He graduated from Queen's University in 1896 and from the Provincial School of Pedagogy as a Specialist in Classics in 1897. In 1918 he received the degree of Doctor of Pedagogy from the University of Toronto. He served in various important posts as a teacher, including that of principal of the North Bay Model School, and from 1911 to 1919 as Master on the staff of the North Bay Normal School. Further

details of Dr. MacDougall's career appear in the account of his retirement in the Minister's report for 1942. Subsequent to his retirement Dr. MacDougall devoted time to writing. He won distinction as the author of *TWO THOUSAND MILES OF GOLD*, a romance of Canadian mining, published in 1946. He was also the author of *MISS CANADA'S RECEPTION*, *BUILDING THE NORTH*, and *THE REAL MOTHER GOOSE*.

J. W. Hagan, M.A., former Public School Inspector for Oxford County (South) and Norfolk County (in part), died on November 25th. From 1917 to 1942 Mr. Hagan served as inspector in the Manitoulin area. He was born in North Walsingham Township in Norfolk County, and received his early elementary and secondary education in S.S. No. 17 North Walsingham, the Simcoe High School, and the Brantford Collegiate Institute. He took his professional training at the Norfolk County Model School at Simcoe and at the Ottawa Normal School. Later he completed the examinations of the Ontario School of Pedagogy in Toronto. Mr. Hagan taught for several years in rural schools. Later he served as principal of the Cainsville Public School and the Delhi Public School. He also taught in the high schools of Georgetown, Petrolia and Simcoe. He graduated from Queen's University, obtaining the Master of Arts degree, and won the gold medal in Animal Biology of the Honour Science Course. Mr. Hagan did much to advance the cause of education as a teacher, as a principal, and as an inspector.

John Hartley died in London on Tuesday, October 17, 1950. He was born in the Township of Turnberry, Huron County. He attended a rural school, Walkerton High School, Harriston High School, and Owen Sound Collegiate Institute. His professional training was obtained in Walkerton Model School, the Toronto Normal School, and the Ontario Normal College, Hamilton. Mr. Hartley taught for twenty years in Huron County. During five years of that period he was principal of Clinton Model School. He was principal of Vankleek Hill Model School for French-speaking teachers from 1912 to 1929. From 1929 until 1937 he was Assistant to the Chief Inspector of Public and Separate Schools. He was appointed to the inspectorate of Huron East in January, 1937, but retired in April, 1938, as a result of ill health. Mr. Hartley was active in church work in Clinton and was secretary of the Public School Board. He is survived by his widow, one son and two daughters. He will be remembered for his faithful service in the schools of Huron County.

A. A. Jordan, B.A., B.Paed., LL.D., former Inspector of Public Schools for York No. 3, died at his home in Toronto on October 27th, 1950. Born in Dufferin County, Dr. Jordan was a graduate of Queen's University. He became principal of the Model Schools at Meaford, Prescott, Port Hope, Kingston, and Sturgeon Falls. Dr. Jordan began his duties as Inspector on September 1st, 1915. In 1936 he was given an honorary degree of Doctor of Laws by Queen's University. As an educationist, Dr. Jordan had a splendid record. The services he rendered to teacher-training and to inspectorial work were outstanding.

E. E. C. Kilmer, B.A., passed away at Brantford on March 9th, 1950. Mr. Kilmer was born in Malahide Township, Elgin County. He received his education in the Aylmer Public and High Schools. He graduated from the University of Toronto and Queen's University. For many years he taught in the Brantford Public Schools and in the High Schools at Aylmer and Stratford. In 1908 he was appointed Public School Inspector for the City of Brantford, where he served with distinction until his retirement in 1929. For many years he was a member of the Brantford Board of Education. Mr. Kilmer maintained a keen interest in the Children's Aid Society, the Social Service League, the Brant County Historical Society, and the Y.M.C.A.

A. G. Leitch, B.A., B.Paed., former Public School Inspector in Toronto, died on May 18th, 1950. Mr. Leitch served for forty years as a teacher and inspector in Toronto schools. He attended high school at Dutton, and received

his first teaching experience as principal at West Lorne. In 1907 he became principal of Coleman Avenue School, which became part of the Toronto Public School system in 1909. Later he served as principal of Leslie, Park, and Ryerson Schools. In 1926 he received his Bachelor of Arts degree from Queen's University, and in 1928 his Bachelor of Pedagogy degree from Toronto University. In 1927 he was appointed Public School Inspector in the City of Toronto, a position which he held with credit to the profession and honour to himself until his retirement on December 31st, 1947.

R. A. A. McConnell, B.A., passed away on July 12th, 1950. Mr. McConnell was born at Aultsville, Ontario, where he received his public and secondary education. Mr. McConnell was a graduate of Queen's University. He had experience as a teacher and principal in the public schools of Madoc, Meaford, and Sudbury, and also served as a Model School principal in these centres. He was principal of the Palmerston Continuation School when he received his appointment as Public School Inspector for District Division 11 on September 1st, 1928. Mr. McConnell served this area as inspector until 1935, when he transferred to Lanark County, where he was inspector until 1939. In this year he was transferred to Northumberland and Durham Counties. On January 1st, 1941, he was transferred to Grenville County, with residence at Prescott. Mr. McConnell was an efficient teacher and principal, a very conscientious inspector, and advanced appreciably the cause of education in the different areas where he served.

Selkirk A. Morrison, B.A., who retired as Inspector of Public Schools for East Grey in 1940, died at his home in Meaford on October 25th, 1950. Born in Scotland, Mr. Morrison came to Canada as a child and settled with his parents in Grey County. He received his early education in the public schools of Bentinck Township and in Durham High School. After graduation from Model School, Mr. Morrison taught in several elementary schools in Ontario and one in Saskatchewan. Following his graduation from Queen's University he joined the staff of Barrie Collegiate Institute. He served later as principal of the High Schools of Markdale and Elmira. In 1927 he accepted an appointment to the inspectorate of East Grey, with headquarters in Meaford. Mr. Morrison entered whole-heartedly into community affairs, and was revered for his faithfulness and ready co-operation in every worthy project brought to his attention. In the educational field he is remembered especially for his early sponsorship of the teaching of music in the schools of his inspectorate, and for his capable leadership in improving the schools under his jurisdiction.

Lt.-Col. J. W. Odell, B.A., former Inspector of Public Schools for Northumberland and Durham No. 2, passed away on August 15th, 1950, at his residence, 356 Walton Street, Cobourg. Mr. Odell was in his 84th year. Born in England in 1866, he came to Canada in 1875. His elementary and secondary education was completed at Orono and Bowmanville. He obtained a Third Class Professional certificate in 1886 from the Port Hope Model School. After teaching public school for three years, he entered the University of Toronto, graduating in 1892 as Gold Medallist in Pure Mathematics. In 1895 he was appointed Mathematical Master in Cobourg Collegiate Institute, where he taught until the outbreak of the First World War in 1914. He gave valuable service to his country in the training of Artillery units throughout the duration of the war. In January, 1919, Mr. Odell was appointed Public School Inspector for Northumberland and Durham No. 2, from which position he retired in 1938. His wise counsel and helpful co-operation with boards of trustees and teachers were reflected in the progress made by the schools of this inspectorate during his period of office.

John R. Pickering, B.A., B.Paed., retired Inspector of Public Schools, passed away at his home in Uxbridge on June 29th, 1950. Born in Riceville,

Ontario, Mr. Pickering completed his elementary and secondary education in schools of that district. After attending Normal School he served as a teacher and principal in various schools of the province. His Bachelor of Arts and Bachelor of Pedagogy degrees were received from the University of Toronto. In his later years he was a member of the Senate of that University. Mr. Pickering received his appointment in 1935 as Inspector of Public Schools in District Division 13, with headquarters at North Bay. In 1939 he was transferred to the inspectorate of Hasting South, with residence in Belleville. From January, 1944, until his retirement in August, 1947, he served the inspectorate of Ontario North. Those associated with Mr. Pickering remember him as an excellent teacher and capable supervisor, whose ability and devotion to duty inspired all who had the honour of being associated with him.

Dr. John A. Marquis, the attending physician at the Ontario School for the Blind at Brantford, passed away on March 23th, 1950. His services to the school extended over a period of forty-nine years, a record which can rarely have been equalled in any institution. His love for the pupils was genuinely paternal and throughout his long association with the school he was found to be so constantly ready to serve by day or by night, so sympathetic in his care, and so efficient in his ministrations that he was beloved by all. Staff and students mourn the passing of a personal friend.

## RETIREMENTS

J. Stanislaus Gratton, Inspector of Separate Schools for parts of Prescott and Russell Counties, took advantage of long service under the Department of Education to retire at midsummer of 1950. Mr. Gratton was born at Plantagenet, Prescott County, and received his elementary and secondary education at the public and high school there. His professional training was taken at the English-French Model School, Ottawa, in 1908, and at the Ottawa Normal School, session of 1910-11. Mr. Gratton was principal of the graded public school of No. 6 North Plantagenet, Plantagenet Village, 1911-12, and then was appointed to teach at the Sturgeon Falls English-French Model School, a position which he held from 1912 to 1915. During the year 1915-16 Mr. Gratton attended the University of Toronto. Recalled to Plantagenet, he again headed the school of No. 6 North Plantagenet for the year 1916-17, and then he received an appointment by the Department of Education as Inspector of English-French schools for Northern Ontario. Later, he inspected these public and separate schools in Essex County and elsewhere, and was transferred to Eastern Ontario in 1927, where he carried out his duties as Inspector with outstanding success until his retirement. Mr. Gratton holds the esteem and friendship of all with whom he has been associated during his long career as Inspector.

William E. Hume, B.A., D.Paed., for many years Inspector of Public Schools in the City of Toronto, retired on March 1st, 1950. Dr. Hume was born in Georgetown, where he received his elementary and secondary education. He obtained an honour degree from Queen's University, and in 1921 the University of Toronto granted him the degree of Doctor of Pedagogy. In partial fulfilment of the requirements for this degree he wrote the thesis, "The Improvement of Teachers-in-Service." Dr. Hume taught in Westport Continuation School, Meaford Model School, Brooklin Public School, Whitby Collegiate Institute, and several Toronto Public Schools. In 1922 he was appointed Public School Inspector. He was the originator of the "Opportunity Plan" books. He developed techniques for improving the articulation and the pronunciation of public school pupils. He devised a self-rating scale for teachers. For a time he was Chairman of the Toronto District Junior Red Cross Executive.

F. P. Smith, M.A., retired on August 31st, 1950, as Public School Inspector for Frontenac South No. 2 and the City of Kingston. Born in Augusta Township, in the County of Grenville, Mr. Smith received his elementary and secondary education in Prescott, and later graduated from the Prescott Model School, Hamilton Normal School, and Queen's University. Mr. Smith taught in rural schools in Grenville County, in Spencerville Continuation School, and in Prescott High School. Later he was principal of Parkhill High School, and Science Master in Brockville Collegiate Institute. Appointed as Inspector of Public Schools in 1920, he served from 1920 to 1927 in Prince Edward County, from 1927 to 1934 in the City of Kingston, and from 1934 to 1950 in Frontenac South No. 2 and the City of Kingston.

Leonard Wheelton, B.A., retired from the office of Superintendent of Windsor Schools in 1950. Mr. Wheelton received his elementary and secondary education at Cache Bay, Sault Ste. Marie, and Hamilton. Before moving to Hamilton he taught for two years in rural schools at Rydal Bank and at Steelton. In 1907 he graduated from the Ontario Normal College at Hamilton. From 1907 to 1910 he taught at Vienna and Oakville. After attending Queen's University he taught until 1915 in the Lindsay Collegiate Institute. Having obtained his Specialist certificate in Art, he was appointed to the staff of the Windsor Collegiate Institute. Later he served as principal of Central Collegiate Institute, the Hon. J. C. Patterson Collegiate Institute, and the Hon. W. C. Kennedy Collegiate Institute. In 1939 he was appointed Superintendent of Windsor Schools. Although Mr. Wheelton was primarily interested in education, he was always ready to serve any good cause. Outside of school, his interests lay in the work of the church and the community. He was a zealous worker for the Windsor Rotary Club, the School Safety Patrol Association, Teachers' Federation, the Windsor Swimming Club, and many other fine organizations.

Miss Catherine Ford, who had given forty-two years of outstanding service in the School for the Deaf, retired on superannuation in June, 1950. She was appointed to the staff in 1908, after having taught for six years in public schools in Simcoe County. In recent years her time had been devoted to the training of teachers for deaf children.

A Catherine Ford scholarship has been established out of contributions from friends of the school, from the present staff and from former staff members. Two pupils of the junior school will receive awards annually for progress in speech and speech reading. A plaque to commemorate the establishment of the scholarship has been placed in the school. On the plaque are the words, "All Her Talents She Gave, Withholding None."

Miss Helen A. McClung, M.A., Provincial Archivist of Ontario, retired on superannuation in May, 1950. She had been associated with Public Records and Archives since 1915. Her training as a historian proved eminently useful in the work of this branch and the expansion of the various collections and their increased usefulness through greater accessibility were due in very large measure to her efforts, always devoted to the public service.

A. C. Ritter, B.A., B.Paed., Public School Inspector for District Division 7 from 1945 to 1950, resigned from the Public Service on August 31st, 1950, to serve as Director of Education for the City of Kingston. Mr. Ritter was born in Woolwich Township in Waterloo County. He received his elementary and secondary education at Elmira and at Kitchener. After graduating from Toronto Normal School in 1924 he taught for two years in rural schools in Woolwich Township. From 1926 to 1932 he served in the Continuation Schools at Oil Springs, Orono, and Gore Bay. He was principal of Continuation Schools at Plattsville and Fenelon Falls from 1933 to 1937. In 1937 he was appointed principal of Leamington High School. Mr. Ritter joined the R.C.A.F. in 1941 and had several years' service as an Education Officer. For

some time during this period he was Command Education Officer for No. 1 Training Command. In 1945 he was appointed Public School Inspector for District Division 7, with residence at Sudbury.

George E. Tait, B.A., B.Paed., Inspector of Public Schools for Welland (in part) and Lincoln (in part), resigned in June, 1950, to become Associate Professor of Elementary Education at the Ontario College of Education. Mr. Tait is a native of Lambton County, where he received his elementary and secondary education. He graduated from the London Normal School and holds degrees from the University of Western Ontario and the University of Toronto. Commencing in 1931, he taught ten years in the London Public Schools. In 1941 he was appointed Director of the Anglo-American School in Bogota, South America. His educational work there was mentioned in despatches to the Canadian Government forwarded by the British Ambassador and the Canadian Trade Commissioner. After returning to Ontario in 1944, Mr. Tait served as Public School Inspector three years in Huntsville and three years in Welland. Of latter years he has become interested in the writing and illustrating of juvenile books. His best known stories are THE SADDLE OF CARLOS PEREZ and THE SILENT GULLS. He has also acted with the inspectors of the Niagara Peninsula in the production of four educational books.

J. Eugene Durrant, B.A., after serving for six years as a high school inspector, was appointed principal of Etobicoke Collegiate Institute in September, 1950. Before his appointment as inspector Mr. Durrant had been vice-principal and head of the department of mathematics at Guelph Collegiate Institute.

The following appointments were made to the provincial staff of inspectors during the years 1949 and 1950:

**1. City of Hamilton:**

L. E. Rouse, B.A., B. Paed., appointed Public School Inspector, January 1, 1949.

**2. City of Ottawa:**

(1) Robert Westwater, B.A., D.Paed., formerly Public School Inspector, appointed Chief Inspector of Public Schools, August 1, 1949.

(2) W. T. MacSkimming, M.A., B.Paed., Principal of Mutchmor Public School, Ottawa, appointed Public School Inspector, August 1, 1949.

(3) T. A. S. McKee, B.A., B.Paed., Principal of Devonshire Public School, Ottawa, appointed Public School Inspector, August 1, 1949.

**3. City of Peterborough:**

P. D. Windrim, B.A., B.Paed., appointed Public School Inspector, January 1, 1949.

**4. Haldimand:**

H. A. Christie, B.A., B.Paed., Assistant Inspector in Norfolk, appointed Public School Inspector, January 1, 1949.

**5. Norfolk:**

D. R. MacDonald, B.A., B.Paed., Principal of North Public School, Simcoe, appointed Assistant Public School Inspector, August 1, 1949.

**6. District Division 6:**

A. G. McKay, B.A., Assistant Principal, Cody Public School, Sault Ste. Marie, appointed Public School Inspector, September 1, 1949.

**7. R.C.S.S. Division 13:**

Alexander Kuska, B.A., Business Administrator and Supervising Principal, Crowland Township School Area No. 1, appointed Separate School Inspector, August 1, 1949.

**8. City of Kingston:**

A. C. Ritter, B.A., B.Paed., Public School Inspector for District Division 7, appointed Director of Education, August 1, 1950.

**9. City of London:**

W. D. Sutton, B.A., B.Paed., appointed Public School Inspector, September 1, 1950.

**10. City of Ottawa:**

M. R. VanLoon, B.A., B.Paed., appointed Public School Inspector, January 1, 1950.

**11. City of St. Catharines:**

H. R. Partlow, B.A., B.Paed., appointed Public School Inspector, January 3, 1950.

**12. City of Windsor:**

T. C. White, B.A., B.Paed., Public School Inspector for Windsor Public Schools, appointed Superintendent of Schools, September 1, 1950.  
C. R. MacLeod, B.A., B.Paed., of the London Normal School staff, appointed Public School Inspector, September 1, 1950.

**13. Elgin:**

J. F. Lawless, B.A., Principal of Langton Public School, appointed Assistant Public School Inspector, September 1, 1950.

**14. Essex:**

F. A. Leitch, B.A., Assistant Public School Inspector, appointed Public School Inspector, January 1, 1950.  
C. R. Crawford, B.A., Assistant Inspector without designated area, appointed Assistant Public School Inspector, January 1, 1950.

**15. Grenville:**

C. A. Holmes, B.A., B.Paed., Assistant to the Principal of the Ontario School for the Deaf, Belleville, appointed Public School Inspector, September 1, 1950.

**16. Lambton No. 2:**

A. V. Vincent, B.A., B.Paed., Principal of Ada Richards Public School, Windsor, appointed Public School Inspector, September 1, 1950.

**17. Peel:**

G. W. C. Nelson, B.A., of the Kitchener Public School staff, appointed Assistant Public School Inspector, January 1, 1950.

**18. Renfrew North:**

M. A. Craig, B.A., B.Paed., Assistant Public School Inspector in Wentworth, appointed Public School Inspector, September 1, 1950.

**19. Wentworth:**

W. G. Anderson, B.A., Principal of Queen Victoria Public School, North Bay, appointed Public School Inspector to assist Inspector J. K. Evans, September 1, 1950.

**20. York No. 7:**

Miss L. L. McNeill, B.A., of the Parkhill High School staff, appointed Assistant Public School Inspector, September 1, 1950.

**21. District Division 7:**

C. M. Elliott, B.A., of the Copper Cliff High School staff, appointed Public School Inspector, September 1, 1950.

**22. R.C.S.S. Division 4:**

Benjamin Michaud, B.A., B.Paed., of the Mattawa High School staff, appointed Separate School Inspector, September 1, 1950.

**23. R.C.S.S. Division 5:**

H. W. Cyr, M.A., B.Paed., Public and Separate School Inspector without designated area, appointed Separate School Inspector, September 1, 1950.

**24. R.C.S.S. Divisions 17 and 18:**

Miss Rose Lynch, B.A., B.Paed., promoted from Assistant Inspector to Inspector, associated with Inspectors J. M. Bennett and T. S. Melady, May 1, 1950.

**25. R.C.S.S. Division 19:**

J. C. Doyle, B.A., of the Toronto Separate School Staff, appointed Separate School Inspector, September 1, 1950.

**26. Inspectors Without Designated Areas:**

L. A. Code, B.A., of the Registrar's Branch, Department of Education, appointed Assistant Public School Inspector, September 1, 1950.

H. W. Cyr, M.A., B.Paed., of the Eastview High School staff, appointed Public and Separate School Inspector, January 1, 1950. (Later assigned to R.C.S.S. Division 5.)

C. A. Rath, B.A., Principal of Kirkland West School (Teck Township School Area), appointed Public School Inspector, September 1, 1950.

E. J. D. Webster, B.A., of the Community Programmes Branch, Department of Education, appointed Public School Inspector, January 1, 1950.

## **HIGH SCHOOL INSPECTORS**

D. F. Dadson, B.A., of the staff of the University of Toronto Schools, was appointed a High School inspector on January 1, 1950.

W. T. Laing, B.A., principal of Wallaceburg High School, joined the High School inspection staff on September 1, 1950.

## **TRANSFERS**

The following transfers have been made in the provincial staff of inspectors:

1. W. E. Eade, B.A., B.Paed., from Haldimand to York No. 5, January 1, 1949.
2. Elwood Oakes, B.A., B.Paed., from Leeds No 2 to Middlesex West, September 1, 1949.
3. Gordon Young, B.A., from Middlesex West to Leeds No. 2, September 1, 1949.
4. R. O. Staples, B.A., D.Paed., who was on leave of absence for one year, transferred to Ontario North, September 1, 1949.

5. W. G. Chatterton, B.A., B.Paed., from Renfrew North to Welland (in part); Lincoln (in part), September 1, 1950.
6. H. W. Knight, B.A., B.Paed., from Grenville to Ontario North, September 1, 1950.
7. Joseph Lapensee, B.A., from R.C.S.S. Division 27 to R.C.S.S. Division 26, September 1, 1950.
8. Lucien Laplante, M.A., from R.C.S.S. Division 5 to R.C.S.S. Division 27, September 1, 1950.
9. F. A. Moreau, B.A., B.Paed., from R.C.S.S. Division 4 to R.C.S.S. Division 7, September 1, 1950.
10. T. J. Thompson, B.A., B.Paed., from Lambton No. 2 to Oxford South, September 1, 1950.

#### NORMAL SCHOOLS

1. J. F. Kinlin, B.A., B.Paed., exchanged with C. P. O'Neill, M.A., London Normal School, for one year beginning September 1, 1949.
2. C. E. Potts, B.A., Assistant Inspector in Peel, transferred to Peterborough Normal School, September 1, 1949.
3. Miss Bertha Dick, B.A., B.Paed., transferred from York No. 7 to North Bay Normal School, September 1, 1950.
4. K. H. D. Hall, B.A., B.Paed., transferred from Elgin to London Normal School, September 1, 1950.
5. L. B. Hyde, B.A., transferred from Oxford South to London Normal School, September 1, 1950.
6. R. O. Staples, B.A., D.Paed., transferred to Toronto Normal School, September 1, 1950.
7. J. F. Kinlin, B.A., B.Paed., who had been on exchange for one year with C. P. O'Neill of the London Normal School, returned to R.C.S.S. Division 12, September 1, 1950.

<sup>a</sup>—Collegiate Institutes, High Schools and Continuation Schools.

<sup>b</sup>—Includes Senior Auxiliary Schools.

<sup>c</sup>—School Year 1949-50.

<sup>d</sup>—In the 20 composite schools many teachers spend part-time in the academic department and the remainder in the vocational.

<sup>e</sup>—As at December 31, 1950.

<sup>f</sup>—Includes 536 township area boards, 15 improvement district boards, 17 consolidated school boards and 85 boards of education.

<sup>g</sup>—Includes 35 union separate boards.

<sup>h</sup>—Included in the academic group.

<sup>i</sup>—For calendar year 1950.

<sup>k</sup>—Includes transportation paid by elementary school boards on high school pupils.

<sup>l</sup>—Covers items 2, 3, 4 and 5 of Expenditures.

<sup>m</sup>—Average daily attendance.

<sup>w</sup>—To elementary schools only.

(1) Excluding payments by the Province to boards for services rendered such as \$330,514 in 1949 and \$469,171 in 1950 for the education of pupils from certain unorganized areas and \$14,070 in 1949 and \$15,619 for the use of schools for practice teaching.

(2) The Federal Government paid the Province \$275,549 in 1949, and \$1,522,261 in 1950 in connection with the grants to vocational schools. This latter sum includes two amounts of \$589,000, being the annual payments for two years.

(3) Included in general legislative grant.

NOTE: Where used in the above table "n.a." means "not applicable."

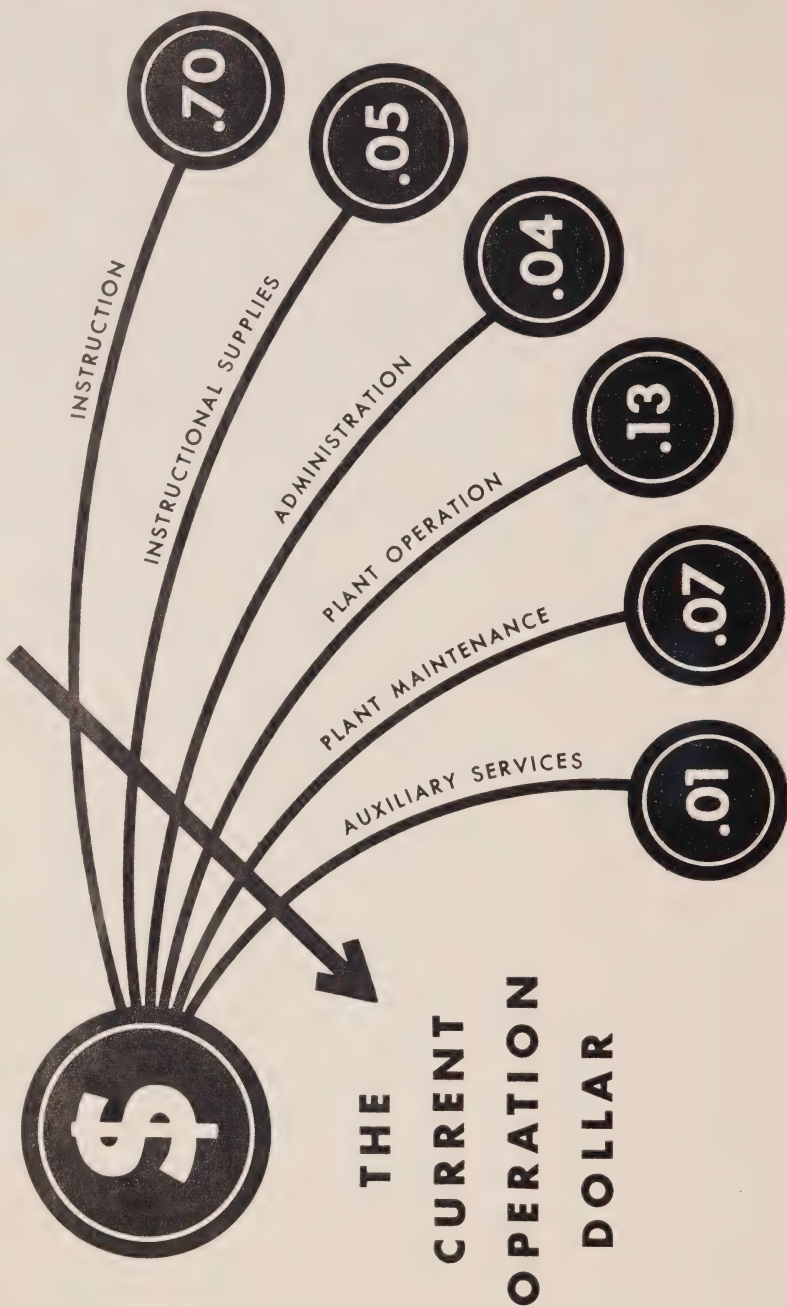

### III—APPROXIMATE AMOUNT SPENT IN 1950 PER PUPIL OF AVERAGE DAILY ATTENDANCE ON THE VARIOUS FACTORS OF CURRENT OPERATIONS

#### DEFINITION OF FACTORS:

- Instruction** —Actual payments made for salaries of principals and all other teachers (regular, supply, special, including Inspectors, Superintendents and Directors employed by the Board).  
**Instructional Supplies**—Supplies, but not equipment, used as an aid in teaching and learning. This includes teachers' supplies, pupils' supplies, text books, library books, films and rental of films, maps, supplies for music, manual training, home economics, agriculture.  
**Administration** —The business expenses of the board and the secretary-treasurer. This includes salary, office supplies and other expenses of the secretary-treasurer, attendance officer and clerical staff; audit fees, legal fees, postage, advertising, telephone, bank charges on cheques, stamps on cheques; expenses on account of the O.E.A., liability insurance, upkeep of the administration building.  
**Plant Operation** —The keeping of the school building open and ready for use. It includes the salary, expenses and supplies of the caretaker; fuel, water, electricity, rent, etc.  
**Plant Maintenance** —The keeping of the grounds, buildings, furnishings and equipment in a state of good repair. This includes repairs and minor alterations, repainting, redecorating, insurance, care of portable buildings and temporary classrooms.  
**Auxiliary Services** —Activities not directly a part of the main business of instruction yet closely connected with the school. This includes recreational supplies, expenses of school rink, school fair or picnic expenses; prizes or scholarships when paid for by the board; cadet corps expenses; transportation of pupils other than to school, disbursements for hot lunches cafeteria, etc.  
**Wages of Non-Teaching Employees** —Administrative and maintenance staff.

## POST-WAR SCHOOL BUILDING CONSTRUCTION

The effectiveness of the school building programme in Ontario is indicated below in school terms. New pupil places provided by the construction of new schools and additions for each year from 1945 to 1950. The total for six years is 90,300 pupil places in elementary and 20,300 in secondary schools. This includes replacements and additional accommodation.

Because of war conditions, the general programme of Summer Courses was discontinued from 1941 to 1944, inclusive. During that period, the following courses were offered:

1942 —Summer Course in Defence Training, Health and Physical Education—925.

1942-43—Winter Course in Manual Training, Type A—40.

1944 —Summer Course in Physical and Health Education and Cadet Training—313.

1944 —Refresher Course in Medieval History given during Christmas vacation—45

1944-45—Winter Course in Manual Training Type A—48.

\*Visual only. †Art only until 1945. ‡Physical Education only to 1945. §Guidance only since 1945.

Cost covers current operations, capital charges, capital outlays from current funds, and transportation.

This Table excludes the 5 Senior Auxiliary Schools. The cost per pupil of average daily attendance in these was \$522.98. If these 5 schools are included with Vocational above, the following revisions in the year figures appear:

A.D.A. Vocational and Senior Auxiliary.....	27,118
Cost per pupil of A.D.A.—Vocational and Senior Auxiliary.....	\$359.48
All Secondary.....	303.23
All Schools.....	167.26

# POST WAR TREND IN EDUCATION COSTS PER PUPIL

- Notes:
1. Costs shown are annual costs per pupil of average daily attendance.
  2. Cost covers current operations, capital charges, capital outlays from current funds and transportation.
  3. High schools include collegiate institutes.
  4. Transportation costs to secondary schools include those paid by elementary school boards.

### NORTHDALE PUBLIC SCHOOL, WOODSTOCK

Woodstock's new Northdale Public School exemplifies the modern trend in beauty, safety, light and colour. The exterior is buff brick, thus creating a striking appearance. The building is constructed on a single storey plan, with all exits on ground level. Maximum natural light, supplemented by the most modern artificial lighting, exists. Light gray walls and attractive floor designs go a long way toward cheerful, pleasant classrooms.

The school has eight classrooms, including a kindergarten. Its "gymnasium" provides stage and sports facilities. Provision has also been made for a principal's office, a teachers' room and a nurses' room. There is no basement. The cost was \$198,000.

**TABLE 3—LARGER ELEMENTARY SCHOOL UNITS OF ADMINISTRATION**  
as of Jan. 1, 1951

**A—TOWNSHIP SCHOOL AREAS BY INSPECTORATES**

See Circular Elementary 15 "The Township School Area in Ontario" for details as to sections involved, administration, organization and benefits. There are now 536 Township School Areas in the Province. The organization of these came as a result of the union of 3,469 school sections (60.35% of the school sections of the Province). In 1950, 22 Township School Areas were organized, uniting 142 school sections. The growth of this movement by years is shown below:

	<b>SUMMARY</b>	Township School Areas	No. of School Sections
No. formed before 1938.....		15	84

# TABLE 3—LARGER ELEMENTARY SCHOOL UNITS OF ADMINISTRATION

## A—TOWNSHIP SCHOOL AREAS BY INSPECTORATES (continued)

### Victoria West

Bexley  
Cardon  
Dalton  
Eldon  
Fenelon  
Laxton, Digby, etc.  
Mariposa No. 1  
Mariposa No. 2  
Mariposa No. 3

### Waterloo No. 1

Waterloo No. 1  
Waterloo No. 2  
Waterloo No. 3  
Wellesley South

### Waterloo No. 2

Dumfries North No. 1  
Dumfries North No. 2  
Wilmot No. 1

### Welland East

Stamford

### Welland South

Bertie East  
Willoughby

### Welland (in part) and Lincoln (in part)

Caistor  
Gainsboro  
Crowland No. 1  
Crowland No. 2  
Pelham No. 1  
Pelham No. 2  
Wainfleet

### Wellington North

Arthur  
Luther West  
Minto  
Peel

### Wellington South

Eramosa  
Erin No. 1  
Erin No. 2  
Garafraxa West  
Guelph  
Puslinch

### Wentworth

Ancaster No. 1  
Ancaster No. 2  
Barton  
Beverly  
Binbrook  
Flamboro East  
Flamboro West No. 1  
Flamboro West No. 2  
Glanford  
Saltfleet No. 1  
Saltfleet No. 2

### York No. 1

Georgina

### York No. 2

Etobicoke

### York No. 3 and No. 4

York

### York No. 5

York East

### York No. 6

Scarboro No. 1  
Scarboro No. 2  
Scarboro No. 3

### York No. 7

York North No. 1  
York North No. 2  
York North No. 3

### York No. 8

Markham and Vaughan

### District No. 1

Jaffrey and Melick  
Machin  
Southworth and Hartman

### District No. 2

Alberton  
Atwood  
Blue  
Devlin  
McCrosson  
Mather and Poits  
Morson  
Nelles  
Patullo  
Worthington

### District No. 3

Blake  
Gillies  
Paipoonge and Scoble  
Pearson  
Lybster  
O'Connor  
Paipoonge South  
Pardee  
Strange

### District No. 4

Connree  
McGregor  
McIntyre  
Neebing  
Oliver

### District No. 5

Lyon, Sterling, etc.  
McTavish  
Nipigon  
Schreiber  
Sibley

### District No. 6

Aberdeen, Galbraith, etc.  
Aberdeen and Plumber  
Deroche, Jarvis, etc.  
Jocelyn and St. Joseph  
Korah  
Laird  
MacDonald  
Prince  
Tarbutt  
Tarentorus  
Wawa

### District No. 7

Martland, Falconer, etc.  
Dowling and Balfour  
Neelon and Garson  
Wickstead

### District No. 8—1

Cleland and Dryden  
Hagar, Appleby, etc.  
Drury, Dennison, etc.  
Salter, May and Harrow  
Waters

### District No. 9

Day, Bright Additional  
Gladstone, Bright, etc.  
Gould, Wells, etc.  
Johnson  
Plummer Additional  
Thessalon  
Thompson  
Assignack  
Barrie Island  
Billings  
Burpee  
Carnarvon  
Cockburn Island  
Dawson  
Gordon and Allan  
Howland  
Robinson  
Sandfield  
Tehkummah

### District No. 10—1

Glackmeyer and Blount  
Calvert North  
Calvert South  
Clute and Calder  
Clute, Fournier, etc.  
Eilber  
Way and Lowther

### District No. 11—1

Whitney

### District No. 12

Black River No. 1  
Black River No. 2  
Black River No. 3  
Chamberlain  
Larder Lake  
Marter  
Teck and Lebel

### District No. 13—1

Armstrong  
Barber and Cane  
Brethour  
Bryce and Robillard  
Bucke  
Casey  
Coleman  
Dymond  
Evanturel  
Harley  
Harris  
Haultain, Milner etc.  
Hilliard  
Ingram  
Kerns  
Lorrain  
Matachewan

### District No. 14—1

Beaucage, etc.  
Bonfield  
Calvin  
Chisholm  
Commanda, Chisholm  
Ferris West  
Mattawan  
Phelps  
Ratter and Dunnet  
Strathy, Chambers, etc.  
Widdifield  
Hardy, McConkey, etc.  
Himsworth North  
Nipissing

### District No. 15

Brunel  
Chaffey  
Franklin  
Stisted  
Armour  
Kearney, Bethune, etc.  
Gurd, Pringle, etc.  
Himsworth South  
Lount  
Machar  
McMurrich  
Perry  
Strong

### District No. 16

Cardwell  
Carling  
Christie  
Foley  
Hagerman  
Humphrey  
Magnetawan  
McDougall  
McKellar  
Monteith  
Ryerson

### District No. 17

Draper  
Macauley  
McLean  
Medora and Wood  
Monck  
Morrison  
Muskoka  
Oakley  
Ryde  
Stephenson  
Watt  
Airy and Sabine  
Murchison and Lyell

Total 536

# TABLE 3—LARGER ELEMENTARY SCHOOL UNITS OF ADMINISTRATION

## B—IMPROVEMENT DISTRICTS

Name	Year of Formation	District Division No. or County	District or County	No. of School Sections
Atikokan	1945	II	Rainy River	1
Beardmore	1945	IV	Thunder Bay	2
Cameron	1939	XIV	Nipissing	3
Gauthier	1945	XII	Temiskaming	1
Kingham	1945	XII	Temiskaming	2
Kingsford	1940	II	Rainy River	2
Marathon	1946	V	Thunder Bay	1
Mountjoy	1945	XI (1)	Cochrane	4
McGarry	1944	XII	Temiskaming	1
Red Rock	1946	V	Thunder Bay	1
Renabie	1949	VII	Sudbury	1
Sioux Narrows	1949	I	Kenora	1
Terrace Bay	1947	V	Thunder Bay	1

Total 13

## C—CONSOLIDATED SCHOOLS

School	Year of Formation	District Division No. or County	District or County	No. of School Sections
Barwick	1920	II	Rainy River	3
Britt	1924	XVI	Parry Sound	2
Burris	1920	II	Rainy River	2
Charlton	1923	XIII	Temiskaming	3
Dorion	1920	V	Thunder Bay	3
Grant	before 1921	Carleton	Carleton	2
Grantham	1923	Lincoln	Lincoln	2
Hudson	1910	XIII	Temiskaming	1
Katrine	1923	XV	Parry Sound	2
Mallorytown	1919	Leeds	Leeds	4
Morley	before 1921	II	Rainy River	3
Nobel	1920	XVI	Parry Sound	2
North Mountain	1923	Dundas	Dundas	4
Pointe au Baril	1925	XVI	Parry Sound	2
Quibell	1926	I	Kenora	3
Savard	1920	XII	Temiskaming	4
Sundridge	1923	XVI	Parry Sound	2
Tamworth	before 1921	Addington	Addington	5
Tweed	before 1921	Hastings	Hastings	3
Wellington	1920	Prince Edward	Prince Edward	6

Total 20

## D—SEPARATE SCHOOL UNIONS

Board	Year of Formation	R.C. Division No.	County or District	No. of School Sections
Adjala	1949	XV	Simcoe	3
Anderdon and Sandwich W.	1950	X	Essex	2
Baxter	1944	XV	Muskoka	2
Brant and Greenock	1944	XI	Bruce	5
Charlottenburgh and Lancaster	1942	XVIII	Glengarry	2
Chatham	1945	X	Kent	2
Clarence	1949	XXIV	Russell	3
Dover	1945	X	Kent	4
Etobicoke	1946	XV	York	2
Fauquier and Nansen	1946	IV	Cochrane	4
Griffith and Matawatchan	1939	XIX	Renfrew	2
Hanlan	1945	IV	Cochrane	3
Howe Island	1939	XVIII	Frontenac	3
Idington and Owens	1945	IV	Cochrane	3
Loughborough	1940	XVIII	Frontenac	2
Idington and McCrea	1950	IV	Cochrane	2
Kendall	1950	IV	Cochrane	2
Maidstone and Rochester	1945	X	Essex	2
Maidstone and Sandwich South	1945	VIII	Essex	3
Owens and Williamson	1950	IV	Cochrane	3
Pyne and Fox	1949	IV	Cochrane	2
Tilbury North	1945	X	Essex	2
Tyendinaga and Richmond	1939	XVIII	Hastings and Lennox	6
Walsingham North and Middleton	1944	XIII	Norfolk	2
Way "A"	1949	IV	Cochrane	2
Way "B"	1948	IV	Cochrane	3
Wellesley	1942	XII	Waterloo	2
Wolfe Island	1945	XVIII	Frontenac	0
MacPherson, Loudon and Kirkpatrick	1950	V	Nipissing	4

Total 29

Toronto and Suburban Separate School Board includes several formerly independent boards and, therefore, it is in the nature of a Union but covered by a special Act.

**TABLE 4—LARGER ELEMENTARY UNITS FORMED IN 1950**

**Township School Areas by Inspectorates**

Township	Number of School Sections	County or District	Inspector
Bagot and Blythfield.....	4	Renfrew	H. H. Loucks
Brock.....	14	Ontario	R. O. Staples
Bruce.....	13	Bruce	J. M. Game
Cleland and Dryden (Un.).....	3	Sudbury	W. MacMillan
Devlin.....	4	Rainy River	N. Muir
Douro No. 2.....	2	Peterborough	K. O. Birkin
Gosfield South.....	3	Essex	F. A. Leitch
Harrow and Colchester South.....	2	Essex	F. A. Leitch

## COMMONWEALTH PUBLIC SCHOOL, BROCKVILLE

*Courtesy Drever and Smith, Architects*

Brockville's new Public School, the Commonwealth, is a beautiful modern, two-storey building, with 15 regular classrooms and two kindergartens. It accommodates 600 pupils, which is approximately half the town's enrolment. It contains a roomy auditorium, seating 400. This room also serves as a gymnasium.

Among the Commonwealth's features are four project rooms, sport dressing rooms with tiled shower rooms for boys and girls; a kitchen for the teachers; playgrounds which have ball diamonds, basketball courts and an outdoor rink, the latter for community use also.

The regular classrooms have chalk boards of green glass, designed to eliminate glare and eye-strain. Acoustic block ceilings and rubber tile floors absorb classroom clatter. Cloakrooms are air-conditioned and arranged to do away with "mad scrambles" at closing time. Combination seats and desks make seated hours a pleasure. Inkwells are designed to prevent spilling. Each room has a wash basin, and the heating and air conditioning are thermostatically controlled.

Premier Leslie Frost, K.C. officiated at the opening ceremonies.

TABLE 19—PUPIL TRANSPORTATION 1950-51

Approximately three and three-quarter million dollars was expended in the calendar year 1950 on transportation of pupils to and from school. Some 50,000 pupils received this service, of whom roughly 20,000 went to elementary school. One thousand vehicles were used, and over 60 per cent of these were models of 1947 to 1951. 46 per cent of these school busses had seating capacity of 36 or more.

The schedule below indicates the maximum rate per mile approved by the Department for grant purposes. However, the total approved cost per route might not exceed 50c per pupil per day except in remote areas where the maximum might be increased to the rate per pupil or per load indicated in Column 4 if adequate reason was advanced.

MAXIMUM RATES

Col. 1	Col. 2	Col. 3	Col. 4
Class	Pupil Load	Rate per Mile	Maximum Approval in Remote Areas
1	1	6c	\$ .75 per pupil
2	2	8	.75 per pupil
3	3-5	12	.70 per pupil
4	6-8	16	.70 per pupil
5	9-11	18	.70 per pupil
6	12-14	20	8.50 per load
7	15-17	22	10.50 per load
8	18-20	24	12.00 per load
9	21-23	26	13.50 per load
10	24-26	28	15.00 per load
11	27-29	30	16.50 per load
12	30-32	32	18.00 per load
13	33-35	33	19.00 per load
14	36-38	34	20.00 per load
15	39-41	35	21.00 per load
16	42-44	36	22.00 per load
17	45-47	37	23.50 per load
18	48-50	38	25.00 per load
19	51-53	39	26.50 per load
20	54-56	40	28.00 per load
21	57-59	41	29.50 per load
22	60 & over	42	30.00 per load

(1) Where more than one board is concerned in the contract, the apportionment of the cost and of the pupils among the boards concerned must be indicated on the contract; and where more than one vehicle is used to fulfil the contract, the number of pupils and the mileage for each vehicle must be also indicated.

(2) The schedule is not to apply in the case of transportation of elementary school pupils from a school which is closed where the Inspector has authority to approve expenditures for transportation without reference to the Department.

(3) Where transportation is provided by public carrier and fares are paid, the actual cost of tickets purchased for approved transportation shall be eligible for grant, and the application form should indicate the number of pupils being transported and the total amount of the fares. However, in no case will rates higher than those indicated in Paragraph 2 be approved for grant.

(4) In the case of busses owned by boards, the amount eligible for grants shall be,—

- the lesser of the amount expended on approved transportation (excluding capital charges and capital outlays for current funds) or an amount based on a rate of twenty cents per mile; and
- expenditures on the purchase of busses up to the lesser of the actual cost, or, \$150, multiplied by the seating capacity of the bus, subject to the condition that tenders stating the specifications of the vehicle(s) have been called for; and that approval of the expenditure has been given.

(5) All motor vehicles used for the transportation of pupils shall meet the requirements of The Public Vehicles Act and the Regulations with respect to licence and insurance.

## TILLSONBURG DISTRICT HIGH SCHOOL

This beautiful, modern school, designed to serve the educational needs of 600 pupils, half of whom come from rural homes, has 19 instruction rooms. Among its features are a Board room, a Guidance Office, an Agriculture room, two Shopwork rooms, a Commercial room, Art and Music rooms, and a gymnasium with seating capacity for 1,000. It has a campus of 14½ acres. A quarter-mile cinder track encloses the football field. The cost was \$575,000.

# ACADEMIC SECONDARY SCHOOLS

(Continued on following page)

TABLE 24—ENROLMENT, ATTENDANCE, GRADE, RESIDENCE, 1949-50

**Note 1.** All cities except Ottawa (Higher Path, H.S.-J. Sudbury and Windsor have sufficient institutions. Collegiate institutions located elsewhere are indicated thus: †  
**Note 2.** Continuation Schools are listed at the end of each County or District and are indicated thus: †  
**Note 3.** The schools of a larger high school district are indicated

# TABLE 45—PUBLICATIONS OF THE DEPARTMENT OF EDUCATION PROVINCE OF ONTARIO

As of September 1st, 1951

The year or years in which the latest revision was printed are shown in each case.

## A. COURSES OF STUDY

### Junior Kindergarten to Grade VIII

1. Programme for Junior and Senior Kindergarten and Kindergarten Primary Classes of the Public and Separate Schools, 1944, 1946, 1950.
2. Programme of Studies for Grades I to VI of the Public and Separate Schools, 1942, 1947, 1949.
3. Programme of Studies for Grades VII and VIII of the Public and Separate Schools, 1947, 1949.
4. Programme for Religious Education in the Public Schools, 1949.
5. Curriculum I. 1, Intermediate Division, Outlines of Courses for Experimental Use, 1951.
6. Circular I. 3, Guidance in the Intermediate Division, 1950.

## B. REVISION OF CURRICULUM

7. Curriculum: 1, Revision of Curriculum, December 10, 1949.
8. Curriculum: 2, Promotion from Grade VIII and Admission to Grade IX, March 30, 1950.
9. Curriculum: 3, Establishment of Local Committees on Curriculum, May 15, 1950.
10. Curriculum: 4, Text-books in the Social Studies (Geography, History and Map Reading), Junior and Intermediate Divisions, 1950.
11. Curriculum: 5, Text-books, Primary, Junior, and Intermediate Divisions, 1951.
12. Curriculum: 6, Legislative Grant on Expenditures for Text-books and Library Books, 1951.

## C. COURSES OF STUDY

### Grades IX to XIII

13. Circular H.S. 1, Requirements for Certificates and Diplomas for 1951-52. Outlines subjects of various courses leading to Intermediate Certificates, Secondary School Graduation Diplomas and Secondary School Honour Graduation Diplomas.
14. Circ. H.S. 1B, General Statement re Courses of Study, Grades IX to XIII, 1951-52. Lists Circular Numbers and Titles of the various Courses of Study.
15. Curriculum I. 1, Intermediate Division, Outlines of Courses for Experimental Use, 1951.
16. Circ. H.S. 2, Art, Grades IX to XII, General and Academic, 1940, 1944, 1946.
17. Circ. H.S. 3, Commercial Courses, Grades IX to XII, 1946.
18. Circ. H.S. 4, English, Grades IX to XII, 1946, 1948, 1951.
19. Circ. H.S. 5, Physical Education, Grades IX to XIII, 1950.
20. Circ. H.S. 6, Home Economics, General and Commercial Courses and Vocational Courses, Grades IX to XII, 1945, 1946.
21. Circ. H.S. 7, Social Studies, Geography, Grades IX to XII, 1943, 1945, 1950.
22. Circ. H.S. 8, Social Studies, History, Grades IX and X, 1947, 1949, 1950.
23. Circ. H.S. 9, Social Studies, History, Grades XI and XII, 1947, 1949.
24. Circ. H.S. 10, History, Grade XIII, 1945, 1951.
25. Circ. H.S. 11, Latin and Greek, Grades X to XII, 1942, 1944, 1946, 1950.
26. Circ. H.S. 12, Mathematics, Grades IX to XII, 1943, 1948.
27. Circ. H.S. 12A, Arrangement and Timing of Topics for Mathematics, Grades IX and X, 1946, 1948.
28. Circ. H.S. 13, Algebra, Geometry, Trigonometry and Statics, Grade XIII, 1940, 1943, 1946.
29. Circ. H.S. 15, Modern Languages, Grades IX to XIII, 1945, 1951.
30. Circ. H.S. 16, Music, Grades IX to XIII, 1943, 1944.
31. Circ. H.S. 17, General Science and Agricultural Science, Grades IX to XII, 1946, 1949.
32. Circ. H.S. 18, Chemistry, Grade XIII, 1948.
33. Circ. H.S. 18A, Physics, Grade XIII, 1944, 1946, 1948.
34. Circ. H.S. 19, General Shop, Grades IX to XII, 1946, 1947.
35. Circ. I. 3, Guidance in The Intermediate Division, 1950.
36. Circ. H.S. 21, Guidance (Occupations). Suggestions for Grade XII, 1947.
37. Circ. H.S. 22, Latin and Greek, Grade XIII, 1947, 1950.
38. Circular Tech. 17, Science for Vocational Schools and Departments, Grades XI and XII, 1939, 1943.
39. Circular Tech. 40, Shop Courses in Vocational Schools, Grades IX, XII, 1946.
40. Circular Tech. 42, Social Studies, History of Commerce and Industry for Vocational Schools and Departments, Grades XI and XII, 1940.
41. Circular 46, Courses of Study and Examinations in Schools attended by French-speaking Pupils, 1951.
42. Circular Elem. H.S. 14, Text-books Authorized and Recommended for 1951-52.
43. Circular H.S. 58, Prescriptions in English and Modern Languages for Grades XIII Departmental Examinations, 1952.
44. Circular 52, Text-books Authorized and Approved for Vocational Schools, 1951-52.

## **D. TEACHING AIDS**

### **Agriculture**

45. Suggestions for Teaching in Elementary Schools, 1945.

### **Art**

46. Art and Crafts in the Schools of Ontario, 1949.

### **Home Economics**

47. Circular H.S. 101, Nutrition, A manual for teachers in Secondary Schools, 1943.

### **Library**

48. Teachers' Library Catalogue.

### **Music**

49. Circular Mus. 1, Training the Voices of Children and Adolescents, 1944.
50. Circular Mus. 2, Music in Rural Schools, 1946.
51. Circular Mus. 3, School Music Festivals, 1946.
52. Circular Mus. 4, Introducing Part Singing with Adolescent Boys.
53. Circular Mus. 5, Memorandum relating to The Teaching of Music in Elementary and Secondary Schools, 1946.
54. Circular Mus. 10, Operettas, Music Plays and Cantatas.
55. Music Appreciation Through Listening, for Elementary Schools, 1950.

### **Radio**

56. School Radio Broadcasts. October, April, 1951-52.

### **Religious Exercises, Religious Education and Religious Instructions**

57. List of Bible Readings for Schools, for Secondary Schools, 1944, 1949.
58. Programme for Religious Education in the Public Schools. List of Bible Readings, 1949.

H. M. Matthews

## Executive Assistants

G. L. Duffin, B.A., M.Ed.  
J. F. Uffen

Address of above Officials—Parliament Buildings Toronto,

# Terminology

**Assessment**—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

**Attendance Efficiency**—The percentage relationship of the actual days attended to the perfect aggregate.

**Auxiliary Classes**—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

**Capital Charges**—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

**Compulsory School Age**—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part-time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

**Consolidated School**—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyances.

**Correspondence Courses**—Are a substitute for regular school for those who are unable to attend because of age, health or distance. They cover Grades I to XIII in English and Grades I to VIII Bilingual and are based on the new Course of Studies. A year's active enrolment is over sixteen hundred. Lessons are marked by a Departmental staff. These courses are entirely free.

**Cost per Pupil-Day**—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

**County Pupil**—A secondary school pupil living within the County but outside any secondary school district.

**District**—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing.

**Enrolment (Net)**—The number of pupils who have attended school during the year, excluding all duplications.

**Fifth Classes**—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

**Free School Age**—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

**General Maintenance**—Ordinary, current expense, as opposed to capital outlays and debenture charges.

**Improvement District**—Shall be deemed to be for all purposes of every Act a township municipality, a village municipality, or a town municipality, as may be designated from time to time by the Municipal Board.

**Inspectorate**—The area under the supervision of a local Departmental representative.

**Kindergarten-Primary**—A class combining the work of the kindergarten and Grade I.

**Non-Resident Pupil**—A secondary school pupil who is neither a resident nor a County pupil.

**Public School Section**—A subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

**Resident Pupil**—A secondary school pupil living within the secondary school district.

**School**—Provincially controlled schools may be classified as:

**I. Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

- (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
- (b) **R.C. Separate**—For the children of Roman Catholics.
- (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

**II. Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

- 1. **Collegiate Institutes.**
- 2. **High Schools.**
- 3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

- 1. **Technical High Schools.**
- 2. **Commercial High Schools.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

### III. Provincial Technical Institutes

These offer courses designed to train technicians for positions in industry which are supplementary to, but not in the field of, professional engineering. The admission requirement is secondary school graduation, and the courses are of two or three years' duration. The institutes are owned and administered directly by the Department of Education under the Vocational Education Act, Part II, but close co-operation with industry is maintained through advisory committees, the members of which are appointed by the Minister.

### IV. Professional Training Schools

- (a) Ontario College of Education (University of Toronto)—for the training of secondary school teachers.
- (b) Provincial Normal Schools—for the training of elementary school teachers.

### V. Special Schools:

- Ontario School for the Blind, Brantford.
- Ontario School for the Deaf, Belleville.

**School Car**—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of northern Ontario. There are six of these cars at present, and the length of route ranges from 83 to 221 miles. The route is covered in four to six weeks, and each car is "spotted" for about a week at a time. Problems are solved, work is outlined for the next period, and daily problems of life are discussed. The present enrolment approximates 150, and comprises 10 nationalities. The Department pays all operating costs.

**School Year**—The school year consists of two terms, September 1 to December 22, and January 3 to June 29. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remain on the calendar year basis.

**Secondary School District**—The area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

**Township School Area**—A unit of school administration comprising two or more contiguous rural school sections in the same township or in adjacent townships, or comprising such rural sections along with one or more adjacent villages or towns. See Cir. Elem. 15, "The Township School Area in Ontario."

# DIRECTORY

## DEPARTMENT OF EDUCATION

as of Dec. 31, 1950

MINISTER OF EDUCATION	HON. DANA PORTER, K.C.
CHIEF DIRECTOR	J. G. ALTHOUSE, M.A., D.Paed., LL.D.
DEPUTY MINISTER	F. S. RUTHERFORD, B.A.Sc., LL.D.
ACCOUNTANT	Chief Accountant—H. H. WALKER, B.Comm., C.P.A., A.C.I.S., F.S.S.
ARCHIVES	Archivist of Ontario—G. W. SPRAGGE, M.A., D.Paed.
